PERFECT HOOKS

2023

PERFECT HOOKS

■ Our ancestors knew that a properly selected and sharp hook with optimally profiled and curved bend is the basic and most important part of a fishing kit. The use of Kamatsu series hooks gives us the ability to select the perfect hook for the size and type of the fish, the type and size of the lure as well as the type of line. These parameters allow adaptation to the conditions of any fishery. The 21st century technology allows for the computer design and production process, giving the hooks even greater precision, hardness and sharpness. You will find hooks for any fish, single and double hooks, trebles as well as jig and anti-slug hooks in the numerous and constantly growing Kamatsu family. All of this is available in a variety of sizes and colours with different properties. The Kamatsu trademark guarantees each hook passed the quality control test and will not fail at the fishery.

5101 SODE K-001 ■ 10 PCS

1 01 03 08

5101 SODE K-001 ■ 10 PCS

0 01 03 08

Sode – hooks with a long shank and micro barb. This model is particularly recommended for using the shortened kit method. The smallest hooks are perfect for bloodworms, larger ones for maggots and earthworms as well as all kinds of bait combos.

5104 TOYKO K-0011 ■ 10 PCS

1 01 03 08

5104 TOYKO K-0011

■ 10 PCS

Toyko – hooks made of thin wire, recommended for match fishing as well as quiver tip.

5102 TOMARU K-002

■ 10 PCS

5102 TOMARU K-002

■ 10 PCS

Tomaru – strong, versatile hooks for catching fish with natural baits, vegetable baits and combo baits, e.g. corn, earthworm, pearl barley in addition with maggot.

5103 KAIZU K-003

■ 10 PCS

5103 KAIZU K-003

■ 10 PCS

Kaizu – catchy hooks made of thick wire. Suitable for particles as well as earthworms and nightcrawlers.

5137 CHIKA K-6315

■ 10 PCS

SUPER SPORT

5137 CHIKA K-6315

■ 10 PCS

SUPER SPORT

Chika – very popular hooks with semi-circular gape and micro barb. Ideal for fishing with bloodworms, maggots and bait combos. Widely used in sport fishing.

5132 MIYAKO K-1201

■ 10 PCS

SUPER SPORT

5132 MIYAKO K-1201

■ 10 PCS

SUPER SPORT

Miyako – very popular bended hooks with micro barb. Ideal for fishing with bloodworms, maggots and bait combos. Widely used in sport fishing.

5107 CHINU K-007 10 PCS

5107 CHINU K-007 10 PCS

Chinu – forged, strong hooks with a round gape, long shank and curved barb. Recommended mainly for fishing with seeds like: corn, pearl barley, peas, but also for dough, cheese and boilies (ringed version).

5131 KOCHINU K-7535 10 PCS

5131 KOCHINU K-7535 10 PCS

Kochinu – durable, versatile hooks for coarse fishing with natural and vegetable baits. Good for rivers and stagnant waters.

5160 STRAP K-011 10 PCS

Strap – specialized hooks to fish using the side strap method, suitably profiled hook's eyelet ensures proper alignment at hooking and the penetrating sharp tip plunges the hook even in hard tissue.

5106 ISEAMA K-006 ■ 10 PCS

5106 ISEAMA K-006 ■ 10 PCS

Iseama – very strong hooks with a wide gape. Can be used for fishing with natural baits but also with corn, dough, pearl barley and potatoes. The ringed version is excellent for the hair rig method.

5114 KOISO K-014 ■ 10 PCS

5114 KOISO K-014 ■ 10 PCS

Koiso – a series of forged hooks made of thick wire. The hook's design ensures excellent hooking as well as a good "grip" during a reeling in the biggest fish. Koiso with an eyelet should satisfy even the most demanding carp fishermen.

5133 HANAKO K-720

10 PCS

5133 HANAKO K-720

10 PCS

Hanako – a series of hooks with micro barb. The model is recommended for all float fishing methods. The smallest hooks are perfect for maggots, the larger ones for maggots and earthworms as well as for all kinds of bait combos and seeds.

5116 AJI K-016

10 PCS

5116 AJI K-016

10 PCS

Aji – this model is especially recommended for match and bolognese method enthusiasts as well as the quiver tip method.

5115 ROUND K-100

10 PCS

Round – popular round hooks with an extended shank. Ideal for fishing with maggots and earthworms. They are used for the lure setting in the side strap method. It is very easily removed from the fish mouth due to the use of a long shank.

5161 AJI DOUSKI K-10081

10 PCS

5161 AJI DOUSKI K-10081

10 PCS

Aji Douski – super sharp and forged hooks with a reinforced shank. Model recommended for enthusiasts of float and ground fishing methods of silver fish.

5130 KEIRYU K-029

10 PCS

5130 KEIRYU K-029

10 PCS

Keiryu – a popular series of hooks, addressed to fishermen who fish with worms and seeds alike.

5105 OKIAMI K-0071

5 PCS

Okiami – a model with two barbs on the shank. Thanks to this, it firmly holds the bait and prevents them from slipping. Especially recommended for fishing with earthworms and nightcrawlers.

5136 YARAZU K-7505

■ 10 PCS

5136 YARAZU K-7505

■ 10 PCS

Yarazu – durable and versatile hooks for fishing with both worm and vegetable baits. Especially recommended for fishing of breams and large roaches.

5117 MARUSEIGO K-017

■ 10 PCS

5117 MARUSEIGO K-017

■ 10 PCS

Maruseigo – ideal hooks for match fishing with maggots and earthworms, nightcrawlers, corn, wheat, pearl barley and dough. They can also be used for rigging the lures by spinning enthusiasts using the side strap method.

5141 HAYABE K-101

■ 10 PCS

Hayabe – special hooks for lures setting in the side strap method. The use of long shank enables easy removal of the hook from the fish mouth.

5135 OKAYU K-421

■ 10 PCS

5135 OKAYU K-421

■ 10 PCS

Okayu – a series of hooks with micro barb. The model is recommended for methods starting from float through the pole fishing up to the match and classic float. The smallest hooks are perfect for bloodworms, the larger ones for maggots and earthworms and for all kinds of bait combos.

5112 FUNA K-012

■ 10 PCS

Funa – hooks with micro barb made from thin wire. Especially suitable for catching small and medium fish with bloodworms and maggots.

5128 LIMERIC K-111

■ 10 PCS

5128 LIMERIC K-111

■ 10 PCS

Limeric – this hook model has been known for decades. Suitable for fishing with animal baits and particles.

5110 UMITANAGO K-010

10 PCS

5110 UMITANAGO K-010

10 PCS

Umitanago – versatile hooks suitable for fishing with animal baits and particles

5122 CRYSTAL K-112

10 PCS

5122 CRYSTAL K-112

10 PCS

Crystal – popular “crystals”. Hooks designed for ground and float fishing.

5179 WORM K-336

■ 8 PCS

DROP SHOT

Worm – This type of hook is perfectly suited to fish with drop shot and neko rig. Excellent choice for every experienced lure angler.

5113 SHAD TAIL K-0160

■ 10 PCS

DROP SHOT

Shad Tail – hooks specifically dedicated for enthusiasts of drop shot and side strap methods. The regular blade profile firmly holds the lure and hooked fish. An excellent selection for fishing amateurs and professionals.

5121 EXTRA STRONG K-300

■ 10 PCS

METHOD FEEDER

Extra Strong – Small, but very strong hooks designed for finesse fishing of large catches. Ideal for plant baits, pellets and dumbbells.

5138 WIDE GAP K-400

■ 10 PCS

METHOD FEEDER

Wide Gap – Hooks designed for method feeder fishing, extremely grippy and practical. Excellent for boilies, pop-ups and pellets.

5187 SHINKANDONG K-344 ■ 10 PCS

METHOD FEEDER

Shinkandong – This hook have got uncommon solution of keeping the fish hooked. In-
stead of typical barb we've used triple forged point, which effects with increased strength
of the hook and its penetration capability, same time keeping the fish firmly hooked.

5168 SENSEI K-812 ■ 10 PCS

METHOD FEEDER

Sensei – Popular and good holding hook has been for many years great choice for bottom fishing. The eye is bent toward the barb, creating
a very aggressive and extremely penetrating angle.

5142 KANTOUSURE K-5142 ■ 10 PCS

METHOD FEEDER

Kantousure – these strong, forged hooks are perfect for fishing with a quiver tip rod. They firmly hold the fish during the reeling-in.

5142 KANTOUSURE K-5142 ■ 10 PCS

METHOD FEEDER

Kantousure – these strong, forged hooks are perfect for fishing with a quiver tip rod. They firmly hold the fish during the reeling-in.

5167 SPECIALIST K-811 ■ 10 PCS

METHOD FEEDER

Specialist – This specialist, barbless hook will ideally suit while fishing with the use of method feeder. Its eye is bent backwards, which
enables to tie strong and invisible leaders from monofilament or with fluorocarbon.

5129 AKITASODE K-5129 ■ 10 PCS

MATCH

5129 AKITASODE K-5129 ■ 10 PCS

MATCH

Akitasode – designed for maximum hook-setting performance these hooks are the perfect choice for match fishing.

5157 IDUMEZINA K-5157 ■ 10 PCS

CARP & FEEDER

5157 IDUMEZINA K-5157 ■ 10 PCS

CARP & FEEDER

Idomezina – thanks to the wide gape these hooks can securely hold the fish, while their shape ensures an effective strike and lets you set the hook easily.

5185 MICRO JIG K-150 ■ 10 PCS

BIG EYE

Micro Jig – An excellent hook for rigging small and very small lures with jigheads. It can also be used to rig micro spoons.

5126 ROUND FORGED

K-60

■ 6/8 PCS

■ 5/0, 4/0, 3/0, 2/0, 1/0 – 6 PCS ■ 1, 2, 4, 6, 8, 10 – 8 PCS

0
BIG EYE

03

Recommended
by Dariusz Zgnielec
TEAM KONGER

Round Forged – designed specially for the use together with a cheburashka jig rig these hooks have a bigger eye which is positioned perpendicularly to the hooks bend and therefore ensures the natural action of the bait.

5180 OFFSET FORGED

K-337

■ 5/7 PCS

■ 5/0, 4/0, 3/0, 2/0, 1/0 – 5 PCS ■ 1, 2, 4, 6, 8 – 7 PCS

0
BIG EYE

03

Offset Forged – Thin, strong and extremely sharp hook made from carbon steel. Thanks to the wider eye, positioned perpendicularly to the hook's axis, the bait looks very natural.

Recommended
by Sean "Mister Finesse" Perez,
pro angler and fishing journalist

5181 OFFSET LIGHT K-338 ■ 5 PCS

Offset Light – Extremely sharp offset hook with oversized eye, perfect to use with 'cheburashka' heads. Best choice to rig slim soft lures for perch or zander.

5162 OFFSET HEAVY K-0749 ■ 3 PCS

Offset Heavy – forged and very durable hooks for setting larger soft lures. They will perfectly perform in spots of extreme vegetation which are eagerly occupied by predators waiting for their prey.

5163 OFFSET REGULAR K-0743 ■ 5 PCS

Offset Regular – high quality offset hooks dedicated for rigging majority of the lures. The free-fall of the lure is extended due to its lightness which does not affect lure's action.

Recommended by Sean "Mister Finesse" Perez, pro angler and fishing journalist

5189 OFFSET WEIGHTED REAR K-340

3 PCS

Offset Weighted – Strong, forged hooks which are giving the angler wide possibilities of lure animation. Depending where the weight is located, you can give your lure different action: nose-diving, horizontal, or back weighted, which will imitate wounded minnow.

5165 OFFSET WEIGHTED CENTER K-0747

3 PCS

Recommended by Dariusz Zgnilec
TEAM KONGER

5183 OFFSET WEIGHTED FRONT K-340

3 PCS

5169 OFFSET SPRING LOCK K-2435 ■ 3 PCS

Offset Spring Lock – Wide gap hook with a spring baitholder. It performs great for catching predator fish with all kinds of swimbaits. Extremely sharp and reliable. The wide range of sizes will easily let you to match the hook with a bait of any size.

5411 ABERDEN JIG EXTRA K-120

5138 WORM HOOK 40 K-074 ■ 5 PCS

5139 WORM HOOK 44 K-0744

■ 5 PCS

Worm Hook – special hooks for setting soft lures. The proper profile enables the entire hook to be covered with lure. Only the hook tip is sticking out and when the fish attacks the hook comes out of the lure and sets into the fish mouth. An excellent method to get to the predators living near stumps, fallen trees and among lush vegetation.

5178 TROUT SPOON K-335

■ 8 PCS

Trout spoon – Hook with oversized eye, dedicated to rig trout spoons. Extremely sharp, with great hooking efficiency.

5139 JIG GAME LIGHT K-130

■ 10 PCS

Jig Game Light – An excellent choice for rigging all silicone insect and larvae imitations. Works great with tungsten beads to create excellent micro-heads.

We recommend using with Tungsten Slotted Beads - page 321

5145 WORM JIG UL K-140

■ 10 PCS

Worm Jig UL – Like the Jig Game Light hook, it has been designed for rigging larvae imitations. The range of sizes makes it easy to match the size of the hook to the lure being used.

We recommend using with Tungsten Slotted Beads - page 321

5164 HADOURA CHISANA K-528 ■ 6 PCS

5158 HADOURA K-526 ■ 2 PCS

5125 SENYO K-115

■ 10/5 PCS

- 7/0, 6/0, 5/0, 4/0, 3/0, 2/0 – 5 PCS
- 1/0, 1, 2, 4, 6, 8, 10, 12, 14, 16 – 10 PCS

Senyo – durable and forged hooks with a curved bend. Especially recommended for vegetable baits: wheat, pearl barley, potatoes, corn, peas and cheese. Also used for fishing with dead and live fish.

5118 BEAK K-1091

■ 10/5/3/2 PCS

- 8/0, 9/0, 10/0, 11/0, 12/0 – 2 PCS
- 6/0, 7/0 – 3 PCS
- 1/0, 2/0, 3/0, 4/0, 5/0 – 5 PCS
- 1, 2, 4, 6, 8, 10, 12, 14 – 10 PCS

Beak – a series of durable hooks addressed to those fishing for crucian carp, tench and carp on corn, pearl barley, protein balls and worms as well as fishing for pikes, zanders and catfish on dead fish or livebait.

5120 BAITHOLDER K-1101 ■ 5 PCS

5119 BAITHOLDER K-110 ■ 5 PCS

Baitholder – these hooks perfectly hold the lure due to the additional barbs on the shank. Especially recommended for fishing with bunches of earthworms, nightcrawlers and dead fish.

5159 CATFISH K-11026 ■ 5/3/2 PCS

Recommended by Michał Wiśniewski
TEAM KONGER

- 4/0 – 5 PCS
- 6/0 – 3 PCS
- 8/0, 10/0 – 2 PCS

Catfish – hooks made of highly durable steel. The thick wire holds very well in fish mouth and reduces the risk of cutting the fish even during strenuous reeling. Hooks dedicated to fishermen hunting for big game.

5186 BIG FISH FORGED

K-343

■ 2 PCS

Big fish forged – Type of hook developed to catch big and powerful fish. Shape of the point gives increased hooking efficiency.

5124 HYPER STRONG NAUTILIUS X3

K-41

■ 2 PCS

Two series of forged durable hooks. Ideal for rigging cat-fish kits, ocean livebait fishing as well as for fishermen who want to deal with halibut and sturgeon.

5121 HYPER STRONG NAUTILIUS X4

K-51

■ 2 PCS

CARP HOOKS

■ The group of carefully selected carp hooks coming from diligent and long tests in water. They are reliable even in the most difficult fisheries requiring a strenuous reel in. The thick, and thus safe for fish wire, is also a guarantee of our hooks durability. The eyelet diameters are large enough to easily tie knotless knot, d-rig, or stiff rig leaders.

5127 DX-AJI K-021 ■ 5 PCS

DX Aji – enhanced Aji hooks designed for those fishing for large carps, grass carps and breams. The hooks are made of a thick wire which is resistant to high overload. Moreover, hooks of this type (thick, round wire) do not cut the fish mouth during a strenuous reel in.

5134 KAYO-HEAVY CARP K-11044 ■ 5 PCS

Kayo-Heavy Carp – a series of very durable and forged hooks for fishing big carps and grass carps using the hair rig method. The hooks are highly resistant to high overload occurring during the long reel in of big fish.

5150 SENSEI K-809 ■ 10 PCS

Sensei – barbless hooks dedicated for professional cyprinus hunters. An essential piece of equipment for many special domestic and foreign fisheries.

5140 MEBARU K-810 ■ 10 PCS

Mebaru – the long and straight shank will enable easy tying of a leader with a d-rig. Good choice for balanced boilies.

5151 KOI-BARI K-807

■ 10 PCS

Koi-Bari – forged durable hooks shaped to hold the reeled fish perfectly.

5152 YAMATO K-805

■ 10 PCS

Yamato – hooks with a straight blade and typical shank length. Appreciated by both beginners and experts of carp fishing.

5153 KIJi K-803

■ 10/7 PCS

■ 1 – 7 PCS ■ 2, 4, 6 – 10 PCS

Kiji – a very successful model. Great for tying d-rig.

5154 MATSUI K-802

■ 10 PCS

Matsui – a very wide and curved bend with extremely catchy blade. Recommended for double boilies and pop-ups.

5184 WIDE GAP FORGED K-341

■ 5 PCS

Wide Gap forged – Strong and sharp hook well suited to use with hair rig. Field tested, catchy - good choice both for rookies and pros.

TEFLON CARP HOOKS

■ The perfect Kamatsu hooks' offer has been extended with a real treat - carp hooks covered with teflon coating. Applying this kind of coating to hook's surface results in smoother hook setting during a bite, and consequently the number of landed fish, comparing to use of regular hooks, significantly rises. The fact that teflon coating does not reflect light also plays important role while fishing cautious species. All in all, we recommend these hooks as an excellent choice for demanding carp fishermen.

FLY HOOKS

■ The popularity of fly fishing which increases from year to year prompted us to present a range of hooks for fishing with wet and dry flies, streamers and nymphs. We are convinced that the high quality of these forged and chemically sharpened hooks will be accepted by a large group of enthusiasts among lowland fly fishermen as well.

5147 DRY FLY K-9004

FLY 10 PCS

Dry Fly – Hooks perfect for tying both dry and wet flies. Chubs, ideo, great trout and graylings - none of these species will win with these extremely durable and sharp hooks.

5146 LIGHT NYMPH K-9003

FLY 10 PCS

Light Nymph – Slightly longer than standard hooks for fishing with a dry fly, they are perfect for hooks to tie various types of nymphs and bigger wet flies. We recommend them especially for fishing in so-called difficult fisheries and wherever you can hook a really big fish.

5148 STREAMER K-9007

FLY 10 PCS

Streamer – Extended and triple reinforced hooks will prove themselves not only during trout fishing. Due to the low price and unprecedented durability, the largest of hooks may become the bestseller of this season. Trout fishermen will certainly appreciate the penetrating tips and grasping barbs which were carefully crafted by Japanese specialists.

5149 SCUD K-9012

FLY 10 PCS

Scud – The imitation of gammarus is one of the most effective artificial flies. Unfortunately, the hook is exposed to frequent contact with the bottom of the river especially during so-called short nymph fishing and as you well know a blunt hook is a bad hook. Why risk the loss of the catch of your life if you have Scud hooks at your disposal - they are highly resistant to abrasion and retain a significant portion of their original sharpness even after several fishing trips.

TREBLES

■ Series of extremely durable and sharp treble hooks dedicated to uncompromising hunters of predators. The wide range of sizes and shapes will easily allow you to select the model suitable for setting a pike wobbler, a chub floating wobbler, a zander soft lure or hooks for enthusiasts of livebaits. We also added the sea models which are helpful in setting commonly used pilkers to make a complete and accurate offer.

5195 GRAND PRIX CARNIVORE TREBLE K-078 6 PCS

NEW

Grand Prix Carnivore Treble – Kamatsu treble hooks have a wide fan base, and this is by no means unfounded. Committed to the highest quality, our new model, the Carnivore, is a true jewel in the crown of uncompromising spinning anglers. Chemical sharpening for outstanding grip, reinforced forged carbon steel wire, and a Teflon coating to ensure rust resistance and a sure hook-up with every bite. The Teflon coating also has the added advantage of being able to suppress light flashes, which is very important in shallow, translucent and clear waters. The wide range of available sizes will allow to arm various lures, from trout wobblers to zander or pike soft baits systems.

5194 STRONG ROUND TREBLE K-076 6 PCS

NEW

Strong Round Treble – The classic Round hook profile given with reinforced, carbon forged wire is an item on the tackle menu that no demanding predator hunter should pass by indifferently. Other important aspects worth mentioning are forged bends, chemically sharpened, reinforced points and small barbs which securely hold the hooked fish. Depending on the size selected, they are perfect for rigging wobblers, spinners or soft bait rigs.

PRO CARP LEADERS

■ Special leaders designed particularly for carp fishing with the hair rig method. It was tested in many carp fisheries across Europe and performed well in all conditions. Kamatsu Pro Carp leaders are an excellent choice for all fishermen hunting great carps due to the highest quality used components. The leader's line and knot guarantee that the lure looks natural and is not suspicious to the most cautious fish. Only selected Kamatsu hooks and swivels were used for assembly of the leaders in order to avoid unpleasant surprises while fishing. The hooks are tied using the most effective method – the so-called “knotless knot”. The swivels are tied with a special knot which distributes the load on the entire knot rather than the point of contact with the swivel. The leaders are built on the sinking lines coloured the way effecting camouflage for the most types of fishery's bottoms is guaranteed. Ideal for perfect fishermen who delight in cultivated hobby.

CARP LEADERS

■ We present a leader's kit with hooks designed for enthusiasts of the hair rig method. They can be used by both professionals and amateurs with success. The individual elements were composed based on the suggestions of professional carp fishermen. They have determined the standard shape of hooks, the length, strength and colour of the used braids as well as the size and type of swivels. Each package has stoppers attached.

METHOD FEEDER

■ **BRAIDED LINE LEADERS.** Besides traditional monofilament, braided line is a leader material which has a large group of enthusiasts. Now our series of leaders for Method Feeder has been extended by models made of special braided lines in small sizes. It is worth reaching for this version of leaders because of their softness and high durability characteristic for braided line. These obvious advantages of the line can now be used with our new leaders, which, depending on the version, are finished with a ring, fast-stop or a spiked needle made of stainless wire. The leaders are made on the basis of selected Kamatsu hooks, which allows their optimal selection depending on the lure and species of the fish caught.

METHOD FEEDER

■ **MONOFILAMENT LEADERS.** Leaders designed on the basis of experience of our testing team in many European fisheries. The high quality materials used to create these leaders make them top of the range for Method Feeder fishing. The range of types, sizes and strengths available makes it easy to choose the leader best suited to the size and species of fish you are targeting. You will find both leaders with a ring, a fast stop or a stainless steel wire spike. These variants will allow quick and easy application of baits, no matter what you are fishing for. Whether it's pellets, wafers, pop-ups or classic earthworm, Kamatsu Method Feeder leaders will handle any of these lures perfectly.

50 cm LEADERS

■ Our special offer - hooks with tied leaders is for novice fishermen as well as for those who do not want to waste time on laborious tying of leaders. The line length of the “ready-made” kits is 50 cm. Such tied leaders are suitable for fishing in rivers (long leader) as well as in standing waters or reservoirs (short leader). The second option only requires cutting off the excessive fragment of the line. The leaders are tied to a 0.10 to 0.30 mm monofilament line and are wrapped in packages with the images of the fish or baits for which they were intended. There are plenty of choices and the hooks are very affordable.

Construction of 9 digit article number for leaders 50 cm and 70 cm

Fluorocarbon Coated 50 cm LEADERS

■ We introduce a new series of leaders tied to a fluorocarbon coated monofilament line to complement the offer of the ready-made 50 cm leaders. The line is characterized by increased resistance to abrasion and reduced visibility in the water which enables fishing of cautiously feeding large fish. The careful workmanship and wide range of hooks enables the easy choice of an interesting model tailored to the specific fishing method for particular fish.

■ A braided line developed especially for predator fishing with artificial lures. It is characterized by increased line strength, knot strength, and unprecedented smoothness. Extremely long casts are the result of tightly woven, super-thin fibres of Japanese polyethylene. Additional benefits of this technology are increased abrasion resistance and significantly longer casts, compared to other 8 strand braids.

■ The Techron Micro Braid braided line was developed especially for fishing with SUL/XUL/UL sets, and is perfectly suited for this task. The extremely thin polyethylene fibres have been carefully braided to give a smooth surface that glides easily over the guides, resulting in significantly longer casts. Despite the impression of finesse, it is a surprisingly strong line, allowing for an effective and fast reeling in of the fish. An additional, important feature of this line is the extraordinary precision of lure control, as its drag to water is minimal.

■ A selection of braids designed for catching all types of predators by spinning or livebait as well as for the classic bottom fishing of huge coarse fish. Techron Olive Green, Techron Black and Techron Fluo braids are characterized by exceptional resistance to abrasion. The braids tendency of freezing at low temperatures and getting dirty is reduced due to a very dense weave. Techron braids are made of Dyneema fibres and thus even the smaller diameter ones are highly resistant to breaking. Techron Fluo is used in sea fishing and big game fishing. Techron Olive Green and Techron Black are an excellent choice for carp fishermen since they stay perfectly at the bottom.

Recommended by Sean "Mister Finesse" Perez, pro angler and fishing journalist

■ Clear - 100% transparent monofilament line with a refractive index nearly identical to the water. Incredibly resistant to abrasion, fully resistant to UV rays and very soft. On the contrary to other monofilament lines, Fluorocarbon 100% does not absorb water which means it does not age and is resistant to salt water. The Fluorocarbon 100% is a luxury fishing line, resistant to chemical agents and applicable for all fishing methods. Carp, fly, spinning, float and ground fishing enthusiast - anyone who at least once spools their reel with Fluorocarbon 100% will certainly appreciate its unique properties. It is especially recommended for fishing in crystal clear waters. Available in diameters from 0,104 to 1,02 mm, packed on 10 and 20 meter spools.

TECHRON SOFT NYLON

Colour: light grey

—	218 030 022	0,22	6,70
—	218 030 025	0,25	8,30

■ A superb fishing line from Japan, made of 100% Nylon. Extremely break resistant knots, soft and limited stretch fishing line it is applicable for all fishing methods. It is practically invisible to fish and does not absorb water due to the implementation of 100% Nylon (purity tested in a laboratory). In addition, during the production process the fishing line was fully proofed against UV rays. Available diameters from 0.10 to 0.25 mm and packed on 150 and 30 meter spools. A world-class product, highly recommended by hunters of great fish worldwide due to the purity of the material applied and highly meticulous quality control.

TECHRON METHOD FEEDER FAST SINKING

NEW

Colour: bottom brown

300 m		150 m		Diameter (mm)	Strength (kg)
Art. no	Art. no	Art. no	Art. no		
209 300 018	209 150 018			0,18	4,80
209 300 020	209 150 020			0,20	5,50

209 300 030	209 150 030			0,31	10,90

■ A Kamatsu sinking line that performs superbly where precision, reliability and speed are required. It offers excellent abrasion resistance and high knot strength, making it an excellent choice for safe and effective fishing in difficult spots. Low stretch and lack of memory of shape are other important factors that should definitely appeal to anglers specialising in feeder and method feeder fishing. Perfect for larger carp, in a colour that masks well against the bottom, it is spooled on 150 m and 300 m spools. The available range of sizes makes it possible to find the right line for both finesse, classic feeder fishing and heavy, typical carp fishing with method feeder. When it comes to effective ground fishing, this line is second to none.

LEADERS

■ The Leaders are made of steel fibres coated with graphite and equipped with excellent quality swivels and snaps. Full resistance to cutting and twisting due to overload caused by reeling the fish or releasing a snagged bait. Extremely meticulous strand and 100% water resistance. Available in 20 cm, 30 cm and 5 m long sections of guaranteed load of 5, 10, 15, 20 and 25 kg will make pike fishing enthusiast very happy. Needless to say – test it and you will surely appreciate its quality.

LEADERS

■ Complete leaders made of chromium-tungsten steel with perfectly matched dark brown colour will resist the teeth of even the largest pikes. Packed in packages most frequently purchased by fishermen in lengths of 20 and 30 cm with 5, 10 and 15 kg of breaking strength. They are the only leaders available on the market which can resist the hardest battles with the fish due to the unique production technology. The use of Volfram X will let you forget about jagged leaders curling into a spiral.

■ Responding to the problems of environmental pollution, we decided to introduce lead-free jig heads. Made from an alloy with a similar density to the lead, cast on super sharp Kamatsu X-Press hooks, they will allow you to rig a wide range of soft baits. They are available in a large weight range and two colour options, matt silver and matt black. By using our innovative jig heads we can now have a real influence on the degree of environmental pollution in our hobby. It is worth getting them because it is in our common interest to provide favourable conditions for fish and other aquatic organisms.

BIG JIG HEADS
DOUBLE ARROW
article number structure

413 **xxx** **xxx**

Hook size Weight

■ Double Arrow heads were designed for rigging the largest soft lures available on the market. Super sharp, forged and hardened hooks were used for production of those professional jigs. They underwent a multi-stage quality control which is necessary to detect the tiniest imperfections during the production of a hook and to reduce the probability of losing a medal-winning fish to near zero. The optimal weight deployment guarantees firm hooking at any distance and proper action of the soft lures. All Double Arrow heads have metal spikes which prevent the lure from slipping off during strong casts and struggle with the fish.

■ Light game fishing enthusiasts will appreciate the recently introduced innovation: heads in 4 small sizes with micro barbs firmly holding the soft bait. Some bait has a body so soft that it is impossible to properly set the lure on the jighead with the traditional collar. Our micro barbs help to overcome this problem and allow for excellent presentation of the lure without any risk of damaging during the setting of the lure. Perfect Kamatsu hooks used in the production allow for firm hooking and effective reeling together with the satisfaction of your good choice.

■ While preparing the line of Spinning System accessories we were guided by the demand for specialist elements of spinning sets, which often decide about the final success during fishing. In this group of articles you can find high-quality elements made of tungsten, such as bullet weights, weights for Texas and Carolina Rig sets, as well as various accessories for soft baits. A separate group is made up of heads on two types of hooks, which deserve special attention because of the precision of workmanship, exceptional sharpness of the hooks and the use of tungsten. They are the perfect choice for finesse and soft lures made of soft plastics and fly materials.

Cheburashka Tungsten weight

■ A classic construction made from super heavy tungsten. They are distinguished by their ideal ball shape and the meticulous shape of the wire, which makes them easy to use in combination with hooks ending with an eye. Available in natural tungsten and bright fluo colours.

668 002 006	3/32	2,6	2
668 002 003	7/64	3,1	2

■ Designed to be pressed into soft baits, available in 6 sizes. Thanks to the fact that they are made of tungsten, a metal nearly twice as heavy as lead, the weights are significantly smaller at the same weight. It is easier to fit them into small lures without the risk of tearing them.

Fastach Tungsten weight

■ Universal sinker, equipped with a mini snap, allowing easy attachment to hook eyes and other elements of spinning sets. It is perfect for when you need to add a few grams of weight to cast to a distant part of the fishery or when you need to get the lure down to a greater depth faster.

Art. no	Weight (oz)	Weight (g)	PCS
668 004 001	1/8	3,5	2
668 004 002	3/16	5,3	2

Screw-in Spinning Blade

MINI

LONG

Art. no	Size	PCS
273 000 014	MINI	2
273 000 015	LONG	2

■ Two types of blades used to enhance the hydro-acoustic wave of standard soft lures. Thanks to their easy application we can easily make the action of the soft lures way more attractive in a matter of seconds.

Heavy duty beads red for Texas/Carolina rig

Art. no	Diameter (mm)	PCS
273 000 019	6	8
273 000 020	8	8

Glass beads red for Texas/Carolina rig

Art. no	Diameter (mm)	PCS
273 000 016	6	15
273 000 017	8	12
273 000 018	10	10

■ Durable beads tested in Texas and Carolina Rig sets. They are characterized by intensive red colour, which is especially attractive for predators. Additionally, using a set consisting of a tungsten sinker and beads we can count on an additional luring effect associated with the emission of sounds.

Bullet weight T-stop (rubber) Texas/Carolina Rig

Art. no	Size	PCS
273 000 010	S	15
273 000 011	L	15

Rubber stoppers for bullet Texas/Carolina

Art. no	Size	PCS
273 000 012	#3	10
273 000 013	#5	10

■ Two types of stoppers dedicated to Texas and Carolina Rig sets. In order to use the T-stop you need to put the main line through the hole of the sinker and then put the stopper through the hole. The last step is to tighten the stopper as far as it will go and cut off the part that sticks out in front of the sinker.

Tungsten Slotted Beads

■ Special tungsten beads with a hole adapted to be put on a hook with an eye. When used in combination with fly fishing materials, these beads can easily be used to prepare a variety of lures imitating larvae, nymphs and pupae. They can also be used to make micro jig heads for use with the smallest soft lures. **Perfect for use with dedicated Kamatsu hooks.**

5139 JIG GAME LIGHT

5145 WORM JIG UL

SWIVELS, SLEEVES, RINGS AND SNAPS

■ Wide variety of choice of popular barrel swivels, rolling swivels and the strongest ball-bearing swivels. All of them are suitable for delicate float fishing, medium spinning, heavy spinning and ground fishing methods depending on the size (22 - 4/0). We also prepared a wide offer of Kamatsu snaps. Starting from the interlock snaps for light and medium spinning, all float based and light ground methods to extremely strong snaps made from a single piece of wire. Crosslock and Fastlock snaps even when heavily overweighted during the reeling of a large fish may bend and twist but will not open. There are also various sets of swivels, snaps and swivels with snaps available as well as brass sleeves used as clamps terminals for finishing metal leaders.

Rolling swivels with snap made of a single piece of wire. It is a very simple yet extremely durable set. Recommended for hunters of impressive coarse fish, perch, trout and "white" predators, carps, grass carps, salmons, sea trout and pikes and zanders. The largest sizes of 1/0 and 3/0 will prove themselves when fishing for catfish and sea fishing.

STOPPERS ■ Small items useful in any fishing method. The variety of shapes and colours (black, coloured and colourless) should meet the needs of every fisherman. Perfect as limiters for wagglers, “bumpers” protecting the knots or drop shaped lead with swivel, as stoppers protecting the tip of a pole rod from taking water when the tip gets submerged.

KAMATSU
WOBBLERS

Vibra

■ Kamatsu Vibra wobblers are of the highest workmanship quality with parameters perfectly fitted to the conditions of all fisheries and tastes of all predators. Enthusiasts of light and heavy spinning for catfish and sea trout will find something for themselves. These wobblers should take an important place in the boxes of danube salmon hunters and enthusiasts of more popular trolling. All wobblers are very carefully made of very hard and damage resistant materials. A wide range of colours will satisfy the most demanding fishermen as well as the well-chosen treble hook. The rattle is another reason why our wobblers should be attacked by predators with even more zeal. In addition to the interesting acoustic effects it moves toward a wobbler's tail at casting to stabilize it, resulting in longer cast. Note: All wobblers have a split ring mounted in the front eye which can be removed when using a snap.

JMI **JUMPING MINNOW**

The elongated body of this lure, closely resembles a large bleak, and tells us at first glance what it has been designed for. The ultimate goal of this project was to achieve a realistic action, and to increase the casting range to the max. This little minnow with its Magnetic Running Shaft system allows you to send it over striking distances, and cover a large area of water. When guided with jerks and pauses, the Jumping Minnow will unleash its true potential.

CMI **CHUBBY MINNOW**

A small wobbler of versatile use, allowing you to fish in shallow and deeper areas of the fishery. You can count on its success both when leading across the current and downstream. Chubby Minnow will be an attractive catch for all small and medium predators, according to the old angling rule that: a small fish will be eaten by everything. It is worth reaching for it and checking the timelessness of this adage.

DMI DIVING MINNOW

Small fish running through the depths is always an invitation for dinner for the predators of the depths, and they don't tend to waste such opportunity. This little crankbait is a real treat, so give it a try nearby holes and deep areas of rivers. To get the best of it, make few cranks and make short pause, to let it ascend a little.

LUM LUCKY MINNOW

Name tells it all. This lure makes basically any predator around hungry, and they simply can't resist its seductive action. It works best while slow retrieve with short pauses, however it's not afraid of strong current, and retrieved close to the river bank effectively provokes the fish waiting for some prey.

RUM RUNNING MINNOW

An ideal lure when there are signs of feeding predators and standard action lures are failing. The Running Minnow will work great as a long range lure for faster retrieves with pauses or for twitching. This model is equipped with a loud rattle, which often turns out to be an additional luring element that decides when fish bite. It is worth completing your box with this specialist wobbler.

TOP TOP POP

This little popper will give you the thrills as well as it will thrill the fish seeing it above. One of the best lures for topwater fishing, especially ad dawn and dusk. Recipe to get the best out of it: jerk – pause, jerk and pause. Simplicity at its best, but efficiency well above other lures. It's easy to fall in love with it, so be warned!

STS SECRET SHAD

Despite its mysterious name, certain aspects of this lure can be seen at first glance. Secret Shad is made with the utmost attention to detail. Only when you cast it into the water does it show us what kind of secret it hides. Extraordinary performance! Tempting, flickering and mirroring action, flawlessly tempts pike, perch, trout and zander. Retrieve it at a steady pace, jerk the rod tip, stop, and let it slowly float... These simple tricks will have a great effect on the number of bites, as we have found during many of its tests.

Model	Art. no	Length (mm)	Weight (g)	Cast range (m)	Depth (m)	Line strength (Lbs)	Type	Colour
STS 57 SF	324 083 xxx	57	8	20	0,4-1,0	8-15	Slow Floating	001, 002, 003, 004, 005, 006, 007, 008

CCR CRAZY CRANK

A small crankbait, which is an irreplaceable lure for virtually any fresh water. It can effectively provoke even an inactive predator to strike. Even during the most ordinary retrieve, as befits a good crankbait, it can surprise you with its exceptional effectiveness. We probably don't know how it can be wrongly run. A low submersion predisposes it to fishing in shallower waters, where it is fiercely attacked by pike and perch.

Model	Art. no	Length (mm)	Weight (g)	Cast range (m)	Depth (m)	Line strength (Lbs)	Type	Colour

MS MICRO SNACK

The unique shape of this wobbler immediately attracts attention. We assure you that not only yours! Micro Snack is eagerly eaten by perch, trout or chub. Narrow, flashing action combined with flickering perfectly fits the tastes of a wide range of river and lake predators. Just retrieve it with short twitches, with two-three-second pauses, so that even those fish that are only following would strike the lure with great ferocity. Micro Snack is one of these lures, which will have a fixed place in the compartment of your favourite tackle box.

CMN CRUISER MINNOW

This lure allows you to effectively fish the upper parts of the water. Cruiser Minnow is a real treat for pike from underwater grass bed and zanders lurking among rocks. The built-in long cast system allows you to reach much further than you might think. The moving load during casting moves to the back of the lure for maximum distance, and during retrieve it goes back to the front, stabilising the action.

FM FLASH MINNOW

An interesting internal construction of this wobbler lures predators, sensitive to visual stimuli, with exceptional effectiveness. While retrieving the wobbler, the holographic strip placed inside the dry chamber falls into tight vibrations, temptingly reflecting the light. Flash Minnow is definitely worth recommending for pike, zander and perch. It works very well both during steady retrieving as well as during twitching.

TM TWITCHING MINNOW SP

Twitching Minnow is an extremely catchy wobbler designed to catch fish that like bigger lures. This lure catches really stunning fish, all you have to do is twitch it. Dynamic twitches of the tip will release its full potential, tempting both inactive and feeding predators. The key aspect is a moment of pause, literally 2 seconds, during which the most frequent bites occur. Built-in long cast sliding balance system ensures long and accurate casts, as well as an attractive, slow emergence of the lure with a slightly raised head.

PS PIKE SNACK

Characteristic shape of the body and attractive action even with regular retrieve, make Pike Snack a real treat for every aquatic predator. It is an excellent model designed for twitching, able to impress on almost every water. Jerking the tip of the rod while retrieving the line awakens in the predators a sincere desire to taste this delicacy. After a few jerks, stop the retrieve and keep in contact with the lure. This is the moment when the fish often decides to strike. So, just give them what they want, and for yourself, a real pike killer.

DSH

DRIFTIN' SHAD

This wobbler is designed for trout fishing in running waters. However, tests have shown that apart from its planned role, it is excellent at provoking all kinds of other predators. Zanders, asps, or pikes without the slightest hesitation strike this lure, attacking it fiercely. We do not know where the secret of its effectiveness lies. However, we do know for sure, that it is one of the lures, which are worth having with us on every single fishing trip.

PHB **PHANTOM BLEAK**

If you think that this wobbler looks like a bleak, you are absolutely right. If you think it is an asp wobbler, you are also right. It is very effective in catching these fish in any river, right from the mountains, down to the sea. The colour versions of Phantom Bleak fit asp tastes perfectly, allowing you to choose something for basically any conditions. Just quickly move it in the upper parts of the water near the places where bleak gathers, and you won't have to wait long for a strike.

BBS **BABY SHAD**

It would seem that 4 cm is not a lot, and yet there are times when really big predators are interested in such small food. A perfect lure for fishing in shallow, still waters. It works best when led slowly, as it penetrates water at a depth of about 2 m. It does not mean that it will not be able to go deeper, because it is a sinking model. If we leave it for a dozen or so seconds, allowing it to sink deeper, it will also get to the predators we are interested in. Thanks to its compact, bulky construction, this lure can be sent to distances even over 20 m.

005 Hot Perch

SCR

SUPER CRANK

The barrel-shaped profile of this wobbler will allow to send it very far, and the long lip will allow to move it to the depth of up to 2m. Each 2-3 second pause in retrieve of this lure causes its slow ascent, which additionally stimulates predators to attack. During the tests, Super Crank lured perches, barbel and pike perfectly. The solid Kamatsu trebles complete the rest. It is definitely worth to have it in your arsenal.

CCH

CHUB CHAMPION

This small wobbler with a bulky body and an extended lip in a sinking version is designed mainly for fishing chub, ide, trout and perch. At a medium speed of retrieve, it swings out dynamically to the sides. It is not afraid of fast trout riffles, as well as lazy meanders with almost stagnant water, in which perch like to gather and lurk for food flowing nearby.

LBU **LUCKY BUG**

About the fact that imitations of insects are very effective, especially when fishing for "white" predators, all spinning anglers know. Therefore, the offer of Kamatsu wobblers has been extended by this "bug" which should be placed in the box of every chub and ide hunter. It is a floating version of 3.5 cm length with a lip. It can be led on a shallow depth or released with the current. The wobbler is available in 10 colours imitating beetles, bugs and crickets. Chubs and ide will certainly not resist.

BGLC BAD GHOST

Long Cast

90 mm of simple perfection. Add to it 32 g weight, and you'll get a lure which will cast as far as you wish. Short and strong lip allows to twitch it, or to crank it. Works amazing both ways. For freshwater, we suggest to use it for asp fishing, with fast paced retrieving. On the ocean... Well, let's just say: cast it nearby some shoal of little sardine or anchovy, let it drop for few seconds, twitch it, and the magic will happen. Simple as it is.

WSLC WATER SCOUT

Like not so many times before, this time, we were simply astounded. This stickbait many times saved our self-esteem, where other lures failed. For our pro staff, it's one of the most often used lures for their recreational fishing. It flashes its belly during free drop, turns side-to-side when twitched, and basically, makes the fishing whole lot of easier! Water Scout should be placed on a pedestal among other lures as an example of pure perfection - simply, it can't be surpassed. Additionally, shape and weight of this stickbait grants you with extremely long casts.

SGR SLOW GLIDER

A big pike often stays in shallow spots, for example, amid flooded reed beds or in the weeds where the depth from the water surface to the weed-line makes less than one meter. In such places the fast-sinking model was hard to animate. That is why we have decided to introduce Slow Glider – the perfect lure for slow retrieve, stable and with repeatable action. Thanks to its minimal sink rate Slow Glider allows you to use different animation techniques and to effectively provoke the fish to strike.

RSP

ROOSTER POP

Popper lure, recommended for fishing big predators in the sea. An outstanding feature of this model is its monolithic body. Laser-cut from acid-resistant steel an guarantees outstanding durability of the lure. This popper can easily handle GT, tuna or rooster fish and, thanks to the perfect placement of the lead weight inside the body, can perform incredibly long casts. Long-distance casting is crucial during fishing for cautious predators.

Model	Art. no	Length (mm)	Weight (g)	Cast range (m)	Depth (m)	Line strength (Lbs)	Type	Colour
RSP 150 F	324 053 xxx	150	54,5	45	Top Water	60	floating	065, 066, 067, 078

GTP

GT POP

Big fish like big baits. This is an indisputable fact. If you are making plans to catch a big-eye jack or large tuna then GT Pop is a must-have lure in your tackle box. During testing sessions these poppers showed outstanding performance, constantly showing far better results than similar lures of this kind.

RFP REEF POP

The vicinities of coral reefs is one of the places where schools of oceanic pray fish gather. Consequently it is also the natural habitat of all predators. Reef Pop lets you effectively explore all those spots, as it is a perfect imitation of prey escaping close to the surface of the water. With its strong wave produced by the lure's head Reef Pop provokes immediate attacks of swimming-by predators.

GS GLIDER STICK

The bestseller among wobblers, perfect during sea trout fishing from the shoreline as well as pikes feeding near the reeds. An amazing effect can be reached if we jerk it with stops every several seconds. Such leading of a lure requires the fishing line to continuously be slightly tensed. The number of bites will certainly surprise you.

TRM TROUT MINNOW

This lure was designed for fishing trout in fast flowing streams and rivers. Thanks to its unique body shape, optimal placement of the weight chamber, and the right proportions of the lip's size, Trout Minnow will not tip over even in the fastest streams. This lure will also show great performance during chub or ide fishing in rivers along riprap banks or on shallow reefs.

SPM SPARKY MINNOW

This lure looks and behaves exactly like a small bleak - short horizontal moves of the tail part in cooperation together with gentle light-reflecting effect which results in attractive shimmers on both sides. Sparky Minnow is an excellent choice for fishing chub or asp in rivers as well as an early-spring pike or perch. To put it short - an all around and all year lure.

Model	Art. no	Length (mm)	Weight (g)	Cast range (m)	Depth (m)	Line strength (Lbs)	Type	Colour

RH REAL HOPPER

Recommended by Sean "Mister Finesse" Perez, pro angler and fishing journalist

This wobbler is a true imitation of a grasshopper as the name suggests. It perfectly lures predators when lead close to or streaking the water surface. This model shows all its effectiveness from spring to early autumn.

Model	Art. no	Length (mm)	Weight (g)	Cast range (m)	Depth (m)	Line strength (Lbs)	Type	Colour
RH 37 S	324 025 xxx	37	2,0	15	0,1-0,5	4-8	sinking	030, 031, 032, 033

PB POWER BUG

Power Bug, just like Real Hopper, is the most effective in the spring and summer period when the fish feed heavily on insects. Streaking the wobbler together with light pulls of the tip will let you to hunt for the most cautious chubs and ides. The colours and its performance truly imitate the most common insects on the water.

Model	Art. no	Length (mm)	Weight (g)	Cast range (m)	Depth (m)	Line strength (Lbs)	Type	Colour

TC TRICKY CRANK

The shallowly descending version of an excellent wobbler enabling to fish the shallow and overflowed spur ends and flooded meadows. It will perform well at river reefs during the luring of asps as they attack the baitfish. The irregular retrieve greatly increases the number of bites.

Model	Art. no	Length (mm)	Weight (g)	Cast range (m)	Depth (m)	Line strength (Lbs)	Type	Colour
TC 32 F	324 033 xxx	32	2,0	15	0,4-1,2	4-6	floating	004, 063

MM

MINI MINNOW

This mini lure was designed for fishing cautious fish. It's a very good lure for chubs and ices but viciously attacked by large perches as well. Our testers highly rated this model. Give it a try – you will not regret.

Model	Art. no	Length (mm)	Weight (g)	Cast range (m)	Depth (m)	Line strength (Lbs)	Type	Colour
MM 25 S	323 071 xxx	25	2,5	15	0,2-1,2	4-6	sinking	001, 004, 008, 011, 015, 018

BLC

BULL CRANK

A jointed lure with strong action, well-provoking most freshwater predators. Performs well in places where slower retrieving of a lure is required.

Model	Art. no	Length (mm)	Weight (g)	Cast range (m)	Depth (m)	Line strength (Lbs)	Type	Colour
BLC 60 F	323 021 xxx	60	13,5	30	0,5-1,8	10-20	floating	004, 058, 062

BC

BEEBLE CRANK

This barrel presented itself well to many fish during tests. It was successfully attacked by pikes, perches and large chubs. The lure's compact size and proper weight lets you cast for long distances.

Model	Art. no	Length (mm)	Weight (g)	Cast range (m)	Depth (m)	Line strength (Lbs)	Type	Colour
BC 45 F	323 041 xxx	45	6,5	20	0,1-0,5	6-15	floating	004, 015, 018, 058, 062

SCK

SNAPPY CRANK

The puffy body and strong action as well as the durable treble hooks are the basic advantages of this wobbler. There are six, carefully selected colours to choose from, which perfectly lure predators. It holds to water without tripping even in a very strong current due to the special lip and shape of the body.

Model	Art. no	Length (mm)	Weight (g)	Cast range (m)	Depth (m)	Line strength (Lbs)	Type	Colour
SCK 52 F	324 046 xxx	52	8	20	1,2-2,0	6-12	floating	001, 004, 014, 015, 047, 054

FCK FAT CRANK

A great wobbler, recommended for classical spinning and hand trolling. It easily lures pikes, catfish, perches and overgrown zanders. The wobbler's strong action is well felt at the rod and enhances the recognition of bites.

Model	Art. no	Length (mm)	Weight (g)	Cast range (m)	Depth (m)	Line strength (Lbs)	Type	Colour

HOLLOW FROG

Spotted Tiger 339 000 001

Brownie 339 000 002

Pumpkin 339 000 003

A special task lure. It is perfect for those places where it is impossible to fish even with an snag-free or offset lure. Submerged, underwater grass beds or reeds are virtually always a place of residence for predators. Hollow Frog retrieved with a small, "froggy" movements on the water surface, can effectively provoke pike, perch, or river trout and chub to strike. However, if the frog is to be used in open, clean water, we have provided it with a fixed eye to add the stinger to increase its hook up ratio.

Model	Art. no	Length (mm)	Weight (g)	Cast range (m)	Depth (m)	Line strength (Lbs)	Type	Colour

Spoons became one of most often used artificial lures when it comes to catch rainbow trout. Correct shape, weight and size of this lure is the effect of experience and knowledge of our pro staff. We have invested a lots of effort to make this Trout Spoon basically an ultimate trout magnet. To be honest, not only trouts love this lure. Very often catches were chubs, ides and decent sized perches. Top quality Kamatsu split rings and hook, as well as 8 selected colors fulfill the rest, making our spoons efficient in any conditions.

TWIST TAIL

They say: leave well alone. People, basically, love to say such claptrap. Times are changing, nobody now is using monochromatic TVs, steam powered trains aren't running along the rails. Old and rusted schemes are being replaced by fresh, new ideas. This affects fishing too, of course. Everybody want to catch bigger fish, and catch them more often. We take a closer look to a classic, inline spinner. Twist Tail is a natural step of spinner blade evolution. We have solved few problems which are common among spinners, and add a few improvements much wanted by modern anglers. Twist Tail doesn't twist line, casts further, and works simply amazing when it's falling free. Those features make it catchy as hell!
