KONGER®
FISHING EXPERT

Templar HDC

HIGH DENSITY CARBON

We present a series of rods designed for the most demanding anglers, in other words for all finishing enthusiasts, who know how to take advantages of great equipment on their road to success. The Templar series includes a one-of-a-kind top-quality spinning rods made using HDC (High Density Carbon) technology. Its main purpose is to minimize the use of resins bonding highdensity carbon mats. Thanks to this technology, we have obtained blanks of extremely small diameters, while at the same time being light, flexible and resistant to overloads. The rods have been equipped with the highest quality components manufactured by global companies, such as Fuji SiC Titanium guides or Portuguese AAA cork grips. A soft velvet sleeve and exclusive tube protecting the rod during transport are added to all Templar rods.

Templar HDC Coliber Jig

Templar HDC Razor Blade

Templar HDC Steel Arm

Templar HDC Coliber Jig

Precision starts small. The Templar HDC Coliber Jig is crafted for the most delicate applications in perch and trout fishing. Its solid tip enhances bite detection and jig control at ultra-light levels. Built on a 2-section Toray blank with High Density Core (HDC) technology, it combines sensitivity with strength. Outfitted with Fuji Titanium SiC K-Type guides and a Fuji VSS reel seat, it ensures flawless line flow and control. Finished with an AAA-grade Portuguese cork handle and delivered in a stiff protective tube with a carrying strap – this is your refined finesse tool.

Templar HDC	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Coliber Jig 215/5	120 001 215	215	1-5	92	112	2

solid tip

Templar HDC Razor Blade

Edge and power combined. Designed with asp, large trout, and chub in mind, the Razor Blade balances casting performance with precision lure work. Its longer build and tubular tip are perfect for sweeping casts over large rivers. Featuring Toray HDC construction, Fuji Titanium SiC K-Type guides, and a Fuji VSS reel seat, it offers crisp responsiveness with enough backbone for aggressive fish. The AAA Portuguese cork handle provides control and comfort, while a stiff case with strap protects your rod between the trips.

Templar HDC	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Razor Blade 274/21	120 004 270	274	6-21	132	139	2

Templar HDC Steel Arm

Strength with sensitivity. The Steel Arm is available in two lengths, both tuned for heavier predators like pike, zander, and asp. The tubular tip delivers decisive hooksets and confident lure control. Built on the robust yet refined Toray HDC blank, equipped with Fuji K-Type Titanium SiC guides and a secure Fuji VSS reel seat, it offers power and precision in every cast. The AAA cork handle ensures a firm grip, and a rigid travel tube keeps your gear protected wherever your next strike awaits.

Templar HDC	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Steel Arm 274/28	120 005 270	274	7-28	148	139	2

KONGER®
FISHING EXPERT

Templar CX

Fishing rods characterized by unusual action, made of increased flexibility high-module graphite. Nano-Carbon technology allowed creating blanks with excellent parameters. Its innovative engineering design includes enhancement of signals coming from the tip (thanks to the special grip). We have combined great action, sensitivity of the tip and unbelievable power with an attractive look. They have been fit with a Fuji reel seat and special Fuji Alconite K-series tangle free guides. Needless to say, these rods have gathered 100% positive views. The offer includes both hypersensitive rods for ”ultra-light” lovers and classical rods for pike/zander fishing. In the presented family, any demanding spin fisherman will find his or her desired rod.

ALCONITE GUIDE

Templar CX Thekilla

Templar CX Perch

Templar CX Speed Devil

Templar CX Thekilla

A rod for sophisticated perch hunters with a very sensitive tip. The action of this rod has been determined as ”quick, yet slightly becoming parabolic during retrieving, excellent for huge perch, as it does not tear their delicate mouths”. Nothing is impossible for this rod. Even though it is intended to fish with small baits, it will manage any unexpected catch in the form of a beautiful pike.

Templar CX	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Thekilla 240/10	103 002 240	240	1-10	123	125	2
Thekilla 270/10	103 002 270	270	1-10	135	140	2

Templar CX Perch

Rods for enthusiasts of light fishing with small baits. It does not mean, however, that they are delicate: we know that they are excellent for dealing with large zanders. A sensitive tip allows for observation of gentle bites, which is important in terms of light jigging. The very low weight and comfortable grip will allow for long spin fishing sessions without any feeling hand fatigue.

Templar CX	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Perch 200/12	103 001 200	200	2-12	111	104	2
Perch 225/12	103 001 225	225	2-12	120	117	2

Templar CX Speed Devil

Casting weight up to 21 g, the two most popular lengths to choose from and great action give a chance to show off in almost any water. Regardless of whether it is a small trout stream or a large lowland river, these rods have gathered splendid opinions from our testers. Fast, tip action in combination with excellent operating parameters classify this rod as the favourite one that is taken the most often to fishing spots.

Templar CX	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Speed Devil 240/21	103 003 240	240	5-21	141	125	2
Speed Devil 270/21	103 003 270	270	5-21	157	140	2

Templar CX Black Rider

Templar CX Hard Blade

Templar CX Full Contact

Templar CX Single Warrior

Templar CX Black Rider

All-round rods intended for the largest group of spin fishermen, expecting that literally "everything" can bite. Undoubtedly, these rods will capture your hearts from the very first moment. The comfortable, secure grip is ensured by top-quality Portuguese cork. The very good tip action is possible due to pressed at 70 million psi carbon. They are superb for river fishing with the use of medium-size wobblers, soft baits or spoons.

Templar CX	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Black Rider 240/28	103 004 240	240	7-28	148	127	2
Black Rider 270/28	103 004 270	270	7-28	164	140	2
Black Rider 300/28	103 004 300	300	7-28	182	156	2

Templar CX Hard Blade

We have prepared a considerable treat for fishermen looking for sturdy pikes, preferring to fish with classical baits. Outstanding power during reeling a fish in will allow you without any stress to take on the biggest spotted predators. They will also perfectly deal with asp fishing on distant reefs. "Simply excellent" - this opinion speaks for itself. Try it and you will not want to use any other rod.

Templar CX	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Hard Blade 275/35	103 005 275	275	10-35	174	143	2
Hard Blade 305/35	103 005 305	305	10-35	208	158	2

Templar CX Full Contact

Jigging has gained the reputation as one of the most efficient predator fishing techniques. We have prepared something special both for enthusiasts of this method and those, who want to try this spinning field. Thanks to a sensitive tip, the rod will indicate even the most delicate bite. This unique technological solution has allowed introducing into our offer a very interesting construction. This rod has tip action, yet consists of a uniform blank, eliminating the rigid section at the connection of the blank with the tip.

Templar CX	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Full Contact 255/28	103 006 255	255	7-28	166	133	2

Full Contact 255/35	103 008 285	285	10-35	181	148	2

Templar CX Single Warrior

A one-piece blank made of high module carbon combined with Fuji components has given a more than excellent result. This rod is the perfect tool that allows perceiving even the slightest shakes when leading the bait and increase the number of successful hook settings. The blank is extremely fast and allows for fishing with jigs, silicone baits and using the drop shot technique.

Templar CX	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements

KONGER®
FISHING EXPERT

ALBION
VHM Carbon

A high-end, stylish series of rods designed specifically for aficionados hooked on non-predatory fish fishing. We place in your hands rods with classical finishing, worked out to the slightest detail and manufactured from the highest quality materials. The blanks' structure has been based on VHM carbon with IM 9 flexural modulus, characterized by maximum strength and minimum empty weight. All Albion rods are standardly provided with SiC guides and Portuguese AAA cork grip fit with a Fuji seat. Combined with thorough quality control in all production stages, these components cause that Albion rods ensure outstanding action, power and overload resistance. All rods are protected by a high-class velvet sleeve. The Albion series is associated not only with the highest operating parameters, but also unquestionable aesthetic advantages, giving owners of this top-quality fishing tackle additional satisfaction.

Albion Pole

Albion Bolognese

Albion Pole

Albion Pole is a series of poles designed for the most demanding competitive anglers and match fishing enthusiasts. The blanks are built from high-density carbon compressed under 40 tons of pressure, resulting in an exceptionally fast tip action and extremely low weight. The Albion Pole 700 weighs just 250 grams, making it one of the lightest poles in its class and ensuring unmatched comfort during prolonged fishing sessions. Additionally, the butt section—most prone to overload—features a reinforced high-hardness carbon wrap that effectively prevents crushing and mechanical damage.

Albion Bolognese

Albion Bolognese represents a new standard among rods dedicated to the Bolognese technique—a method that proves effective where others fail. The rods are constructed from IM9 high-modulus carbon, with a design based on HDC (High Density Compression) technology. Thanks to the special treatment of the carbon sheets, these rods offer exceptional lightness and a fast tip action. The Albion Bolognese 700 weighs only 287 grams, allowing comfortable operation of the rig for many hours. The rod is fitted with Fuji SiC guides, which not only enhance casting smoothness but also increase durability and reduce line friction. Albion Bolognese is the choice for anglers who value precision, lightness, and top-tier craftsmanship.

Bolognese 800/30	132 001 800	780	30	380	154	8

Albion Feeder

Albion Method Feeder

Albion Feeder

Albion Feeder is a series of light, responsive feeder rods designed to meet the rapidly growing popularity of this angling method. Built on high-modulus graphite blanks, these rods offer excellent casting load and progressive bend under pressure, while maintaining versatile performance across a wide range of fishing scenarios—from canals and rivers to commercial fisheries. Each model comes equipped with three interchangeable carbon tips featuring different bending curves, allowing anglers to adapt to various fishing conditions and rig weights. The blanks are fitted with Fuji SiC guides for improved line flow and enhanced mechanical durability, as well as a Fuji DPS reel seat for maximum stability. The butt section of every model is finished with AAA-grade Portuguese cork, ensuring comfort, elegance, and long-lasting performance, even during intensive use.

Albion	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Feeder 360/120	132 004 360	360	120	206	127	3+3
Feeder 390/120	132 004 390	390	120	241	137	3+3
Feeder 360/150	132 005 360	360	150	275	127	3+3

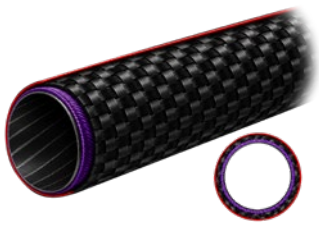

Albion Method Feeder

Albion Method Feeder – Designed for the most demanding feeder anglers, Albion Method Feeder rods are the result of using advanced 36T and 40T graphite blanks, reinforced with Cross-Wrap technology—a cross-woven carbon tape wrap that enhances blank resistance to overload while maintaining full control during fights with powerful fish. These two-piece rods are equipped with Fuji DPS reel seats, Fuji SiC guides in a modern K-type layout to minimize tangles and improve casting performance, and durable handles made from AAA Portuguese cork and EVA foam. Each model comes with three interchangeable carbon quiver tips with different test curves, allowing optimal adjustment to a wide range of fishing conditions. Additionally, a specially designed tip coating pattern improves bite visibility under any lighting. The set is completed by a premium neoprene carry case with a dedicated pocket for the tip tube.

HELICAL CARBON MATRIX TURION PRO

The Turion PRO rod series redefines the standards of modern blank design. Our development team has created a line of advanced rods that impress with their craftsmanship the very moment you pick them up. The blanks are engineered using C 30T carbon mats with a minimized resin content. The result? An incredibly fast, crisp action and lightning-quick recovery immediately after the cast. The entire series boasts superb balance, ensuring that hours of continuous rod handling and intensive fishing won't cause the slightest arm fatigue. Most importantly, the tip sections offer perfect stability, completely eliminating the annoying "wobble" so common in other rods of this class. These rods provide total control over your rig and allow you to react to bites with absolute precision.

Turion Pro Pole

Turion Pro Bolognese

NEW!

Turion PRO Pole

The Turion PRO Pole whips are pure engineering masterpieces. They are so light and perfectly balanced that they feel like a feather in your hand, rather than a multi-meter rod. Forget about slow action or blank wobble – after a swing, the rod recovers instantly, snapping straight back into line. The tip does not sag under its own weight even by a single centimeter. This translates into an immediate, precise hookset on every single touch of the float, no matter how delicate. The ultra-slim blank minimizes wind resistance, making it effortless to handle the rod in strong crosswinds that would normally tear it from your grip. For fast-paced, high-intensity fishing, these whips are simply second to none.

Turion PRO	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements

Pole 800	150 101 800	785	25	307	132	8

NEW!

Turion PRO Bolognese

Turion PRO Bolognese rods are purposely built for river rapids and deep runs. Their remarkably crisp action ensures that setting the hook from a distance – even in a heavy current – becomes a mere formality. The slim blanks, optimized by reducing excess resin, guarantee repeatable, pinpoint casts and absolute control over your drifting rig. Perfect balance relieves wrist strain when holding the rod up for hours on end. On a taut line, you will feel every single nibble, while the progressive bend beautifully cushions the violent runs of fish fighting in the current. At the same time, the rod packs enough backbone to ensure that even a powerful river barbel won't pose a serious threat.

Turion PRO	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Bolognese 500	150 102 500	489	25	180	139	5

Bolognese 700	150 102 700	687	25	286	141	7

A family of fishing rods for big game and pelagic fishing lovers. The super-strong, reinforced blanks, Fuji components and tasteful design – these are the first observations brought to mind after contact with the Saltexes. It is still hardly known in our country, although the very efficient popping and jigging methods are at the forefront in oceans around the world. The Saltexes are fishing rods that allow squaring up with any water opponent. They have been designed to deal with fishing of oceanic (pelagic) fish, incomparably stronger than the majority of sea specimen. We also recommend Blue Ocean and Red Sea series for those spin fishermen who catch European catfish.

COMPONENTS Fuji

ALCONITE GUIDE

Saltex Blue Ocean

In short: the perfect rods for "old troupers" of sea fishing. These rods have been intended for catching combative fish, are resistant to overloads while retrieving a big popper, being attacked by a tuna and struggling with a huge catfish. What is more, we recommend it for the recently popular halibut spin fishing on flat, sunken hills in the Norwegian fjords.

Saltex	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Blue Ocean 259/120	151 001 258	259	120	420	188	2
Blue Ocean 259/160	151 002 258	259	160	428	188	2

Saltex Red Sea

Saltex Vertical Jig

Saltex Sea Bass

Saltex Red Sea

Halibut, saithe, cod, pollock, caranx or wahoo - this rod can easily handle with them all. The Red Sea fears no fish. The same applies to the size of the fish you fight with. Fishing with this rod, cods weighing up to 5 kg were lobbed into the cutter. Its power is simply enormous. Fishermen searching for catfish with spinning rods should pay particular attention to this model.

Saltex	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Red Sea 259/110	151 002 259	259	110	390	187	2
Red Sea 259/140	151 003 259	259	140	395	187	2

Saltex Vertical Jig

A one-piece rod, with the length facilitating the attractive presentation of the lure, dense arrangement of the guides and solid reel seat is just a brief description of a jigging rod, perfectly reflecting the features of our Vertical Jig. Considerable power with maintaining proper action of the rod suitable for pilkers will allow for successful and comfortable reeling in huge fish from great depths. This model will even help amateurs show competitors how to fish.

Saltex	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Vertical Jig 168/200-400	151 005 171	168	200-400	351	168	1

Saltex Sea Bass

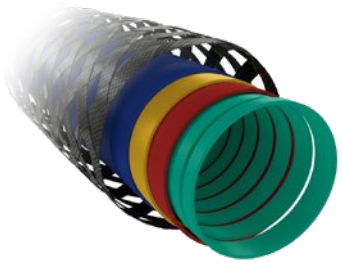

This range of fishing rods can be used in two ways – as a gear for light, finesse jigging or as a heavy spinning rod for fishing off the beach. The cast length that can be performed with these rods is really impressive. Thanks to the Fuji components, you can be sure of their high reliability and comfort in use. The spigot connections enabled to avoid the rigidness of the blanks and helped to evenly distribute the pressure along their whole length. We recommend the Sea Bass series for fishing the cod, sea trout or salmon as well as the sea bass.

Saltex	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Sea Bass 2852-100	151 006 285	285	40-100	328	147	2

KONGER®
FISHING EXPERT

STREETO AIR
NANOCARBON CORE TECHNOLOGY

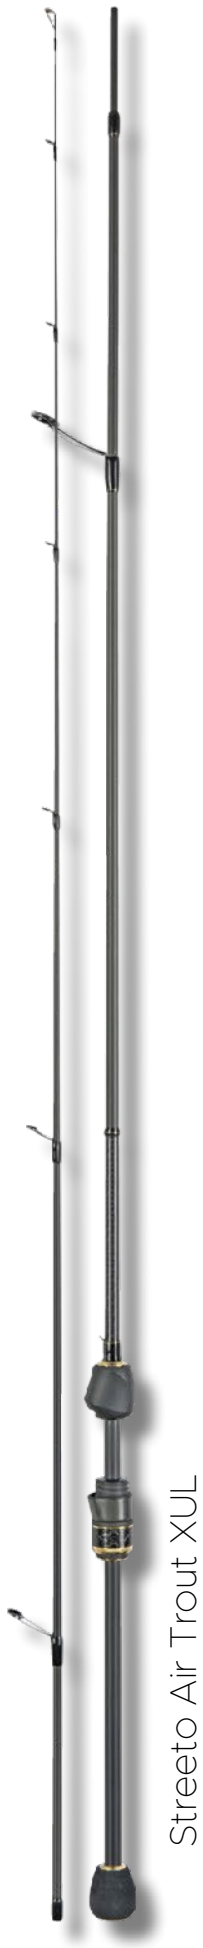

Many companies on the market have tried to develop ultra-light but at the same time strong spinning rods. Up to now nobody has managed it. But thanks to the Streeto Air series, we can proudly state – it is possible! The lightest rod in this range weighs only 56 g, the “heaviest” – the whole 71 g. Smooth action with nice bend is guaranteed by the spigot joints, strengthen with a special tape made of woven carbon. To make them even better, the blanks have the hex-wrap placed in the spots prone to the highest pressures. Worth mentioning are also the Fuji reel-seat and the guides with the minimized weight of the rings.

COMPONENTS Fuji

Streeto Air Trout XUL

Streeto Air XUL

Streeto Air UL

Streeto Air L

Streeto Air Trout XUL

A modern, ultralight spinning rod designed for finesse trout fishing with micro lures. The rod's moderate (mid) bend effectively absorbs fish runs and minimizes the risk of hook pulls during the fight. A key construction element is the spigot joint reinforced with hex-wrap carbon tape, which ensures smooth, progressive action without dead spots. Outfitted with ultra-lightweight Sea Guide guides and a Fuji SK2 reel seat, the rod achieves an extremely low overall weight without sacrificing performance.

Streeto Air	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Trout XUL 1982	158 004 198	198	0,5-5	66	101	2

Streeto Air XUL

Extremely lightweight and responsive, this rod is optimized for lures up to 7 g. Perfect for precise animations of micro jigs, small crankbaits and spinners. Despite its finesse build, the blank provides full lure control and excellent bite detection. The spigot joint reinforced with braided carbon tape ensures seamless action, while Sea Guide lightweight guides and the Fuji SK2 reel seat contribute to a perfectly balanced ultralight setup.

Streeto Air	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
XUL 1902	158 001 190	190	0,6-7	56	98	2
XUL 2102	158 001 210	210	1-7	63	110	2

Streeto Air UL

A rod that blends ultralight design with increased power reserve, ideal for lures up to 10 g. The sensitive tip enables visual detection of subtle bites and excellent lure handling. Reinforced with a hex-wrap carbon weave over a spigot joint, it delivers smooth, progressive action with zero stiffness. Equipped with lightweight Sea Guide SiC guides and a Fuji SK2 reel seat, this model is a technical angler's choice for perch and trout fishing.

Streeto Air	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
UL 1982	158 002 198	198	2-10	60	102	2
UL 2202	158 002 220	220	3-10	71	115	2

Streeto Air L

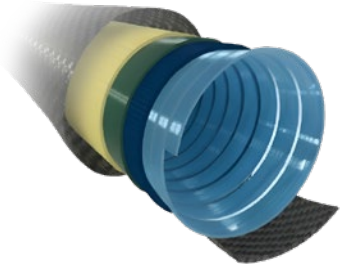

The most powerful model in the Streeto Air lineup, built for perch and as a lightweight alternative for zander. The high-modulus blank offers excellent feedback, transmitting every underwater signal straight to the angler's hand. Despite its strength, it maintains the series' ultralight character. The spigot joint reinforced with braided carbon improves flex and structural integrity. Outfitted with lightweight Sea Guide SiC guides and the Fuji SK2 reel seat, it provides outstanding comfort whether fishing from shore or boat.

KONGER®
FISHING EXPERT

STREETO
NANOCARBON CORE TECHNOLOGY

This range of high quality spinning rods with maximally reduced weight was designed for those who demand from their fishing gear the utmost performance. Thanks to the minimized quantity of the epoxy resin used for joining of the carbon mats we managed to achieve highly dynamic, fast and sensitive rods. In order to bring down the rods' weight we decide not to fit them with a full-cork handle and SiC guides, but to use instead SKSS handles, guides with lightweight rings and characteristic split handle made of carbon and EVA. The qualities of the blanks enable you to animate the lure the way you want it and to feel even the most delicate bite.

COMPONENTS Fuji

Streeto XUL

Streeto UL

Streeto L

Streeto XUL

The most delicate model in the Streeto series, tailored for fishing with micro jigs, 00–1 size spinners, and small soft baits. The fast-action, ultra-light blank allows accurate long-distance casting of the tiniest lures. Reinforced with hex-wrap technology and paired with lightweight components, the rod delivers exceptional fluidity and responsiveness. Equipped with a Fuji SKSS reel seat, EVA foam butt section, and a split grip crafted from woven carbon.

Streeto	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
XUL 1982	156 001 198	198	0,5-6	92	102	2

Streeto UL

Featuring a slightly stronger blank, this model is recommended for targeting large perch, chub and trout. Its 2 m length and fast tip action allow dynamic, accurate casts over long distances. It works well with small crankbaits, blade baits, and soft lures with spinning tails. Retaining the visual identity of the Streeto series, the rod features a spigot joint, Fuji SKSS reel seat, EVA inserts, and a split carbon grip.

Streeto	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
UL 2002	156 002 200	200	2-9	110	104	2
UL 2202	156 002 220	220	2-10	116	114	2

Streeto L

A versatile spinning rod for casting light jigs and crankbaits, starting from 4 g. Ideal for deeper lakes, mid- sized rivers, and canals. The blank delivers impressive sensitivity and solid power reserve. Thanks to advanced materials and design, the L series offers a well-balanced compromise between finesse and strength, making it a top pick for both pros and advanced amateurs. Outfitted with a Fuji SKSS reel seat, EVA details on the butt, and a split carbon handle.

Streeto	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
L 2101	156 009 210	210	3-15	93	210	1

Streeto M

Streeto Pike LL

Streeto Caster Uptide H

Streeto M

The most powerful rod in the modern Streeto spinning series. Designed to handle everything from trout to pike with lures in the 5–18 g range. The responsive blank enables firm hooksets even at long distances. The spigot joint ensures smooth action under load, while high-end finishes offer top-tier comfort. Features include a Fuji SKSS reel seat, split carbon handle, and EVA butt insert.

Streeto	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
M 2202	156 004 220	228	7-26	111	114	2
M 2382	156 004 238	238	8-28	128	124	2

Streeto Pike LL

A dedicated pike rod designed for large lures ranging from several to over 30 cm in length. Despite its power, the blank maintains fluid action, enhancing casting comfort and retrieval control. The extended butt section aids in casting and lure manipulation. Streeto Pike LL is a precision tool built for experienced pike anglers. Outfitted with a Fuji SKSS reel seat, EVA foam butt grip, and a split woven carbon handle.

Streeto	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Pike LL 2412	156 010 240	241	56-112	265	126	2
Pike LL 2592	156 010 252	259	56-112	279	134	2

Streeto Caster Uptide H

A casting model developed for heavy lures and big fish. The action mimics that of one-piece rods— responsive and powerful from the first cast. Despite its extended length, it maintains a compact transport size. One of the best casting options for pike on the market. Features a Fuji SKSS reel seat, EVA foam inserts on the butt, and a split woven carbon grip.

Streeto Caster	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements

Streeto Horizon

Streeto Pelagic

Streeto Twitch M Portable

Streeto Horizon

A series designed for urban shore fishing, available in Medium (up to 28 g) and Heavy (up to 42 g) versions. These models offer superb lure control, long-distance casting, and reliable hook-setting power. With hex-wrap reinforcements and advanced blank construction, they can handle larger fish with ease. Available in 260 cm and 285 cm lengths—perfect for river and canal fishing. Equipped with Fuji SKSS reel seats, EVA butt inserts, and carbon split grips.

Streeto Horizon	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Medium 260/8-28	156 012 260	260	8-28	145	134	2

Streeto Pelagic

Rods designed specifically for targeting mid-water predators from a boat using larger lures. Perfectly suited for active fishing with a sonar in Live mode, these models rated for casting weights up to 60 g and 90 g deliver the power, control, and quick response needed to handle trophy-sized fish. Their compact 195 cm length ensures excellent maneuverability, while advanced technology keeps them lightweight and reliable in all conditions. Each rod features a Fuji SKSS reel seat, EVA elements on the butt section, and a split handle made of woven carbon for enhanced sensitivity and modern ergonomics.

Streeto Pelagic	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements

FRONT DRAG FD

BALL BEARINGS 8+1

8 ball bearings + 1 anti-reverse bearing ■ handle screwed in the main gear ■ shallow spool ■ lightweight construction ■ precision front drag system

Discover a new dimension of finesse angling with our latest reels – Streeto Area, designed specifically for the precise demands of Trout Area fishing and ultralight presentations targeting “white predators” like rudd and crucian carp. Featuring a shallow spool and a screw-in handle that connects directly to the main gear, these reels deliver exceptional sensitivity and mechanical reliability in a compact form factor. The combination of a lightweight yet durable body, shallow spool, and fine- tuned front drag system allows seamless handling of even the thinnest lines. Smooth operation and refined internal gearing make Streeto Area a dependable companion for pursuing wary fish with finesse-based techniques. Whether you're casting micro spoons on a commercial trout lake or working ultra-light jigs through a crystal-clear stream, Streeto Area gives you the control and precision you deserve.

FRONT DRAG FD

BALL BEARINGS 8+1

8 ball bearings, 1 anti-reverse bearing ■ multi-disc front drag ■ metal body ■graphite rotor ■ handle screwed in the main gear ■ right/left inter-changeable handle ■ aluminum shallow main spool ■ aluminum CNC handle

This reel is designed specifically for modern spinning techniques and is equipped with 8 ball bearings and one roller bearing. The precise front multidisc drag system is protected against dust and moisture, ensuring enhanced braking power and a broad, reliable range of adjustment. Its metal body provides solid support for the gear bearings and durability, effectively protecting the internal mechanisms from damage. The graphite rotor adds lightness, eliminating vibrations during line retrieval and enhancing overall comfort. The handle, screwed directly into the drive gear, makes these reels exceptionally strong. Additionally, the handle can be mounted on either the left or right side, allowing customization to the angler’s preferences. The aluminum shallow spool and CNC aluminum handle ensure stability and durability, minimizing the risk of deformation during intensive use. This versatile and robust reel will undoubtedly meet the expectations of even the most demanding predator anglers.

Streeto Fighter Finesse x8 is an innovative braided fishing line designed for demanding anglers who prefer ultra-light spinning techniques. It excels in targeting perch, trout, chub, and ide, delivering unmatched casting precision and range. The braid is coated with a special smooth finish that minimizes friction, resulting in longer and more accurate casts, even with lightweight lures. Its dense eight-strand PE fibers, crafted from premium materials, ensures impressive tensile strength and exceptional resistance to abrasion and mechanical damage, even in harsh conditions.

KONGER®
FISHING EXPERT

Vectron
CROSS CARBON

We have created the Vectron series with the needs of anglers fishing in waters of various specifications in mind. It includes both rods for light fishing, which are characterized by high finesse, and stronger models, which guarantee a reliable fight for big predators. This series is characterised by classic blank aesthetics and a carbon fibre tape wrapping, which provides a backup of power in the bottom, so often needed when it comes to reeling larger fish. No matter which of these rods we reach for, we can be sure that we are dealing with equipment designed and produced on the basis of numerous valuable thoughts and suggestions of anglers - experts from Poland and abroad. We have a choice of equipment dedicated to specific species of fish, fishing methods, travel with a very practical casting range, as well as a few other rods that can be used universally.

COMPONENTS Fuji

Vectron Chub Master

Vectron Ferox Fury

Vectron Travel

Vectron Chub Master

Specifically designed for precision chub fishing in challenging conditions. The Vectron Chub Master offers three meters of pure casting efficiency, allowing you to send light lures a long way with confidence. Its slim and responsive Cross Carbon blank, paired with lightweight Fuji Concept O guides, ensures excellent lure control and casting accuracy. The ergonomic reel seat delivers a secure grip, especially during subtle lure manipulation in shallow waters. A top choice for anglers targeting chub and ide in both large rivers and narrow streams.

Vectron	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Chub Master 300/3-12	166 001 300	300	3-12	129	155	2

Vectron Ferox Fury

Made for anglers who chase trophy trout without compromise. Vectron Ferox Fury is a two-model series rated for casting weights of up to 12 g and 18 g perfect for fishing heavier lures in strong currents. The fast-action Cross Carbon blank ensures power and responsiveness during the fight, while Fuji Concept O guides and an ergonomic reel seat provide lasting comfort throughout long river sessions. These rods are purpose-built for handling aggressive trout in fast-flowing waters Ferox Fury will rise to the challenge.

Vectron	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Ferox Fury 223/2-12	166 002 223	223	2-12	94	116	2
Ferox Fury 223/3-18	166 003 224	223	3-18	99	116	2

Vectron Travel

When mobility matters, the Vectron Travel is your ideal angling companion. With a four-piece construction and a transport length of just 70 cm, this rod fits easily into a backpack without compromising on performance. The reinforced Cross Carbon blank delivers a crisp balance of sensitivity and stiffness, while Fuji Concept O guides optimize casting precision. The ergonomic reel seat offers all- day comfort, and the versatile casting range makes it suitable for rivers, lakes, or even alpine creeks. A go-to rod for travelling anglers who never miss an opportunity.

Travel 260/8-28	166 004 260	260	8-28	130	70	4

Vectron River Runner

Vectron River Runner Cast

Vectron Trout

Vectron River Runner

Built for river spinning where sensitivity and backbone must work hand in hand. Vectron River Runner offers a wide working rangestarting from just 5 g allowing for accurate presentations of small hardbaits, while still handling medium-sized lures with significant drag in current. The responsive Cross Carbon blank, Fuji Concept O guides, and ergonomic reel seat make this rod a versatile tool for both finesse and power fishing. Ideal for targeting chub, ide, asp, or zander, whether in fast-flowing rivers or lakeside shallows.

Vectron	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
River Runner 232/5-21	166 009 232	232	5-21	105	120	2

River Runner Cast 285/5-26	166 010 285	285	5-26	152	147	2

Vectron Trout

Ultra-light, refined, and crafted with attention to detail. Vectron Trout is a dream rod for modern trout anglers, whether you're chasing wild browns in mountain streams or stocked rainbows in managed waters. Its ultra-sensitive Cross Carbon blank casts lures from just 0.4 g and delivers superb feedback. Outfitted with Fuji Concept O guides, a sleek EVA grip, and cork-rubber finishing touches, this rod feels as good as it looks. Ideal for micro spoons or jig heads in the 0.4–4 g range. A must-have for serious ultralight specialists.

Trout 602 UL	166 013 183	183	0,4-4	73	95	2

Vectron Multitool

Vectron Zander XF

Vectron Apex Predator

Vectron Multitool

When you want one rod to handle multiple techniques, the Vectron Multitool is the answer. This versatile rod strikes a perfect balance between casting reach and controlled fighting power whether you're fishing light lures or midweight crankbaits. The responsive Cross Carbon blank delivers excellent feedback, while Fuji Concept O guides support smooth casting. The ergonomic reel seat ensures day-long comfort. From lakes and rivers to canals, the Multitool adapts to every scenario with ease.

Vectron	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Multitool 274/8-28	166 006 274	274	8-28	132	141	2

Vectron Zander XF

A dedicated rod for serious zander hunters. Vectron Zander XF is engineered for optimal sensitivity and hook-setting precision, with a key feature being its solid carbon tip insert, which ensures unmatched bite detection—essential when fishing for finicky zander. The Cross Carbon blank offers both power and responsiveness, while Fuji Concept O guides and an ergonomic grip make for a highly comfortable and responsive setup. Designed for anglers who demand full control and feedback during every cast and retrieve.

Vectron	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Zander XF 207/8-28	166 007 207	207	8-28	100	108	2

Zander XF 274/10-42	166 008 274	274	10-42	137	141	2

solid tip

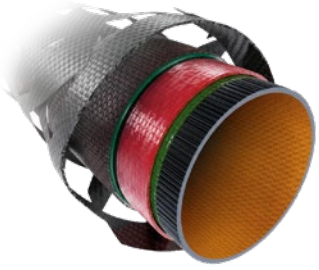

Vectron Apex Predator

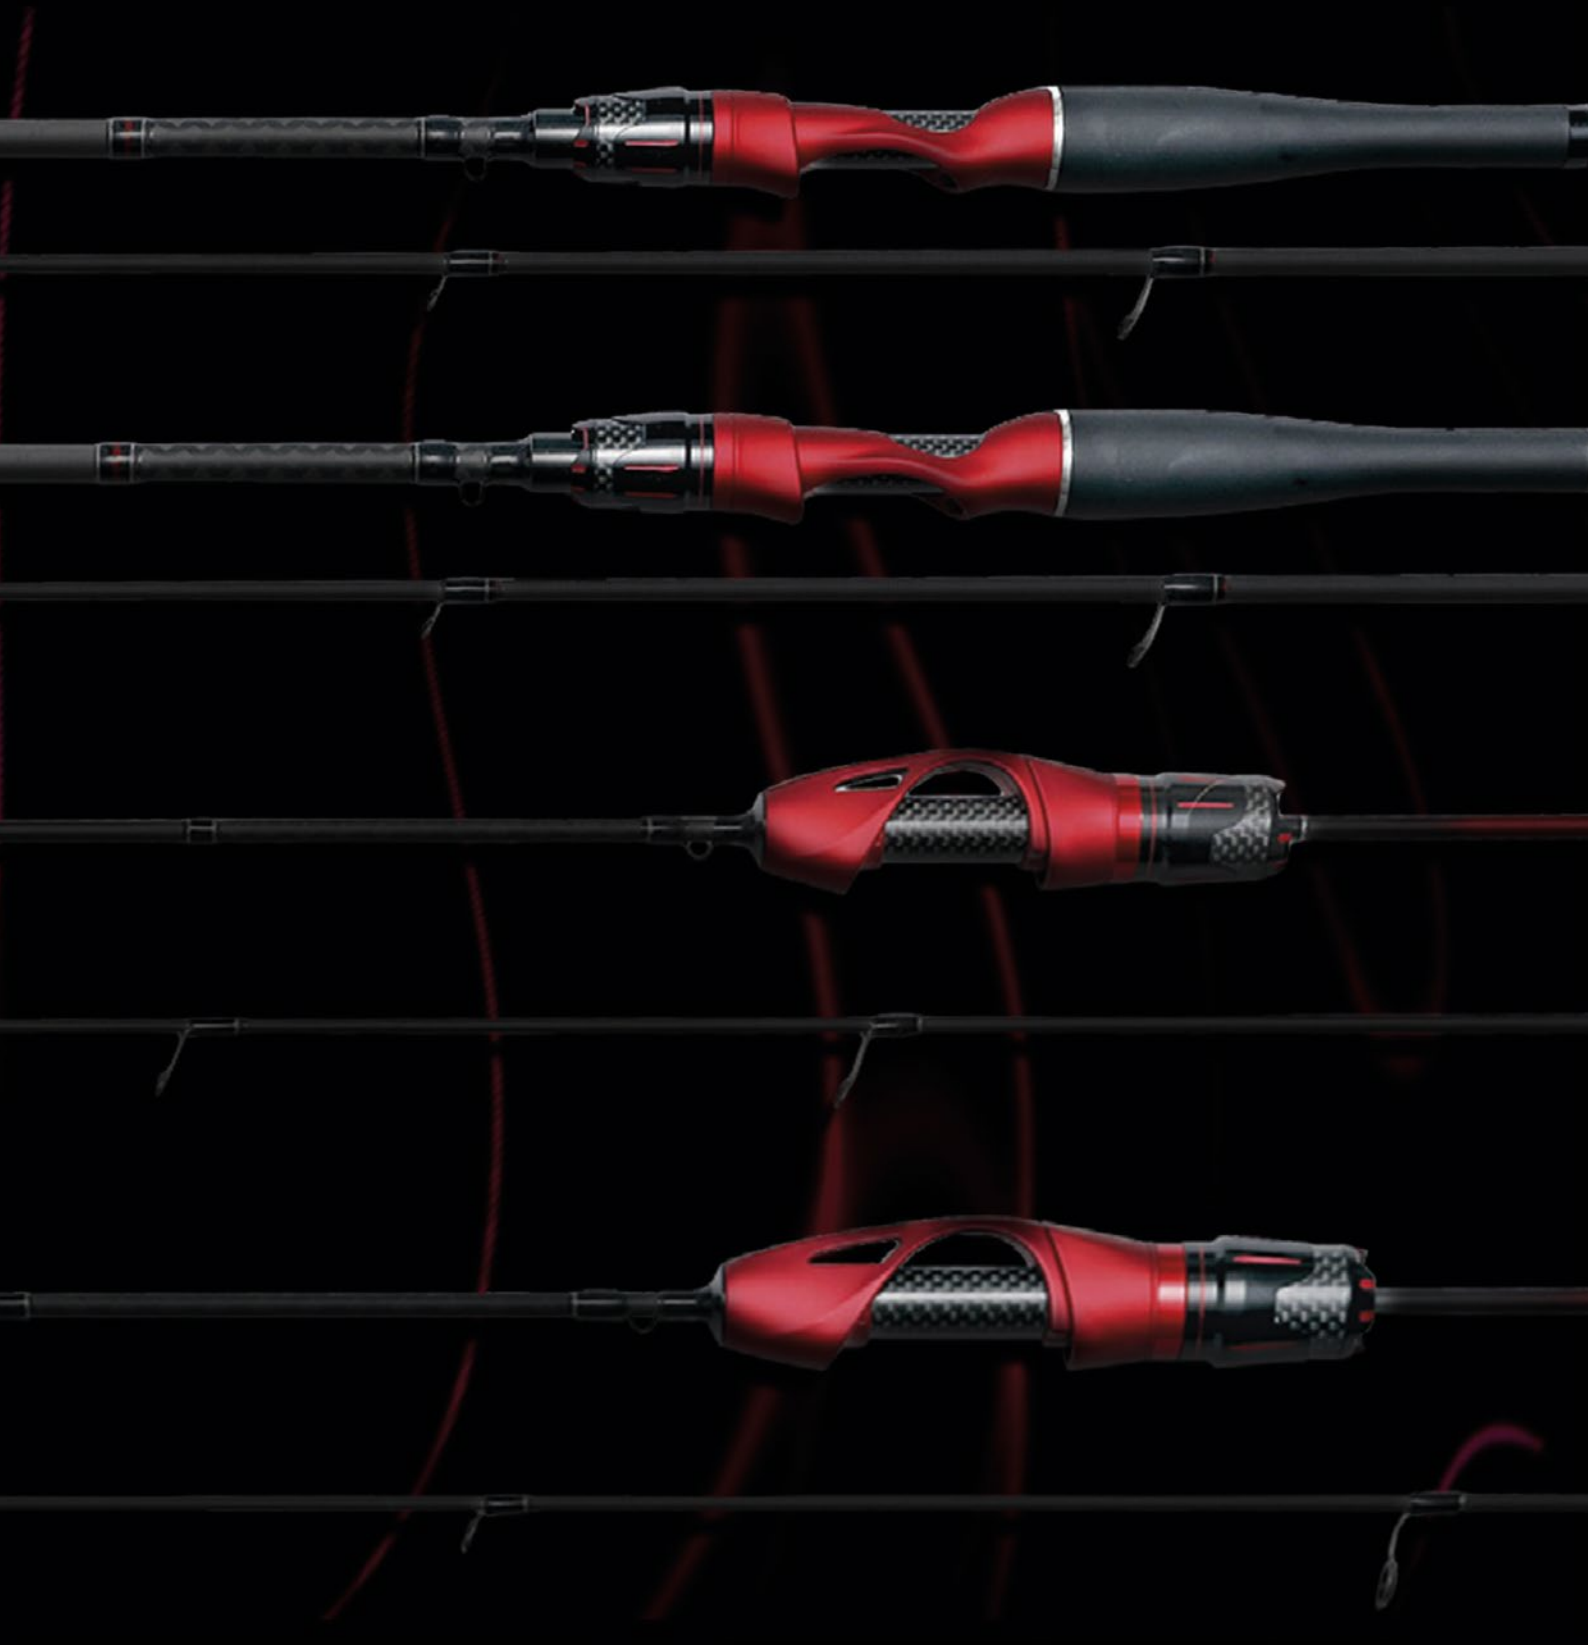

Big predators demand serious gear. Vectron Apex Predator is a heavy-duty rod series tailored for large lures and powerful fish. The reinforced Cross Carbon blank handles high loads with ease while maintaining optimal casting dynamics. Fuji Concept O guides reduce friction, and the ergonomic reel seat ensures comfort even during extended battles. Whether you're targeting monster pike in thick cover or deep-holding zander, this rod delivers the strength and control needed to land true giants.

ULTRIS
ULTRA CARBON

Ultris Rod Family – Perfection in Every Cast! Discover the Ultris rod series, crafted for the most demanding anglers. Whether you're a fan of ultralight spinning or need robust equipment for tackling large pike, Ultris meets the needs of every angler, regardless of their experience or preferences. These rods are distinguished by the highest quality materials, made from premium composites and carbon fiber. Each rod in this series has been designed with meticulous attention to detail. Exceptional sensitivity and comfort come from ergonomic grips and excellent balance, ensuring maximum convenience during use

Ultris Silver Fish

Ultris Finesse Jig

Ultris Stream Fight

Ultris Silver Fish

Ultris Silver Fish rods are designed for ultralight and light spinning, dedicated to precise targeting of small predators in both still and running waters. The classic tip construction ensures excellent sensitivity, allowing you to detect even the most subtle bites. The fast action and perfect balance enable long, accurate casts with lures as light as 0,5g – without compromising control. Ideal for fishing with micro crankbaits, small spinners or light soft lures. The rods are equipped with an ergonomic reel seat that provides direct contact with the blank. SiC guides ensure smooth line flow, high durability, and full compatibility with braided lines.

Ultris	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements

Ultris Finesse Jig

Ultris Finesse Jig rods are purpose-built for technical jigging in deeper waters, offering maximum sensitivity and precision in lure control. Their key feature is a solid tip, which significantly enhances bite detection – even the lightest contacts with fish or bottom structure. Perfect for presenting small lures such as insect larvae imitations, micro soft lures, the smallest jigs, or low-profile twisters. Ideal for targeting trout, chub, ide, and even cautious rudd. The ergonomic reel seat ensures direct blank contact and high handling comfort. SiC guides provide smooth casting and line retrieval, even when using the thinnest monofilament or braided lines.

Ultris	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements

solid tip

Ultris Stream Fight

Ultris Stream Fight – compact, precise medium-power spinning rods. The Ultris Stream Fight pairs perfectly with light lures such as small crankbaits, spinners in classes 1–3, as well as soft baits rigged on heads weighing over 20 grams. It excels in targeting trout, grayling, and perch, offering a blend of exceptional sensitivity and ample power reserve. The ergonomic reel seat design allows direct contact with the blank, enhancing bite detection even with the most delicate presentations. SiC guides ensure smooth line flow and abrasion resistance, even when using thin-diameter fluorocarbon or braided lines.

Ultris	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements

Ultris Versatile Spin

Ultris Pike Light

Ultris Pike Allrounder

Ultris Pike Heavy

Ultris Versatile Spin

Ultris Versatile Spin rods are two-piece, all-around spinning rods with a dynamic action, ideal for anglers looking for a single, reliable model for various techniques and species. Lightweight yet exceptionally durable — they handle well catching asp, zander, pike, or sea trout, whether fishing from the shore of a lake or the current of a large river. The ergonomic reel seat provides a secure grip and comfort during long sessions. SiC guides ensure excellent casting performance and seamless operation with braided lines.

Ultris	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Versatile Spin 240	159 006 240	240	8-35	162	126	2
Versatile Spin 270	159 006 270	270	8-35	176	141	2

Ultris Pike Light. Pike Allrounder. Pike Heavy.

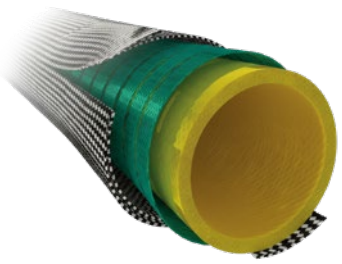

The Ultris Pike series features specialist spinning rods tailored for pike fishing. Lightweight, well- balanced, yet powerful enough to confidently control large predators – whether you're casting or trolling. Outfitted with an ergonomically contoured reel seat that provides direct contact with the blank for superb lure control and bite detection. SiC-ring guides with lightweight, corrosion-resistant frames ensure lasting performance, smooth line flow, and effective heat dissipation – essential when fishing with braid and under heavy load. Available in a range of lengths, actions, and casting weights to suit individual preferences. Ultris Pike rods are the ultimate tool for anglers who demand reliability, control, and premium build quality.

FISHING EXPERT

KASTMASTER
X-TREME CARBON SYSTEM

Wide series of rods for lure fishing enthusiasts. You'll find here everything what demanding angler could be searching for: from ultralight, perch rods, through all-rounders, up to pike oriented models. High quality components combined with reinforced, fast-action blank are going to give you the upper hand over any fish you'll catch. We simply can't give those rods poor finishing. To be more precise, Kastmaster rods are equipped with TVS type reel seat, SiC grade guides, split, hard EVA handle, and an aesthetic, subdued design. We are glad and proud to give you one of the best spin fishing rods available on the market.

Kastmaster Jig Micron

Kastmaster Jig Perch

Kastmaster Jig Drop Shot

Kastmaster Jig Micron

Kastmaster Jig Micron – an ultra-light, two-piece spinning rod featuring a sensitive solid tip, designed specifically for working micro soft baits on jig heads even below 0.5 g. The Kastmaster Micron combines exceptional precision and sensitivity with a strong power reserve in the butt section. The absence of excessive stiffness at the junction between the solid tip and the blank allows for smooth deflection and precise lure control. The rod features a split handle that enhances blank contact and transmits even the most subtle bites. The overall construction is completed with a refined, minimalist finish, durable EVA foam grips, and SiC guides for smooth operation with even the thinnest lines.

Kastmaster Jig	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Micron 198/6	163 001 198	198	0,5-6	87	104	2
Micron 210/6	163 001 210	210	0,5-6	94	110	2
Micron 232/6	163 001 232	232	0,5-6	103	121	2

solid tip

Kastmaster Jig Perch

Kastmaster Jig Perch – a two-piece rod with a solid tip, perfect for perch fishing with both traditional jig heads and the side leader rig. The sensitive tip perfectly transmits even the lightest bites, while the rod's soft action prevents fish from shaking the hook during aggressive fights. The split handle significantly enhances lure feel. The rod combines modern but understated aesthetics with high-quality finishing, EVA foam grips, and SiC guides that ensure durability and smooth line flow, even with fine mono or braid under heavy use.

Kastmaster Jig	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Perch 210/10	163 002 210	210	1-10	97	110	2
Perch 232/10	163 002 232	232	1-10	110	121	2
Perch 259/10	163 002 259	259	1-10	134	134	2

solid tip

Kastmaster Jig Drop Shot

Kastmaster Jig Drop Shot – the result of months of testing and fine-tuning, the Kastmaster Jig Drop Shot is a two-piece rod with a sensitive solid tip, crafted for maximum effectiveness in this finesse technique. Exceptional sensitivity allows for surgical lure control, while the blank's well-matched dynamics make it easy to set the hook on the lightest of bites. A split handle improves tactile feedback, and the ergonomic grip ensures comfort during long fishing sessions. The minimalist, stylish finish is paired with durable EVA foam in the butt section and SiC guides that perform seamlessly with thin lines or braid.

Kastmaster Jig	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Drop Shot 232/18	163 003 232	232	3-18	110	121	2
Drop Shot 244/18	163 003 244	244	3-18	118	127	2

solid tip

Kastmaster Jig Zander Pro

Kastmaster Spin UL

Kastmaster Spin L

Kastmaster Jig Zander Pro

Kastmaster Jig Zander Pro – specifically designed for zander fishing, the Kastmaster Zander Pro series includes three two-piece rods with responsive solid tips, offering an ideal balance between sensitivity and power. The tip clearly transmits every tap of the lure, while the strong, responsive butt section ensures solid hooksets and full control during the fight. The split handle improves signal transmission from the blank, giving anglers an edge in tough conditions. The design is understated yet stylish, with durable EVA foam in the butt and wear-resistant SiC guides – perfect for both boat and bank fishing.

Kastmaster Jig	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Zander Pro 232/24	163 004 232	232	5-24	118	121	2
Zander Pro 250/24	163 004 250	250	5-24	130	130	2
Zander Pro 270/24	163 004 270	270	5-24	136	140	2

solid tip

Kastmaster Spin UL

Kastmaster Spin UL – a modern, two-piece ultralight spinning rod designed for lures up to 10 g. Ideal for precise casts with surface lures, small spinners (sizes 0–2), or lightly rigged soft lures. A great choice for chub, ide, perch, or trout. It features a soft, pleasant action that keeps fish pinned even with light hooksets. Despite its finesse character, the blank holds a surprising power reserve. The rod includes a split EVA grip, a sleek, subtle finish, and SiC guides that ensure smooth line flow, whether using monofilament line or braid.

Kastmaster Jig	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Spin UL 244/3-10	163 005 244	210	3-10	112	127	2
Spin UL 270/3-10	163 005 270	232	3-10	126	139	2

Kastmaster Spin L

Kastmaster Spin L – a two-piece spinning rod tailored for trout crankbaits and deep-diving, barrel- shaped lures for perch and barbel. Also excellent for twitching slim minnows that imitate bleak. The blank conceals a substantial power reserve that will surprise many anglers. Comfort is enhanced by the split handle for increased lure contact, contemporary design, and a durable EVA-inserted butt. SiC guides guarantee optimal line handling.

Kastmaster Jig	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Spin L 228/5-14	163 006 228	228	5-14	109	118	2
Spin L 244/5-14	163 006 244	244	5-14	117	127	2
Spin L 270/5-14	163 006 270	270	5-14	125	139	2

Kastmaster Spin M

Kastmaster Spin MH

Kastmaster Spin H

Kastmaster Spin M

Kastmaster Spin M – a versatile, two-piece rod available in three lengths – suitable for both shore and boat fishing. Perfect for asp, pike, barbel, chub, and zander with a wide variety of lures. It features a moderate-fast action and a casting weight that allows for multi-purpose use. The rod includes a split EVA handle for improved blank sensitivity, modern understated styling, a robust butt section, and SiC guides.

Kastmaster	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Spin M 228/6-21	163 007 228	228	6-21	118	118	2
Spin M 244/6-21	163 007 244	244	6-21	127	127	2
Spin M 270/6-21	163 007 270	270	6-21	135	139	2

Kastmaster Spin MH

Kastmaster Spin MH – a two-piece, medium-heavy power rod designed for all-round predator fishing. Despite its solid appearance, it performs excellently even with 10 g lures – making it ideal for perch and pike alike. It offers a perfect blend of strength, sensitivity, and visual appeal. Equipped with a split EVA handle, refined aesthetics, a sturdy butt, and SiC guides for smooth, accurate line handling and long- distance casting.

Kastmaster	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Spin MH 244/8-28	163 008 244	244	8-28	134	127	2
Spin MH 270/8-28	163 008 270	270	8-28	141	139	2

Kastmaster Spin H

Kastmaster Spin H – a powerful, two-piece rod available in three universal lengths, ideal for long- distance casting and heavy lures: large crankbaits, spoons, and jig heads up to 30 g. The blank holds a large power reserve for confidently fighting big predators. It features a split handle, EVA foam, modern finishing, a solid butt, and durable SiC guides.

Kastmaster	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Spin H 244/10-42	163 011 244	244	10-42	128	127	2
Spin H 270/10-42	163 011 270	270	10-42	166	140	2
Spin H 300/10-42	163 011 300	300	10-42	181	155	2

Kastmaster Spin XH

Kastmaster Single Zander

Kastmaster Trout Area

Kastmaster Spin XH

Kastmaster Spin XH – the most powerful rod in the Kastmaster Spin series. Available in three lengths, all optimized for casting heavy lures from boat or shore. Designed for long-distance casting and effective control over the fight with large predators. The blank delivers high strength while maintaining excellent control. Features include a split EVA handle, minimalist finish, impact-resistant butt, and SiC guides.

Kastmaster	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Spin XH 244/20-60	163 012 244	244	20-60	140	127	2
Spin XH 270/20-60	163 012 270	270	20-60	183	140	2
Spin XH 300/20-60	163 012 300	300	20-60	186	155	2

Kastmaster Single Zander

Kastmaster Single Zander – a one-piece, fast-action, powerful rod built for dedicated zander anglers. Its optimal length makes it easy to jig heavy lures like vertical jigs or soft baits on +20 g jig heads, while ensuring effective hooksets. A sensitive grip ensures excellent lure contact, and the one-piece blank transmits every vibration. The rod boasts an elegant, subdued finish, an EVA foam-inserted butt, and durable SiC guides for precision and longevity.

Kastmaster	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Single Zander 198/24	163 009 198	198	6-24	96	198	1
Single Zander 198/32	163 010 198	198	8-32	100	198	1

Kastmaster Trout Area

Kastmaster Trout Area – a two-piece rod for trout area enthusiasts, available in two casting weight versions: 0.2–2.5 g and 0.5–4 g. Perfect for ultra-precise micro-lure presentation in shallow water. Despite its light construction, it delivers exceptional feel and control. It comes with a split handle for improved lure feedback, subtle modern styling, and SiC guides. Its lightweight design enables all-day trout hunting without fatigue.

ARCUS PRO
SUPER HIGH CARBON

A solid choice in the offer of tackle for routine anglers seasoned in fishing battles, as well as for novices looking for good, proven equipment that simply does not need to worry about. These rods will do well on virtually any water. High quality carbon fiber used in the production of this series allowed to obtain light, fast and very good action rods. They are equipped with high quality guides, A-class cork, and proven and practical reel handles. Add to this an original design and a reasonable price, and we will get a great series of rods meeting the expectations of practically every angler. Not without significance should also be the fact that these rods, after a series of tests on different waters, received a very high rating from our team of testers.

Arcus Pro Pole

Arcus Pro Bolognese

Arcus Pro Feeder

Arcus Pro Pole

These poles are crafted from high-quality carbon fiber, ensuring exceptional lightness, responsiveness, and excellent action. They perform flawlessly in the hands of anglers who value fast strike response and precise fish control during the houl. A perfect choice for targeting both small silverfish and larger specimens. There's much to say about these rods—but one simple, if a bit cliché, sentence sums it up best: they're just great rods! A well-thought-out range of lengths allows anglers to match the model to their personal preferences and fishing conditions.

Arcus Pro	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Pole 400/30	130 015 400	380	5-30	130	122	4
Pole 500/30	130 015 500	480	5-30	194	122	5
Pole 600/30	130 015 600	585	5-30	259	122	6
Pole 700/30	130 015 700	680	5-30	390	122	7
Pole 800/30	130 015 800	775	5-30	447	115	8

Arcus Pro Bolognese

The ringed counterpart to the exceptional Arcus Pro Pole rods, made from the same premium-grade carbon fiber. These Bolognese rods offer the same lightness, speed, and dynamic performance, with an action that allows for accurate rig presentation and confident control of fish in challenging waters. Outfitted with durable SiC guides and ergonomic reel seats, they deliver not only excellent performance but also user comfort. Ideal for fishing beyond the reach of a standard pole—in river channels, behind weirs, and in current seams or narrow flows. Not just a "key" to a single vault, these rods are a master key to unlocking fishing opportunities where others fall short.

Arcus Pro	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Bolognese 400/30	130 014 400	385	5-30	156	122	4
Bolognese 500/30	130 014 500	483	5-30	248	125	5
Bolognese 600/30	130 014 600	585	5-30	347	125	6
Bolognese 700/30	130 014 700	683	5-30	414	131	7

Arcus Pro Feeder

The Arcus Pro feeder rods offer a modern take on classic bottom fishing, suited to both stillwaters and flowing venues. Built on lightweight, high-performance carbon fiber blanks, they deliver precise casting, fast recovery, and a crisp action that enhances bite detection and striking efficiency. Available in the popular 360 and 390 cm lengths with a wide range of casting weights, they handle everything from delicate feeders to heavy setups in strong currents. Outfitted with SiC guides, reliable reel seats, and a tastefully subdued design—topped off with an A-grade cork handle. Excellent value meets serious performance.

Arcus Pro	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Feeder 360/90	130 003 360	360	90	319	125	3+3

Feeder 360/150	130 005 360	360	150	346	125	3+3
Feeder 390/150	130 005 390	390	150	369	139	3+3
Feeder 360/180	130 006 360	360	180	352	125	3+3

Arcus Pro Match

Arcus Pro Carp

Arcus Pro Picker

Arcus Pro Match

The Arcus Pro match rods, available in 420 and 450 cm lengths, are precision tools for surface float fishing in all weather conditions. Made with Super High Carbon blanks, they offer excellent elasticity and strength, ensuring accurate rig control and safe handling of larger fish. Outfitted with premium SiC guides, high-quality reel seats, and stylish, modern design. The A-grade cork handle ensures comfort during long sessions. A fully featured, functional rod at an outstanding price.

Arcus Pro	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Match 420/25	130 021 420	420	5-25	293	147	3
Match 450/25	130 021 450	450	5-25	329	157	3

Arcus Pro Carp

The three-piece Arcus Pro Carp rods are premium-grade tools for demanding carp anglers. Constructed with powerful, fast-action carbon blanks, they enable long, accurate casts and deliver superb control during the fight. Featuring SiC guides, sturdy reel seats, and EVA foam handles resistant to moisture and mechanical damage. Elegant, understated aesthetics and a great price-to-performance ratio round out the package.

Arcus Pro	Art. no	Length (cm)	Casting weight (Lbs)	Weight (g)	Transp. length (cm)	Number of elements
Carp 360/3/2,75lbs	130 002 360	360	2,75	328	127	3
Carp 360/3/3,00lbs	130 001 360	360	3,00	353	127	3

Arcus Pro Picker

Designed for light quiver tip fishing in still or slow-flowing waters, the Arcus Pro Picker rods are built on sensitive, lightweight carbon blanks that offer excellent bite detection and enough backbone to handle decent-sized fish. Equipped with SiC guides, reliable reel seats, and a comfortable A-grade cork handle. Modern styling and a competitive price point make these rods the perfect choice for fans of finesse fishing.

Arcus Pro	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Picker 300/30	130 029 300	300	30	188	132	2+3

Arcus Pro Tele Carp

Arcus Pro Tele Match

Arcus Pro Tele Roach / Tele Bream

Arcus Pro Tele Carp

A telescopic version of the classic carp rod, offering excellent user specifications in a more compact, travel-friendly format. Made from high-quality carbon fiber with a powerful, tip-action profile for casting strength and control. Outfitted with SiC guides, practical reel seats, EVA handles, and section-locking stoppers to prevent jamming. Classic design and excellent value make this a solid choice for mobile carp anglers.

Arcus Pro	Art. no	Length (cm)	Casting weight (Lbs)	Weight (g)	Transp. length (cm)	Number of elements
Tele Carp 360/2,75lbs	130 024 360	360	2,75	295	100	6
Tele Carp 390/3,00lbs	130 024 390	390	3,00	355	106	7

Arcus Pro Tele Match

The Arcus Pro Tele Match rods are built for anglers seeking portability without compromising rod action. Constructed from high-grade carbon fiber, these rods offer fast action, excellent strike response, and smooth bend under load. Outfitted with SiC guides and reliable reel seats. The telescopic design ensures easy transport, while refined styling and a fair price make this rod a smart choice for today's match anglers.

Arcus Pro	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements

Tele Match 450/25	130 022 450	450	5-25	270	133	8

Arcus Pro Tele Roach / Tele Bream

This telescopic series is tailored for anglers who enjoy classic float fishing with rigs matched to bite intensity. The Tele Roach (up to 25g) is ideal for delicate float work targeting roach and rudd, while the Tele Bream offers more power for larger bream and stillwater species. Built from high-quality carbon fiber, fitted with SiC guides and strong reel seats. A compact transport size and practical design enhance usability and aesthetics, while the reasonable price makes these rods especially attractive.

FISHING EXPERT

Vistar
FULL CARBON

Fishing with soft lures is incredibly effective, assuming that several factors are met. However, the right choice of lure size and colour and presentation are the key aspects. If we are mentioning in the presentation of the lure, it is important whether our rod animates it properly and whether we are able to react quickly enough to the bite. Each of the Vistar rods will meet the above mentioned assumptions, enabling you to fish with your favourite lures effectively. To increase the comfort of fishing, we gave these rods VSS handles, ergonomic handle made of profiled EVA foam and sensitive carbon fibre blanks.

Vistar Jig UL

Vistar Jig L

Vistar Jig ML

Vistar Jig UL

An ultralight jigging rod fitted with a solid-tip insert made of high modulus carbon, ensuring maximum sensitivity and direct contact with the lure. Designed for finesse fishing with micro lures in the 1–5 g range. The fast-action blank allows you to detect even the slightest bites and animate your lure with precision. Featuring a VSS reel seat, ergonomic split-grip handle made of shaped EVA foam, and SiC guides, this is a thoroughly modern finesse spinning rod.

Vistar	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements

Jig UL 232/1-7	101 000 232	232	1-7	118	121	2

solid tip

Vistar Jig L

A versatile solid-tip rod designed for perch and trout fishing with light to medium jig heads. The slim and sensitive carbon blank offers excellent vibration transmission, allowing for precise lure control. The rod's modern build includes a VSS reel seat and a shaped split EVA handle, ensuring comfort during long fishing sessions. Outfitted with SiC guides for durability and smooth line flow, ideal for both monofilament and braided lines.

Vistar	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements

Vistar Jig M

Vistar Spin L

Vistar Spin M

Vistar Jig M

The most powerful jigging rod in the Vistar series, fitted with a solid tip, perfect for targeting pike and zander using medium to heavy soft lures. The dynamic fast-action blank, made from high modulus carbon, delivers long casting range and rapid hook setting. This rod offers precise lure control and ample power for handling trophy-sized fish. Completed with a VSS reel seat, ergonomic EVA grip, and SiC guides, it meets the expectations of serious spinning enthusiasts.

Vistar	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements

solid tip

Vistar Spin L

A lightweight, all-round spinning rod ideal for perch, trout, and asp fishing using smaller soft and hard lures. The high modulus carbon blank provides exceptional sensitivity and a responsive action, ensuring confident hooksets. A shaped EVA handle, VSS reel seat, and SiC guides make this rod perfectly balanced and comfortable for all-day fishing. Detects subtle bites with ease and gives full control over the setup.

Vistar	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Spin L 240/3-15	101 004 240	240	3-15	121	124	2
Spin L 270/3-15	101 004 270	270	3-15	133	140	2

Vistar Spin M

A medium-power all-rounder designed for anglers who use a wide variety of lures. The slim and strong carbon blank ensures great feel and power for long, accurate casts. Its fast action and power reserve support dynamic hook sets, while the EVA grip and VSS seat provide ergonomic handling. SiC guides reduce friction, enhancing casting distance and lure control.

Vistar	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Spin M 240/5-25	101 005 240	240	5-25	129	124	2

Vistar Spin H

Vistar Travel Spin M

Vistar Tele Spin M

Vistar Spin H

A powerful yet sensitive spinning rod designed for large pike. The carbon blank delivers excellent strength and responsiveness, allowing for effective lure presentation and quick reactions to bites. Handles larger lures effortlessly while maintaining finesse with smaller baits. Outfitted with a VSS reel seat, contoured EVA handle, and SiC guides, this rod offers full comfort and control in all fishing environments.

Vistar	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Spin H 240/8-35	101 006 240	240	8-35	136	124	2
Spin H 270/8-35	101 006 270	270	8-35	159	140	2

Vistar Travel Spin M

A compact, four-piece spinning rod with a transport length under 65 cm—perfect for travel, holidays, or quick getaways. A strong and sensitive carbon blank combined with spigot joints ensures a smooth, uninterrupted bend, eliminating the stiffness often found in multi-piece rods. Excellent casting performance, good shock absorption, and plenty of power make it a serious option for targeting pike and zander. Finished with a split EVA handle, VSS reel seat, and SiC guides, this travel rod matches the performance of two-piece setups.

Vistar	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Travel Spin M 240/7-28	101 007 240	240	7-28	125	64,5	4
Travel Spin M 270/7-28	101 007 270	270	7-28	133	72	4

Vistar Tele Spin M

A telescopic spinning rod that rivals traditional rods in performance and sensitivity. The Full Carbon blank delivers a fast tip action and outstanding durability. Quick, responsive, and with a transport length of just 61 cm, it's a great pack-and-go option for spontaneous pike sessions—whether on a lake or in the urban jungle. Equipped with a VSS reel seat, shaped EVA handle, and SiC guides, it's a reliable companion in any fishing scenario.

Venom
HI-CARBON

Fishing with soft lures is incredibly effective, assuming that several factors are met. However, the right choice of lure size and colour and presentation are the key aspects. If we are mentioning in the presentation of the lure, it is important whether our rod animates it properly and whether we are able to react quickly enough to the bite. Each of the Vistar rods will meet the above mentioned assumptions, enabling you to fish with your favourite lures effectively. To increase the comfort of fishing, we gave these rods VSS handles, ergonomic handle made of profiled EVA foam and sensitive carbon fibre blanks.

Venom Micro Lure Spin XFUL

Venom Micro Lure Spin XUL

Venom Micro Lure Spin UL

The VENOM MICRO LURE series was created for anglers seeking finesse and ultimate control over their lure. Blanks made from high-modulus carbon deliver a deep, progressive action – perfect for Trout Area techniques and delicate silverfish fishing. Super-lightweight AT guides and an SKSS-style reel seat ensure minimal weight and maximum sensitivity. The lightweight EVA handle provides comfort and a modern look, resulting in rods that combine cutting-edge technology, precision, and a passion for ultra-light fishing. Perfect for working with light jigs, size 0 spinners, and micro crankbaits.

Venom Micro Lure Spin XFUL

The XFUL 183cm is the most refined rod in the Venom Micro Lure lineup. Designed for maximum sensitivity and precision, it allows perfect control over micro spoons and the tiniest crankbaits. Every wrist movement translates into subtle lure action, making it an unmatched tool for the most demanding fishing conditions. Ideal for small trout waters and ultra-light silverfish fishing, it delivers pure enjoyment in every bite and fight.

Venom Micro Lure	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements

Venom Stream Spin

Venom Pride Spin

Venom Skipper Spin

Venom Stream Spin

If you target chub, ide, or trout with surgical precision, the Venom Stream Spin was built with you in mind. This rod isn't for everyone – it's a tool for the conscious angler who knows exactly how to present a micro-wobblers or a small jig right in front of a fish's nose. The blank made of High Modulus Carbon reacts instantly to signals from the water, and its moderate-fast action allows for pinpoint casting and effective hooksets from any distance. SiC guides ensure smooth line flow, even with ultralight mono or braid, while the VSS reel seat paired with a split handle made of contoured EVA foam and cork-rubber inserts delivers comfort you'll appreciate after hours of active fishing. The Stream models are perfectly balanced – rods engineered for precision and lightness with zero compromise.

Venom	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements

Stream Spin 2742	165 001 274	274	4-17	162	142	2

Venom Pride Spin

Fishing without limits – that's exactly why we designed the Venom Pride Spin. A fast-action, tip-sensitive rod that handles a wide range of lures – from slim crankbaits to soft jerkbaits on jig heads and classic spinners. The High Modulus Carbon blank combines low weight with instant response, providing confidence in long-distance hooksets. But there's more – during the fight, its semi-parabolic action helps you safely guide the fish to the net, even when things don't go as planned. Outfitted with a full set of SiC guides, a reliable VSS reel seat, and a split EVA handle with cork-rubber trim, this rod is built for comfort and precision. Venom Pride Spin is your everyday weapon for pike and asp – a rod that lets you fish effectively and enjoyably.

Venom	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Pride Spin 2282	165 002 228	228	7-28	134	119	2

Pride Spin 2742	165 002 274	274	7-28	175	142	2

Venom Skipper Spin

When it's time to battle big pike in tough conditions, the Venom Skipper Spin is your best choice. This rod doesn't hesitate. It's a powerful, perfectly engineered machine for landing large predators. The High Modulus Carbon blank delivers exceptional strength at an impressively low weight, allowing you to fish hard, long, and without fatigue. Its fast and confident action keeps you in full control of your lure, even when rigged heavy, and gives you the leverage to hold strong fish in current without overloading your setup. Balance? Spot on. Add in an ergonomic VSS reel seat, a split EVA handle with comfortable cork- rubber inserts on the butt section, and dependable SiC guides – everything about the Skipper is built to perform and feels great in hand. This is a rod that gets the job done – and looks ready for battle.

AdvantX
X-CARBON MATRIX

The AdvantX series was born for anglers who demand more than just reliability from their gear. It's a versatile family of rods—from poles and Bolognese rods, through feeders and match models, to solid carp rods—designed to tackle the challenges of every fishing style. Each one offers more than just a strong blank. Crafted from 24T carbon, they strike a perfect balance between durability and finesse. That makes these rods truly universal: well-balanced, tough, and resistant to mechanical wear. SiC class guides ensure smooth casting and durability through the years. Corked butt sections give a secure grip and comfort even during long sessions, while DPS style reel seats guarantee a rock-solid connection between reel and rod. An eye-catching design that underscores the character of the series completes the package. Whether you're fishing a river, a lake, or a commercial water — with AdvantX you know you're holding gear born from well- thought-out decisions and a passion for fishing.

AdvantX Pole

AdvantX Bolognese

AdvantX Method Feeder

AdvantX Pole

AdvantX Pole rods are the essence of traditional fishing—no reel, no unnecessary gadgets, just you, your rod, and direct connection to the fish. Perfect for anglers who know that finesse, reflex, and full control begin with a pole chosen with precision—because no one wants the fish setting the terms. The strong blanks with superb action will be your ally in these contests.

AdvantX Pole	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
AdvantX Pole 400	105 001 400	389	25	138	132	4

AdvantX Pole 600	105 001 600	581	25	266	132	6
AdvantX Pole 700	105 001 700	680	25	358	132	7
AdvantX Pole 800	105 001 800	767	25	444	141	7

AdvantX Bolognese

If you fish in a classic style but refuse compromises—AdvantX Bolognese is for you. A rod that performs perfectly on lakes, rivers, and canals when you need a long, sensitive rod that gives you full control over float and rig—even when fishing far from shore. Well balanced, with a clear tip action, it allows you to hook quickly and drive the fish efficiently to the net—even in strong river currents. SiC class guides ensure your line glides smoothly under load and your casts are seamless. The rod fits comfortably in hand, is well balanced, and doesn't wear out your arm, even during long hours at the bank.

AdvantX Method Feeder

A lightweight, dynamic rod crafted especially for method feeders. It shines both on commercial fisheries—where cast precision and finesse in fish pulls count—and on wild waters, where sensitivity combined with power is key to success. Multiple lengths let you tailor the rod to your water conditions—whether fishing close in or casting to more distant spots. It will handle big carp fights with ease yet notice delicate bites from crucians just as well.

AdvantX Spod

AdvantX Feeder

The AdvantX Feeder rods are a thoughtfully designed choice for anglers who expect reliability, good action, and excellent balance—without overpaying. Each model in this series is built for a specific purpose, yet they all share one trait: technical perfection and outstanding value for money. Every rod in the AdvantX line comes with high-grade SiC class guides that ensure smooth line flow and protect the line even under heavy loads. A range of lengths and casting powers lets you choose exactly the rod that suits your style—whether you fish lightly and finesse-style, use traditional universal setups, or go for strength when battling river giants.

AdvantX Carp

These AdvantX carp rods are tools designed by enthusiasts for enthusiasts who expect not only durability but also perfect blank action and reliability in every condition. Available in two lengths—360 cm and 390 cm—and with different cast powers of 3 lbs and 3.25 lbs, you can easily match one to your style and fishing situation. The 24T carbon blank ensures lightness with the required stiffness for dynamic casting. AdvantX CARP is an excellent choice both for those just starting in carp fishing and for experienced carp-anglers seeking high precision and reliability.

NEW!

AdvantX Spod

This 360 cm (12 ft) carp spod rod, with a 5.5 lb test curve, was built to rival space agencies-capable of launching a fully loaded spod into orbit, or at the very least, to spots others can only dream of reaching. The blank is surprisingly slim, yet it harbors immense, seemingly inexhaustible power that is released progressively during the cast, catapulting your spod to any desired location in the swim. To minimize weight and gain those precious extra meters, we've equipped it with ultra-light, single-leg guides-featuring an oversized 50 mm butt guide-ensuring that even thick shock leaders pass through with zero resistance or friction. Forget the struggle of heavy baiting; this rod loads with incredible ease and recovers in a split second after the cast, allowing for consistent, pinpoint-accurate baiting throughout your entire session.

AdvantX Match

AdvantX Tele Float

AdvantX Match

AdvantX Match is the classic distance rod designed for long casts and precise rig control in still and slow-moving waters. The blank, built from lightweight carbon fiber, offers excellent dynamics and flexibility needed for casting and fighting fish. Carefully placed guides ensure the line flows smoothly, even when working with fine match setups. It's a great choice for anglers searching for reliable match gear at a sensible price—elegant design, natural cork handle, and solid components make it a versatile tool for both beginners and seasoned anglers who demand precision at range.

AdvantX Match	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
AdvantX Match 390	105 008 390	390	5-25	203	135	3
AdvantX Match 420	105 008 420	420	5-25	215	145	3

AdvantX Tele Float

These are rods that simply feel right in hand. From the first cast you'll sense harmony—balance, blank action, casting precision. This gear combines the comfort of a classic telescopic rod with a modern approach to blank design—lightweight, sensitive, yet with real blank power. This family includes two lengths and three casting powers, each model crafted with attention to the smallest details, and designed for specific conditions and styles of fishing. Each comes outfitted with SiC class guides—smooth, durable, expertly guiding the line even under intense use. The natural cork handle gives a firm grip, while the compact build adds convenience both on the water and in transport.

KONGER®
FISHING EXPERT

PRIMAX®

Whether your passion is subtle float fishing, precise feeder and method feeder, finesse whip fishing, dynamic spinning, river bolognese style, or high-power carp angling—this lineup offers the perfect tool for you. Built on 24T carbon blanks, these rods deliver great action while maintaining a forgiving bend, strength, and durability. They guarantee excellent sensitivity so you never miss the most delicate bite, while offering a solid power reserve when fighting specimen fish. Smooth SiC guides work flawlessly with both monofilament and braided lines to minimize friction. Combined with handles made of cork and contoured, non-slip EVA foam, they ensure comfort and a secure grip in all conditions—even during rain or when handling fish with wet hands. Konger Primax stands for functionality, durability, and pure angling pleasure. It is a reliable partner on the water that meets the demands of both ambitious beginners and experienced anglers.

NEW!

Primax Bolognese

Bolognese fishing demands a very specific performance from a rod—it must be long and stiff enough to efficiently control the drift of the rig in the current, yet forgiving enough to cushion the surges of fish on light lines. The Konger Primax Bolognese series consists of modern, guided rods built precisely for accurate river trot fishing. Designed for dynamic angling, they combine excellent balance with snappy responsiveness, allowing for total control over the rig in rivers with varying current speeds.

NEW!

Primax Carp

Carp fishing demands tackle that you can rely on in the most extreme moments. The Konger Primax Carp rods are designed specifically for big-fish hunters who seek uncompromising durability and excellent casting performance. Thanks to the 50mm butt guide, casts are not cut short—even when using thick monofilament lines—which will be appreciated by anyone who needs to send their rig to a long distance. These are modern builds created to handle immense stress, both when launching heavy rigs over long distances and during high-power fights near underwater snags.

TOKYOTO
ADVANCED CARBON CONSTRUCTION

Fishing is becoming an increasingly popular hobby, so we have prepared a special series of stylish Tokyoto rods in Magic White color with aesthetic cherry and gray finish. The "magic white" series of rods is not only a modern look, but also advanced technologies and reliable quality. The rods are made of 24-ton durable and reactive carbon blanks, which guarantees excellent action and reliable fish hauling. Additionally, the white color of the blanks is highly visible against the water, making bite detection much easier . The ergonomic design of the VSS-type handle provides increased control over the lure, which translates into greater precision and comfort when fishing. The Tokyoto series of rods is an ideal choice for any angler who values style, comfort and equipment reliability. Try our rods and experience a new dimension of fishing!

Tokyoto Spin 20

Tokyoto Spin 30

Tokyoto Spin 40

Tokyoto Spin 20

These rods are ideal for catching predatory fish with light lures. With a casting weight of up to 20 g, they allow precise handling of light lures such as small crankbaits, soft plastics, spoons and spinners. These lures are ideal for fishing perch, trout, chub and ide, allowing precise casts and finesse lure presentation.

Tokyoto	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements

GRAFITEX
POWER CARBON

A family of rods for all kinds of fishing techniques, from pole rig, through spinning, all the way to carp fishing. They are built on the basis of high quality carbon-epoxide composite, thanks to which they have a balanced, not losing fish action. Moreover, thanks to properly designed blanks, Grafitex rods have gained the dynamics necessary for long casts and hooking. It is a fully complementary series, giving you sincere joy from the very fact of fishing. We are convinced of the quality of these rods and we can recommend them to every true angler in every form.

Grafitex Pole

Grafitex Bolognese

Grafitex Feeder

Grafitex Pole

Light and handy poles, allowing for both pleasant, recreational fishing and more demanding fishing. They are strong enough to effectively allow for a relatively forceful haul of a large crucian or bream, and flexible enough to quickly force our catch to surrender. With the four lengths available, both the beginners and experienced fishermen will have plenty of ground to explore.

Grafitex	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Pole 300/20	143 002 300	300	5-20	103	120	3
Pole 400/20	143 002 400	400	5-20	140	120	4

Pole 600/20	143 002 600	600	5-20	325	120	6

Grafitex Bolognese

Practical and lightweight bolognese rods allowing you to reach remote areas of the fishery. A good choice for both rivers and canals. The composite construction of the blank combines dynamics and resilience, giving us the ability to react quickly to a bite and providing excellent control over the fish we catch. An additional advantage of this type of constructional solution is its naturally increased resistance to mechanical damage.

Grafitex	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Bolognese 400/20	143 004 400	400	5-20	236	125	4

Grafitex Method Feeder

Grafitex Big Eye Carp

Grafitex Carp

Grafitex Method Feeder

Practical rods for method feeder fishing. The 300 cm and 330 cm lengths and casting weight up to 60 g allow fishing on a lot of fisheries. The composite construction of the blank ensures durability, strength and resistance to mechanical damage. The grip handle is finished with cork and practical EVA foam. The rods are fitted with SiC type guides and equipped with three interchangeable tips with different deflection strength, which helps to fit the kit to the conditions which you'll be facing on the fishery.

Grafitex	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Method Feeder 300/60	143 007 300	300	60	251	106	3+3
Method Feeder 330/60	143 007 330	330	60	275	117	3+3

Grafitex Carp Big Eye

Carp rods with oversized guides, adapted to long casts. Available in 360 cm length and two test curves, they will allow to reach and fish effectively in distant spots. We have obtained a semi-parabolic action in both of them, which allows good control over the fighting fish and the power necessary to hold it before they enter the snags. Good quality components which were used to equip this rod complete the picture of a carefully thought out and crafted carp rod. To sum up, these are really great carp rods at an affordable price.

Grafitex	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Carp Big Eye 360/3/3,00 Lbs	143 006 360	360	3,00	437	126	3
Carp Big Eye 360/3/3,50 Lbs	143 003 361	360	3,50	498	126	3

Grafitex Carp

For the anglers who require above-average durability from their equipment, we would like to present the rods which can cope with the difficulties of struggling with double-digit specimens. These are solid carp fishing rods that allow for safe and easy fishing. During the casting the blank is deeply loaded in order to give back the accumulated energy and provide accurate and long-distance casts to the fishery. A great choice for beginners and experienced carp anglers who like deeper flexing of the rod in the haul.

Grafitex	Art. no	Length (cm)	Casting weight (Lbs)	Weight (g)	Transp. length (cm)	Number of elements
Carp 360/3,00 Lbs	143 009 360	360	3,00	346	125	3
Carp 360/3,50 Lbs	143 018 360	360	3,50	356	125	3

Grafitex Spod Carp

Grafitex Match

Grafitex Spin

Grafitex Spod Carp

Where it is necessary to send a bait far away, it is also necessary to deposit the feed far away. To help with such fishing, we have adapted solid rods of Spod type. They are strong enough to send a rocket loaded with grain, boilies or pellets over long distances. It is definitely worth mentioning that we have equipped the rod with good quality components to cope with the overloads that occur when casting such heavy rockets.

Grafitex	Art. no	Length (cm)	Casting weight (Lbs)	Weight (g)	Transp. length (cm)	Number of elements
Spod Carp 360/3/5,50 Lbs	143 003 360	360	5,50	526	126	3

Grafitex Match

When we are looking for match fishing rods we usually base our search on the following parameters: length, casting weight, weight, handle, guides, action and price. Taking the above points, we designed two match rods in the most popular lengths 390 and 420 cm and casting weight up to 25 g. The grip handles are finished with cork combined with practical EVA foam. Light SiC type guides on high feet prevent the line from sticking to the blank, which together with the rod's springy action enables considerably longer and more accurate casts.

Grafitex	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Match 390/25	143 027 390	390	5-25	311	136	3
Match 420/25	143 027 420	420	5-25	352	146	3

Grafitex Spin

A series of spinning rods with good action, featuring models designed for catching medium and large fish. The bend of the rod under load is distributed mainly on the tip and the middle part, allowing for quick and effective reeling in of the specimen. The rod's components allows for the use of both monofilaments and braided lines for fishing. Ergonomics, craftsmanship and action may definitely appeal to you. A very attractive proposal for every fan of spinning.

Grafitex	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements

Spin 270/40	143 012 270	270	8-40	187	140	2

Grafitex Team Spin

Grafitex Tele Mino

Grafitex Tele Spin

Grafitex Team Spin

A series of spinning rods for fishing with medium-size artificial lures both soft and hard. The 240, 270 and 300 cm lengths will allow you to use them when fishing from boats and also during bank walks searching for predator species. The cork grip handle finished with cork-rubber gives the rod an aesthetically pleasing appearance as well as being perfectly functional. All rods are equipped with a hook keeper and SiC class guides. The rods are characterised by a fast tip action and under the load of the reeled in fish they bend evenly at 3/4 of their length giving the feeling of a safe haul and ensuring an effective landing of a record-breaking fish in the landing net.

Grafitex	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements

Grafitex Tele Spin

Small size and great possibilities accumulated in an aesthetic blank. Properly selected section lengths allowed to maintain the action of the put-over rod, while reducing the transport length, which will be appreciated by anglers who like to have a "ready-to-go" piece in their pockets. After multiple construction changes and many passed tests on the fishing grounds, we give you rods that will not disappoint your expectations.

Grafitex Tele Strong

Grafitex Tele Bream H

Grafitex Tele Carp

Grafitex landing net pole

Grafitex Tele Strong

Strong and solid telescopic rods, which can be used for bottom method fishing or float fishing. During tests, these rods successfully handled even very big carp and grass carps. Blanks made of composite materials and ring SiC type guides, guarantee long rod life and give the feeling of safely reeling in even big fish.

Grafitex	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Tele Strong 360/120	143 008 360	360	60-120	404	113	4
Tele Strong 390/120	143 008 390	390	60-120	432	121	4

Grafitex Tele Bream H

As the name suggests, these rods are ideal for catching breams with both heavy floats and bottom method fishing, but not only. Our Tele Breams can also cope with perches and pikes fished with small live bait in deep Masurian lakes or with zander fished for dead bait in dams. They are universal rods for catching many species of fish in various types of fisheries

Grafitex	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Tele Bream H 360/60	143 014 361	360	20-60	321	95	7
Tele Bream H 390/60	143 014 391	390	20-60	349	96	7

Grafitex Tele Carp

The crucial advantage of this series of telescopic rods is their uncompromising strength and slimness, comparable to rods of this type made in a multi-component version. Adequate action provides them with a long casting range of sets prepared for carp or other dynamically fighting fish. The precise craftsmanship of the rods and the components used in them unequivocally define them as reliable equipment during fishing.

Grafitex	Art. no	Length (cm)	Casting weight (Lbs)	Weight (g)	Transp. length (cm)	Number of elements
Tele Carp 360/2,75 Lbs	143 020 360	360	2,75	325	106	6
Tele Carp 390/3,00 Lbs	143 021 390	390	3,00	365	106	6

Grafitex landing net pole

The landing net poles in lengths of 220, 280, 320 cm in composite material, telescopic, two and three sectioned with increased strength with the end section covered with special antislip paint. They are equipped with a universal metal thread for mounting the landing net basket. It is characterised by good workmanship and reasonable price, thanks to which it deserves special attention of all enthusiasts of silver fish fishing.

Grafitex	Art. no	Length (cm)	Weight (g)	Transp. length (cm)	Number of elements
220/2	143 026 220	215	230	116	2

320/3	143 026 320	315	340	116	3

VIST
HIGH CARBON CORE

We offer a new series of spinning rods, which includes the five most commonly used casting weights. Among them you will find both models for ultralight perch fishing and rods for typical pike fishing. Thanks to the use of high-carbon composite, which is the basis for the entire series, these rods feature excellent action and high resistance to mechanical damage. To ensure the highest comfort of use, the rods have been equipped with SIC class guides and ergonomic VSS type handles, which also guarantees precision and reliability in any fishing situation. Vist spinning rods, have been created with fishing enthusiasts of all levels in mind.

Vist Jig

Vist Spin 14g

Vist Spin 21g

Vist Jig

An excellent choice for anglers who prefer fishing with light jigs and lures on small jig heads. Available in a variety of lengths, it's ideal for both boat and shore fishing.

Vist	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Jig 210/10	162 001 210	210	3-10	104	107	2
Jig 240/10	162 001 240	240	3-10	122	122	2
Jig 260/10	162 001 260	260	3-10	129	134	2

Vist Spin 14g

Rods designed for fishing with small lures. These highly sensitive spinning rods work exceptionally well with 7 cm wobblers, size 1 and 2 spinners, ideal for catching medium-sized predators like trout, chub, and asp. They provide precision and efficiency on every fishing trip

Vist	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Spin 210/14	162 002 210	210	5-14	111	107	2
Spin 240/14	162 002 240	240	5-14	118	122	2
Spin 260/14	162 002 260	260	5-14	127	134	2

Vist Spin 21g

Perfect for fishing in small rivers, lakes, and gravel pits. They are ideal for medium-sized lures, lighter spoons. Specially designed action of the rod allows precise and dynamic casts, at the same time allowing full control of the lure and fighting fish. It is an ideal choice for anglers who value finesse, precision and quality in all conditions.

Vist	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Spin 210/21	162 003 210	210	7-21	108	107	2
Spin 240/21	162 003 240	240	7-21	123	122	2
Spin 260/21	162 003 260	260	7-21	144	134	2

Vist Spin 28g

Vist Spin 35g

Vist Spin 28g

A series of universal spinning rods with a casting weight of up to 28 g, which allow to handle a wide range of lures. The power of the blank ensures confident reeling in even the big fish. The variety of lengths available in this series allows you to choose a rod both for fishing from a boat and from the shore, providing versatility and efficiency in all conditions.

Vist	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Spin 210/28	162 004 210	210	8-28	112	107	2
Spin 240/28	162 004 240	240	8-28	128	122	2
Spin 260/28	162 004 260	260	8-28	134	134	2

Vist Spin 35g

Sturdy and strong rods that allow for effective presentation of heavier lures. Impeccable blank action ensures smooth operation and even load distribution, which is crucial when reeling in large pike or zander. These rods guarantee reliability and excellent performance in demanding conditions for fighting big specimens.

Vist	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Spin 210/35	162 005 210	210	10-35	110	107	2
Spin 240/35	162 005 240	240	10-35	128	122	2
Spin 260/35	162 005 260	260	10-35	136	134	2

KONGER®
FISHING EXPERT

CORRAL

A series of rods made of high strength carbon and glass composite. It is characterized by great mechanical impact resistance. An excellent offer for both fishing beginners searching for their favourite method, and advanced fishermen searching for strong, durable and affordable rods. In addition to their attractive appearance, they are also equipped with good quality guides and strong and comfortable reel seats.

Corral Pole

Corral Feeder

Corral Method Feeder

Corral Pole

3-7 m long pole rods allowing for full kit fishing. The rod action will forgive any fisherman's mistakes during the reel in. Despite its composite structure, the rods have a relatively low weight.

Corral	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Pole 300/20	127 001 300	300	5-20	105	115	3
Pole 400/20	127 001 400	400	5-20	210	115	4
Pole 500/20	127 001 500	500	5-20	330	115	5
Pole 600/20	127 001 600	600	5-20	480	115	6
Pole 700/20	127 001 700	700	5-20	650	115	7

Corral Feeder

Strong feeders performing well in both running and standing waters. The kit includes two interchangeable tips and will easily deal with reeling of a huge fish from the river current.

Corral	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Feeder 345/120	127 006 345	345	120	390	121	3+2
Feeder 360/120	127 006 360	360	120	450	127	3+2

Corral Method Feeder

Reliable and affordable rods dedicated for method feeder fishing. Lengths and casting weights which you'll find in this family will give you possibility to catch fish in any kind of water you'll be facing. Great choice for fresh and advanced anglers.

Corral	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Method Feeder 300/80	127 028 300	300	80	310	105	3+2
Method Feeder 330/80	127 028 330	330	80	350	115	3+2

Corral Tele Picker

Corral Tele Float

Corral Tele Float Combo

Corral Tele Picker

Despite the telescopic structure, the action of these picker rods is similar to the action of two-section rods. It operates very well under load and has no rigid sections. It is perfect for fishing with a light feeding spring.

Corral	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Tele Picker 270/40	127 007 270	270	40	195	57	6+2

Corral Tele Float

Telescopic float rods for catching whitefish. These rods allow easy handling of kits weighing up to 25 g in total. A perfect choice for float fishing beginners.

Corral	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Tele Float 300/25	127 002 300	300	5-25	180	118	3
Tele Float 400/25	127 002 400	400	5-25	230	118	4
Tele Float 500/25	127 002 500	500	5-25	335	118	5

Corral Tele Float Combo

A handy, short section makes this rod an excellent choice for fishermen making long car travels. Thanks to them, you can always have a ”ready-made rod” in your boot, which will save you if you come across an extremely interesting fishery.

Corral Tele Float	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Combo 290/25	127 000 290	290	5-25	155	70	5
Combo 350/25	127 000 350	350	5-25	210	73	6
Combo 410/25	127 000 410	410	5-25	275	75	7

Corral Tele Strong

Corral Carp

Corral Tele Carp

Corral Tele Strong

Multi-purpose, strong telescopic rods with numerous applications. They are excellent as river ground rods, live bait rods, or simply very solid float rods.

Corral	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Tele Strong 360/100	127 019 360	360	50-100	360	103	4
Tele Strong 360/150	127 020 360	360	80-150	420	106	4

Corral Carp

Strong carp rods with warm action for not losing any fish. Perfect rods for inexperienced carp hunters. In addition, they have a sufficient amount of power to fight with a huge carp or grass carp.

Corral	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Carp 360/100	127 016 360	360	100	490	127	3

Corral Tele Carp

Reliable rods with a ”handy” rod section length. They have a sufficient reserve of power to reel in huge carps and deep deflection action which cushions sudden fish bursts.

Corral	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Tele Carp 360/120	127 021 360	360	120	426	90	6

Corral Spin

Corral Tele Roach

Corral Tele Bream

Corral Tele Spin

Corral Spin

Casting weights and lengths adapted to fishing conditions make these spinning rods the perfect choice for all fishermen. They are characterized by medium action, allowing for successful predator reel in.

Corral	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Spin 210/25	127 008 210	210	10-25	139	111	2
Spin 240/25	127 008 240	240	10-25	188	126	2
Spin 270/25	127 008 270	270	10-25	216	142	2
Spin 210/40	127 009 210	210	15-40	173	111	2
Spin 240/40	127 009 240	240	15-40	203	126	2
Spin 270/40	127 009 270	270	15-40	250	142	2

Corral Tele Roach

Series of functional and well designed telescopic Corral rods, good for different float fishing techniques. Casting weight and rods action makes possible to use small stick floats as well as lightweight bubble floats.

Corral	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Tele Roach 360/25	127 029 360	360	25	350	80	8

Corral Tele Bream

Telescopic rods dedicated for anglers who are looking for a little stronger float rod. Perfectly suited for large bream, crucians or tench. Soft and warm action will not let the fish loose.

Corral	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Tele Bream 360/40	127 030 360	360	40	360	80	8

Corral Tele Spin

These multi-purpose rods with short sections are the perfect choice for convenient fishing lovers. The wide range of lengths and casting weights will enable everyone to find a model adjusted to one's needs.

Corral	Art. no	Length (cm)	Casting weight (g)	Weight (g)	Transp. length (cm)	Number of elements
Tele Spin 210/35	127 012 210	210	10-35	160	47	4

Method MAN

DREADCAT

MethodMAN Feeder PG 855 FD

NEW!

SERIES 800

FRONT DRAG FD

7+1

7 ball bearings, 1 roller bearing ■ front multi-disc drag ■ reinforced PG-type gear with a low gear ratio ■ body and rotor made of reinforced graphite ■reinforced stainless steel main shaft ■ aluminum handle screwed into the drive gear ■ precise main drag with micro-adjustment ■ aluminum main spool ■two line clips on the spool ■ slow oscillation system

The new reel from MethodMan is an advanced design created for demanding Feeder and Method Feeder enthusiasts. At the heart of the mechanism is a robust, low-gear transmission which, combined with an 8-bearing system (7+1), guarantees buttery smoothness and immense cranking power under heavy loads. A heavy-duty stainless steel main shaft prevents lateral deformation during intense fights. The key to extremely long casts lies in the shallow, tall spool and flawless line lay. This is delivered by the Worm Shaft oscillation system and slow oscillation, which create a perfectly dense wrap at an optimal 4.7:1 gear ratio. The aluminum spool features two line-friendly clips, allowing you to fish at two different distances. Total control over hard-fighting fish is guaranteed by a precise Quick Drag system - just a short turn of the knob switches to full stopping power. The build is completed by a thickened, tubular bail wire and a screw-in aluminum handle, which completely eliminates any play. Comfortable use in all conditions is ensured by an ergonomic T-shape knob.

WARRANTY 5 YEAR

FRONT DRAG FD

BALL BEARINGS 8+1

8 ball bearings, 1 anti-reverse bearing ■ multi-disc front drag ■ stainless steel worm shaft ■ computer balanced rotor with Anti-vibro system ■ Quick Drag System ■aluminum main spool ■ two line clips on the spool ■ aluminium CNC handle ■ slow oscillation spool system

The reel is equipped with 8 ball bearings and one roller bearing, ensuring smooth operation and high durability under demanding conditions. It features a quick drag adjustment system, which performs excellently when playing powerful fish. The reel has a stainless steel main gear and a reinforced worm gear responsible for excellent line winding. The aluminum spool is equipped with two clips for securing monofilament or braided line. The body is made of pressed graphite, making this strong reel surprisingly lightweight. The rotor is computerbalanced with an Anti-Vibro system, minimizing vibrations and ensuring smooth and consistent performance even under significant load. The ergonomic handle provides a comfortable grip in all conditions. In summary, this is an ideal feeder reel that, interestingly, is also resistant to saltwater.

FRONT DRAG FD

BALL BEARINGS 7+1

7 ball bearings, 1 anti-reverse bearing ■ carbon body and rotor ■ aluminium main spool ■ multi-disc front drag ■ two line clips ■ carbon double handle

We have equipped this reel with 7 ball bearings and 1 roller bearing, ensuring smooth operation and precise line winding, as well as reliable support for all key mechanisms. It features a carbon body and rotor, providing high durability while maintaining a low weight. The aluminum main spool, with perfectly selected capacity, allows for the use of both braided and monofilament lines. The precise, front multi-disc drag enables quick and accurate adjustment of the braking force. It is equipped with two spool clips and a double handle made of carbon composite, ensuring comfortable use. This reel is an ideal choice for demanding anglers specializing in modern fishing techniques such as picker, light feeder, method feeder on smaller reservoirs, and enthusiasts of pellet waggler fishing.

FRONT DRAG FD

BALL BEARINGS 8+1

8 ball bearings + 1 anti-reverse bearing ■ Handle screwed in the main gear ■ Shallow spool ■ Lightweight construction ■ Precision front drag system

Discover a new dimension of finesse angling with our latest reels – Streeto Area, designed specifically for the precise demands of Trout Area fishing and ultralight presentations targeting “white predators” like rudd and crucian carp. Featuring a shallow spool and a screw-in handle that connects directly to the main gear, these reels deliver exceptional sensitivity and mechanical reliability in a compact form factor. The combination of a lightweight yet durable body, shallow spool, and fine- tuned front drag system allows seamless handling of even the thinnest lines. Smooth operation and refined internal gearing make Streeto Area a dependable companion for pursuing wary fish with finesse-based techniques. Whether you're casting micro spoons on a commercial trout lake or working ultra-light jigs through a crystal-clear stream, Streeto Area gives you the control and precision you deserve.

FRONT DRAG FD

8+1

8 ball bearings, 1 anti-reverse bearing ■ multi-disc front drag ■ metal body ■graphite rotor ■ handle screwed in the main gear ■ right/left inter-changeable handle ■ aluminum shallow main spool ■ aluminum CNC handle

This reel is designed specifically for modern spinning techniques and is equipped with 8 ball bearings and one roller bearing. The precise front multidisc drag system is protected against dust and moisture, ensuring enhanced braking power and a broad, reliable range of adjustment. Its metal body provides solid support for the gear bearings and durability, effectively protecting the internal mechanisms from damage. The graphite rotor adds lightness, eliminating vibrations during line retrieval and enhancing overall comfort. The handle, screwed directly into the drive gear, makes these reels exceptionally strong. Additionally, the handle can be mounted on either the left or right side, allowing customization to the angler's preferences. The aluminum shallow spool and CNC aluminum handle ensure stability and durability, minimizing the risk of deformation during intensive use. This versatile and robust reel will undoubtedly meet the expectations of even the most demanding predator anglers.

TURION Method Feeder Long Cast 850 FD

SERIES 800

FRONT DRAG FD

BALL BEARINGS 7+1

7 ball bearings + 1 anti-reverse bearing ■ Quick Drag system ■ Two line clips on the spool ■ Slow oscillation spool system ■ Aluminium shallow main spool

Engineered for long-distance feeder fishing, the Turion Method Feeder Long Cast 850 FD delivers performance where it matters most. With a slow 4.5:1 gear ratio, it offers superior cranking power and smooth control when playing heavy fish or winding in large feeders. Equipped with 7+1 ball bearings and a powerful front drag system featuring oversized washers and a quick-drag function, the reel provides both strength and finesse in every turn. Its lightweight, oversized ported rotor reduces weight while maintaining structural integrity, while the worm shaft oscillation system ensures flawless line lay for optimal casting distance. The precisely machined spool comes with dual line clips, allowing easy adjustment for two feeding spots. Finished in a sleek and refined design, the 850 FD doesn't just perform flawlessly—it looks the part too. Whether you're targeting big bream or carp at range, the Turion Method Feeder 850 FD offers the control, distance, and confidence every feeder angler demands.

BALL BEARINGS 8+1

8 ball bearings, 1 anti-reverse bearing ■ multi-disc front drag ■ CNC aluminium spool ■ worm shaft system ■ carbon composite body ■ handle screwed in the main gear ■ strong tubular bail roller

Durable feeder reel that provides smooth operation and reliability during hours of fishing. It is equipped with 8 ball bearings and 1 anti-reverse bearing to ensure comfortable operation for a long time. The front multi-disc brake allows quick adjustment of the braking force, which is crucial when fighting big fish. Its worm shaft system ensures smooth and efficient operation, reducing friction and ensuring a long life of the mechanism. The CNC aluminium spool ensures lightness and strength, as well as precise line winding. The screw-in handle makes the operation of the reel smooth, which is crucial when hauling fish. This reliable reel is sure to meet the demands of even the pro anglers.

6+1

6 ball bearings, 1 anti-reverse bearing ■ precise multi-disc front drag ■ power drag 10 kg ■ body and rotor made of light graphite composite ■ aluminium shallow main spool ■ graphite spare spool ■ two, round metal clips on the spool ■ computer balanced rotor ■ tubular bail ■ anti-tangle bail roller.

Strong construction equipped with 6 ball bearings placed in the most exposed to wear spots together with a solid roller bearing makes the perfect combination that guarantees quality and high performance in work. The particular shape of the spool with two metal clips gives you the possibility to execute long and, what matters the most, precise casts. Multi-disk front drag with 10 kg power will not let you down in case of a rapid streak of the fish, giving away the line steadily and smoothly. What else from a reel can you ask for?

DREADCAT Big Cat PG

NEW!

SERIES 700

FRONT DRAG FD

6+1

6 stainless steel bearings, 1 roller bearing ■ front multi-disc drag ■ reinforced drive gear ■ reinforced, thickened main shaft ■ composite body and rotor ■ aluminum main spool ■ reinforced drag with Power Drag washers ■ computer-balanced rotor ■ precise line lay system ■strong aluminum handle with an oversized anti-slip knob

The new edition of the iconic Dread Cat series, designed specifically for extreme, active, and stationary catfish angling. The Big Cat model is a powerful machine built with a single purpose: to give the angler complete control when fighting the largest predators in our waters. Equipped with an extra-deep, two-tone aluminum spool, it holds hundreds of meters of thick braided line, making it the perfect choice for long-distance boat deployment. A key advantage of this reel is its reinforced bearing system (6+1BB) mounted on a thickened main shaft, which easily withstands gigantic loads. The reliable, extremely powerful 12 kg drag allows you to stop fish in heavy river currents, while the heavy-duty gearing operates like a dependable winch. The entire mechanism is housed in a durable body, complete with a CNC metal handle and an ergonomic rubber knob that ensures a secure grip in any weather conditions. The Dread Cat Big Cat is the perfect combination of brute force, a powerful drag, and armored mechanics.

FRONT DRAG FD

5+1

■ 5 stainless steel bearings, 1 anti-reverse bearing ■ multi-disc front drag ■ composite material casing and rotor ■ main aluminium spool ■ spare graphite spool ■ computer-balanced rotor ■ precise monofilament winding system ■ titanium roller covering.

How important part of the setup is the reel, we don't need to convince anybody. Heavy rigs, lures, and catches are common to anyone who calls himself 'catfish hunter'. So, what a real catfish reel must have? Huge spool capacity, strong and resilient gear, and a smooth, powerful drag. All features mentioned above are present in our Dread Cat Mark I. Regardless of where and how you will be fishing, Mark I will follow your expectations. Gear is built for ultimate power, while rubber knob could be operated even with wet hands. Titanium oxide anodized roller, supported by high quality stainless steel ball bearing runs smoothly even with huge fish hooked on the other end of the line. Long story short, if you are all about catfish fishing, this reel will be definitely one of your favorites.

CARPLABS® Gravity X-WIND 950 QD

SERIES 900

FRONT DRAG FD

BALL BEARINGS 8+1

8 ball bearings, 1 anti-reverse bearing ■ slow oscillation spool system ■ multi-disc front drag ■ staniless steel worm shaft ■ Quick Drag System ■ aluminium main spool ■ aluminium CNC handle.

A new reel dedicated to catching the largest cyprinids. It is equipped with eight ball bearings and one roller bearing. The precise, front multi-disc drag allows for control over the runs of even the biggest fish. The reel features a super slow oscillation system, which directly results in a perfect, tight line lay, facilitating even the longest casts. The aluminum long-cast spool perfectly complements the entire setup. The stainless steel worm gear ensures reliability and durability, even with intensive use. The CNC aluminum handle guarantees lightness and strength, which is crucial during long carp fishing sessions. These features make the Carplabs Gravity X-Wind reel an ideal tool for anglers seeking solid, reliable, and visually appealing equipment.

Carplabs X-Wind	Art. no.	Ball bearings	Gear ratio	Weight (g)	Main spool	Spare spool	Line diameter, main spool capacity (mm/m)	Power drag (kg)

SERIES 800

FRONT DRAG FD

BALL BEARINGS 7+1

7 ball bearings, 1 anti-reverse bearing ■ multi-disc front drag ■ CNC aluminium spool ■ carbon composite body ■ handle screwed in the main gear ■ strong tubular bail roller

A spinning reel equipped with 7 ball bearings and 1 anti-reverse bearing, which weighs just 189 grams. Its weight is due to a body and rotor made of carbon composites and an aluminium spool made in CNC technology. The reel's handle is screwed directly into the main gear, which ensures a durable connection and smooth operation even under the heaviest loads. The handle is finished with a comfortable rubber knob, which prevents the handle from slipping during the reel's operation. Strong tubular bail arm and wide roller enable comfortable handling of even the heaviest baits and safe hauling of even the largest specimens.

SERIES 600

REAR DRAG RD

BALL BEARINGS 5+1

5 ball bearings, 1 anti-reverse bearing ■ forged aluminium main spool ■ rear drag ■ quick change spool system ■ brass pinion gear ■ strong tubular bail roller

Reel with a precision rear drag. It has five ball bearings and one antireverse bearing. The forged aluminium main spool features a quick-change system, allowing for a quick change between for example monofilament and braided line and switch to fishing for other species of fish. The brass pinion gear makes the reel resistant to rust. The reinforced tubular bail roler completes the picture of a reel perfect for beginners as well as advanced specimen hunters.

BALL BEARINGS 7+1

7 ball bearings, 1 anti-reverse bearings ■ multi-disc front drag ■ high tensile strength plastic body ■ computer balanced rotor ■ handle screwed in the main gear ■ right/left inter-changeable handle ■ aluminum shallow main spool ■ aluminum CNC hand

This reel can be successfully used for both match fishing and light spinning. The cold-forged, shallow aluminum spool, eight bearings, and hardened high-impact resistant body make this reel suitable for the toughest fishing expeditions. The ability to screw the handle on either side of the reel allows easy customization to the angler's preferences. The multi-disc front drag system with increased braking power provides full control during demanding fights. The aesthetic design combined with a well-thought-out and solid construction completes the picture of a truly versatile reel.

5 ball bearings, 1 anti-reverse bearing ■ precision front drag ■ brass pinion gear ■ forged main spool ■ double reel handle ■ ergonomic rubber knobs ■ thick bail wire.

Reliable universal fishing reel designed with precision and durability in mind. Its robust construction includes five ball bearings and one anti-reverse bearing, ensuring smooth and stable operation even during heavy use. The precision front brake system allows for quick response to every action of the fish being reeled in. Brass pinion gear guarantees not only durability but also smooth and precise line winding. The forged main spool increases stability and strength as well as impact resistance. The reel is equipped with a double handle with ergonomic rubber knobs, ensuring a secure grip even in difficult weather conditions. This versatile reel will be an indispensable companion on any fishing adventure, providing reliability and giving the joy of using it.

BALL BEARINGS 3

3 ball bearings ■ multi-washer rear drag ■ composite material casing and rotor ■ main graphite spool ■ computer balanced rotor ■ titanium roller covering ■ precise monofilament winding system

At first glance and at the "first touch" you can see that there is nothing left here by chance. Excellent quality and ergonomics with the capital "E". Three robust and durable ball bearings ensure harmonious running. The compact and robust body provides reliable support for the key mechanisms of the reel, giving the feel of pleasant, smooth running. This reel has a great chance to become number one in the opinion of many users.

REAR DRAG RD

BALL BEARINGS 1

1 ball bearing ■ multi-washer rear drag ■ composite material casing and rotor ■main graphite spool ■ computer balanced rotor ■ titanium roller covering ■precise monofilament winding system

The basic reel of the Carbomaxx FX series. A model in which every beginner will find everything he needs at the beginning of his adventure with the fishing rod. Precision of workmanship and attention to aesthetics and details are the features clearly visible in this reel. This is complemented by a high quality composite body and rotor for stability and reliability.

REAR DRAG RD

BALL BEARINGS 3

3 ball bearings ■ multi-disc rear drag ■ composite material casing and rotor ■ precise monofilament winding system ■ main graphite spool ■ computer-balanced rotor ■ titanium roller covering

These reels are recommended for all fisheries and all popular fishing methods. This model has been equipped by the design engineers with a failure-free gear, a stainless steel bearings fixed to a durable and light casing and a multi-disc rear drag. Thanks to a new spool oscillation system, the line forms a hard and tight weave positively influencing the casting distance.

REAR DRAG RD

BALL BEARINGS 3+1

3 ball bearings, 1 anti-reverse bearing ■ multi-washer rear drag ■ composite material casing and rotor ■ main aluminium spool ■ spare graphite spool ■computer balanced rotor ■ titanium roller covering ■ precise monofilament winding system.

Torix FX400 is a solid addition to the TORIX family of reels. FX400 is a reel for demanding anglers who are fully aware of their fishing needs. Precision of assembly and quality of components makes FX400 an excellent tool for every angler. The reel has a partially perforated aluminium main spool and a graphite spare spool. Computer-balanced mechanisms, bail arm roller covered with titanium nitride, high precision of the reel (even under load), and an original look are additional arguments in favour of this choice.

Nordic 110 FD

1 ball bearing ■ multi-disc front drag ■ composite material casing and rotor ■ precise monofilament winding system ■ main graphite spool ■ graphite rotary handle ■ titanium roller covering ■ computer-balanced rotor

Small and light reels intended primarily for fishermen fascinated by winter trips to ice-bound reservoirs. Their main features include a simple and freezeproof structure, reliable operation and durability. Both models have a firm graphite body, a durable and smoothly operating mechanism, and a front drag allowing for stress-free adjustment of monofilament tension to fishery conditions. Nordic 300 will also perform well in combination with a light bolognese or picker rod.

BRAIDER X8 We know that the setup is as strong as it's weakest link. We also know well, that nothing can irritate as much as a line which doesn't meet your expectations. Following this way of thinking, we've created braids that we can fully trust. Braider X8 are produced in heavy quality focused regime, which makes those lines one of most reliable on the market. We know for sure, that our lines won't be that weakest link, in the contrary - they'll be its strongest. Lines had been tested both in fresh and saltwater, and emerged victorious from each test they faced.

Braider X8 Method Feeder

250 158 014	0,14	18,30	40,30

A technologically advanced braided line specially developed for feeder fishing. It is made of 8 tightly braided microfibres, whose chemical composition enables it to sink. It is characterised by its exceptional smoothness and round cross-section, features that are necessary in every fishery in order to achieve long and precise casts. It has a high knot strength and its dark brown colour does not scare fish.

250 150 025	250 012 025	0,25	30,10	66,30

High quality braided line made entirely from Micro Dyneema fibers. Its perfect smoothness reduces any friction on the guides and that enables long and precise casts. The nearly-nil stretch helps to observe even gentlest bites and makes instant hook-setting possible. Thanks to the right choice of the braid's colour, it ideally matches the colour of the water and, being almost invisible, it does not scare the fish away.

250 148 025	250 013 025	0,25	30,10	66,30

For quite a long time there was a myth that there can not be good, universal braid. People didn't believe that these features can be found in one line: strength, rigidness, reliability in different water conditions... but we know, that thanks to new technology and high quality material it is possible to achieve. Work, persistence and experience in matter of lines, weeks of tests gave effect in form of Braider X8 Black. Perfect braiding, eight calibrated strands and long lasting color - this is a simple rule to get excellent line. You'll be convinced since the very first cast!

Braider X8 Bloody Red

color: bloody red

250 149 025	0,25	30,10	66,30

While we developed Braider X8 Red, we followed a 'must' list containing all of expectations which really good lure fishing braid is facing most often. We knew, that compromises are going be the very last thing we will agree to. Therefore, we can safely say that it's a class for its own. Perfectly calibrated strands, tight braiding and color which is easy to see above water, high linear and knot strength - these are the features that make it a perfect choice for all demanding anglers. Additionally, thanks to advance braiding technology, it casts longer and in very silent on the guides. We can assure you, that after checking this line, you won't be looking for any other braid.

250 157 020	0,20	25,30	55,75
250 157 025	0,25	30,10	66,30

High quality braided line for demanding anglers. Characteristic, bright green color, is easy to observe in various light conditions. Braider X8 Lime Green is sharing the same features as other braids available in this family, which is a guarantee of good choice. We strongly advice this braid to those people who like jig fishing the most – any movement of the line is very easy to see.

BRAIDER X4

Strong and reliable braids dedicated for spinning and baitcasting. Available color and size chart allow to easily fish with various techniques: jig, dropshot, texas rig, or classic spinning. Long lasting colors and abrasion resistance, tight braiding which provides smoothness and silent running through guides, are just a few pros of this amazing line.

KEVLON

What are your expectations for braided line? That was the question we've asked each person from our pro staff. Sum of answers from well over a dozen experienced anglers had become our reference point. Shared answers was as listed: good strength, abrasion resistance, long lasting color, specialization of fishing technique, and obviously, price. To combine all of those features seems to be impossible, right? Luckily, we love challenges of that sort. Our passion is to face things that are hard to overcome, think how to solve unsolvable, and finally, enjoy the outcome. This time, definitely we've succeeded. By creating KEVLON family we've achieved range of braided lines which meet the needs of each angler. If you are willing to trust our experience and already field tested technology, get the KEVLON line without hesitation. This series of 8 and 4 braid lines is a perfect balance of strength, quality, technology and price!

Kevlon X8 braided line is the newest braid line in our range. Made with Japanese technology from PE fibers with increased strength, very tight braiding and a slippery surface, makes fishing even easier. Braided lines are available in diameters as small as 0,12 mm up to 0,30 mm on 150 m or 300 m spools. It is up to you to choose the color - olive green or black.

Kevlon X4 Black

The characteristic feature of the Kevlon Black braid is tight and accurate braiding of the fibres and low fading of the colour. This braid will show its outstanding performance in both spinning and bottom fishing techniques. Besides great resistance characteristics, Kevlon Black has round braiding, thanks to which it is relatively quiet on the guides. The range of available diameters will let you find a line for any fish inhabiting our waters

Kevlon X4 Olive Green

If you are not exactly sure how or where you will be fishing, you need the tackle which is kind of jack of all trades. We are well aware of such situations, therefore we've created for you olive green braided line, which will be definitely a strong point of your tackle. Combination of power and resilience, 4 original micro PE strands, color which is masking itself in the water and on the bottom - those are the features which differ excellent product from that mediocre one. All mentioned above are present in our KEVLON Olive Green. Worth to mention, this line is very 'wallet friendly'! Try it once, and you won't be looking for any other.

Sea fishing has its own rules. One of the most basic is to have a line that you can trust. Nobody can guarantee that each time you'll be fishing, you'll break your PB, but we can provide you a line, that will help you to do so. Tight, precise braiding, makes this line resistant for salt water environment. Sum it up with high abrasion resistance, perfect calibration on all the length, good linear and knot strength... If you are looking for a line that will be the strongest point of your setup, you just made a good choice. KEVLON multicolor is exactly that line!

Kevlon X4 Yellow Fluo

color: yellow fluo

150 m Art. no.	⌀		
250 154 012	0,12	10,10	22,25
250 154 014	0,14	14,50	31,95

250 154 018	0,18	17,30	38,10
250 154 020	0,20	22,30	49,10
250 154 025	0,25	29,20	64,30

Spin fishing and baitcasting require specialized line, which will give maximum comfort of use in any conditions. When you are chasing predators, margin of mistake is close to none. This regards both to your tackle, and your skills. We can't increase people skills, but we can give you a tool which will allow you to catch fish more efficient. Time and work invested into development of the KEVLON braids had been well spent, that's for sure. You may ask yourself a question, what is a really good line for lure fishing? Answer is right before you - KEVLON Yellow Fluo. Superior strength, elasticity close to none, giving you ultimate lure feeling... Add to it tight braiding of PE strands and long lasting color well visible above the water, and you'll have shortened description of this incredible line.

Kevlon X4 Orange Fluo

color: orange fluo

150 m Art. no.	⌀		
250 153 012	0,12	10,10	22,25
250 153 014	0,14	14,50	31,95
250 153 016	0,16	15,90	35,00
250 153 018	0,18	17,30	38,10
250 153 020	0,20	22,30	49,10
250 153 025	0,25	29,20	64,30

KEVLON Orange Fluo is sharing almost all of the features with Yellow Fluo, mentioned above. Excluding color, obviously. In certain circumstances(i.e. extremely bright sunlight reflecting on water surface), yellow color is very hard to see. For such conditions, a little darker, intense color is much easier to observe. This assumption had been tested by different anglers fishing for many days on different fisheries in Europe. The answer was pretty much same: KEVLON succeed. We do not create products just to have bigger portfolio, we are creating them for your convenience, and we trust that you will see the difference between KEVLON, and some other lines... Ultimate quality is at your hand.

Streeto Area X8

Streeto Area X8 – the next generation of finesse fishing. Crafted for ultra-light setups and pinpoint presentations, this 8-strand braided line is available in ultra-fine PE sizes. Precision-engineered and purpose-built, it's the perfect choice for trout area fishing, perch fishing, and targeting subtle, wary silver fish species. Whether you're casting micro spoons into a stocked pond or presenting tiny lures to perch, it delivers exceptional sensitivity, smoothness, and control.
■ 8-strand PE construction ■ Exceptional tensile strength ■ Zero-stretch response ■ Precision-tuned

Streeto Fighter Finesse x8

Streeto Fighter Finesse x8 is an innovative braided fishing line designed for demanding anglers who prefer ultra-light spinning techniques. It excels in targeting perch, trout, chub, and ide, delivering unmatched casting precision and range. The braid is coated with a special smooth finish that minimizes friction, resulting in longer and more accurate casts, even with lightweight lures. Its dense eight-strand PE fibers, crafted from premium materials, ensures impressive tensile strength and exceptional resistance to abrasion and mechanical damage, even in harsh conditions.

200 150 018	200 030 018	0,18	4,85
200 150 020	200 030 020	0,20	5,75
200 150 022	200 030 022	0,22	6,65
200 150 025	200 030 025	0,25	8,30
200 150 028	-	0,28	10,30
200 150 030	-	0,30	11,95

An exceptional line with equally exceptional properties. Maximum linear strength, balanced extensibility and no shape memory make Metron Classic Pro the perfect choice for the substantial majority of fishing methods. The colour is barely visible underwater, even in crystal-clear streams, remaining highly visible above the surface.

Metron Specialist Pro Carp & Feeder

color: camou green

150 m Art. no.	Diameter (mm)	Strength (kg)
202 150 018	0,18	5,00
202 150 020	0,20	5,90
202 150 022	0,22	6,70
202 150 025	0,25	7,90
202 150 028	0,28	9,20
202 150 030	0,30	10,80
202 150 035	0,35	13,60

A high-quality line, excellent for any ground fishing methods. Its elasticity has been matched, so that feeder bream biting could be shown without any difficulty from several dozen meters and spurts of a huge carp could be easily absorbed. Its colour is also significant, since it perfectly blends with virtually any bottom.

Metron Specialist Super Spin

color: light grey

150 m Art. no.	Diameter (mm)	Strength (kg)
204 150 016	0,16	3,90
204 150 018	0,18	4,70
204 150 020	0,20	5,70
204 150 022	0,22	6,60

204 150 028	0,28	10,20
204 150 030	0,30	11,90

A large pike or pike perch is a great challenge for both the equipment and the fisherman. Success depends on numerous factors, but the equipment is one of the crucial ones. Therefore, we have created a unique monofilament with no shape memory, characterized by low elasticity and high linear and knot strength and intended for spin fishermen. We recommend it for all those who do not want to be played by a demanding opponent.

Metron Specialist Pro Bolognese

color: light blue

150 m Art. no.	Diameter (mm)	Strength (kg)
214 150 012	0,12	2,55
214 150 014	0,14	3,30
214 150 016	0,16	3,90
214 150 018	0,18	4,75
214 150 020	0,20	5,75

A monofilament line dedicated to bolognese method specialists, allowing for excellent control over a flowing kit. Slight elasticity is a feature which makes every hooking to be successful, regardless of the catching distance. The high smoothness index of this monofilament allows making easy and distant casts. The available diameters will allow matching the proper monofilament line to any fishery.

Metron Specialist Ultra Light Spin

color: transparent

150 m Art. no.	Diameter (mm)	Strength (kg)
203 150 012	0,12	2,55
203 150 014	0,14	3,30
203 150 016	0,16	3,90
203 150 018	0,18	4,75

A monofilament line for demanding spin fishermen using sophisticated techniques. It will perfectly deal with a floating insect wobbler, small wobbler, light jig or spinner. Characterized by the lack of shape memory and exceptionally slippery surface, it minimizes guide friction, enabling the lures to be cast at impressive distances.

Metron Specialist Blue Ice

color: blue

201 050 025	201 030 025	0,25	8,30

Ice fishing is a big challenge for the equipment and for the fisherman's abilities. To go up against the extreme conditions associated with sub-zero temperatures and sharp ice edges, we have decided to create an uncompromising monofilament line dedicated exclusively to this fishing style. Its parameters will remain the same even at -30°C.

Steelon HP HI-Power Fluorocarbon Coated

The fluorocarbon coating has made this monofilament an excellent tool for harsh conditions. The considerably increased abrasion resistance index dedicates it as a spinning monofilament line and for using the quiver tip method. The use of fluorocarbon also enhanced its resistance to chemical agents contained in water. Moreover, it will perform well in mid-river reefs, in which the use of a braid is questioned.

239 150 050	-	-	0,50	17,00

A transparent monofilament without additional dyes: all you can see is the natural polymer colour. Thanks to its characteristics, this line is dedicated to carefully feeding fish living in crystal-clear waters. Trout hunters should pay particular attention to it. Low elasticity will allow using it for spinning and ground fishing at greater distances.

A series of the highest quality monofilaments dedicated to angling experts. The polymer used for the production is a homogenous material strictly controlled in terms of quality, diameter and cross-section. This has resulted in an amazing monofilament line with a perfectly round cross-section and even strength along the whole length. Moreover, this monofilament is protected by an external fluorocarbon coating to maintain high parameters in a chemically aggressive water environment and protection against UV radiation. Another chief asset related to the use of the fluorocarbon coating is the enhanced abrasion resistance and surface smoothness, which has a substantial influence on the increase of casting distance. Seven monofilament types will allow matching a proper line to any fishing method.

Steelon FC Tournament

248 150 030	-	0,30	12,05

A colourless monofilament characterized by extremely high use values. It will perform superbly as a main line or rig line while fishing with pole rods. It will complete its task in relation to any other fishing method with the same efficiency. Having been tested in domestic and European fisheries, FC Tournament has been given only positive recommendations from third party testers. The increased line strength, perfectly balanced extensibility and high resistance to negative effects of weather conditions predispose it as your new number one monofilament line.

232 150 030	232 100 030	-	-	0,30	11,95

A hyper-strong monofilament for demanding fishermen. Characterized by medium extensibility and great power ratio on the knot, it allows for calm fishing with no need of thinking about reeling a medal-winning fish. The colour has been matched so that the line would remain almost invisible in any conditions.
Steelon FC Basic Ice. An ice fishing line has to possess several important characteristics: high abrasion resistance, resistance to sub-zero temperatures, the least visibility under water possible and the strength required to reel in a great specimen from under the ice sheet. You can find all of the aforementioned features in our new FC Basic Ice monofilament line. Test it on a fishery and you will see that when you encounter a huge fish, a high class ice monofilament is indispensable.

Steelon FC Carp & Feeder

color: green

150 m Art. no.	Diameter (mm)	Strength (kg)
244 150 020	0,20	5,90
244 150 022	0,22	6,75
244 150 025	0,25	7,90
244 150 028	0,28	9,25
244 150 030	0,30	10,85
244 150 035	0,35	13,65

A masking-green monofilament line, excellent for carp and feeder fishing. High abrasion resistance, line and knot strength, superb calibration along the whole spool length and a perfectly round cross-section with no shape memory are only a few among its many advantages. If you are looking for a solid and reliable product, you have to check this line.

Steelon FC Match

color: copper

100 m Art. no.	Diameter (mm)	Strength (kg)
238 100 012	0,12	2,40
238 100 014	0,14	2,85
238 100 016	0,16	3,85
238 100 022	0,22	6,30
238 100 025	0,25	7,10

An amazing monofilament line for match fishing lovers. Low extensibility, colour matched so that its spectrum vanishes first underwater, and fast sinking even in murky waters make this monofilament the season's bestseller. A perfectly round cross-section and no twisting tendency constitute the line's further chief assets.

Steelon FC Feeder

color: green

100 m Art. no.	Diameter (mm)	Strength (kg)
237 100 016	0,16	3,95
237 100 018	0,18	5,00
237 100 020	0,20	5,90

233 100 028	0,28	10,40
233 100 030	0,30	12,00

The polymer used in this monofilament is completely homogenous, therefore the same diameter and strength is provided along its entire length. The available diameters will allow choosing a proper item for both chub and ide hunters as well as declared pike and sea trout hunters.

Steelon FC Yellow Fluo

color: yellow fluo

150 m Art. no.	Diameter (mm)	Strength (kg)
246 150 018	0,18	4,90
246 150 020	0,20	5,80
246 150 022	0,22	6,70
246 150 025	0,25	8,40
246 150 028	0,28	10,40
246 150 030	0,30	12,00
246 150 035	0,35	13,95

FC Spin Yellow Fluo monofilament is a top quality product. Thanks to the special production process, it is not characterized by strength loss caused by the fluo dye. The line is excellent not only for catching pike perch, but also for every method including line observation, e.g. in case of fishing in a reef bristling with stones and sticks, and the lure can be lost by a single mistake.

Steelon Fluorocarbon Coated

220 150 050	220 100 050	-	-	0,50	16,90

A highest quality fluorocarbon covered monofilament line. The low elasticity, high line and knot strength, and UV radiation resistance are its main features. It is made of a light grey material refracting the light at an angle similar to the water refraction angle, therefore it is almost invisible.

Steelon Allround Fluorocarbon Coated

color: blue

150 m Art. no.	⌀		
251 150 014	0,14	3,30	7,30
251 150 016	0,16	3,90	8,60
251 150 018	0,18	4,80	10,60
251 150 020	0,20	5,80	12,80
251 150 022	0,22	7,00	15,40
251 150 025	0,25	8,50	18,70

Every enthusiast of float techniques should turn his attention to this particular monofilament. Its low shape memory, high abrasion resistance and medium stretch makes Steelon Allround a truly float-fishing hit. Blue in colour, it perfectly matches the hue of both the water and the sky, enabling you to fish effectively in the midwater level, on the bottom or from the surface alike.

Steelon Match Fluorocarbon Coated

color: brown

150 m Art. no.	⌀		
252 150 014	0,14	3,00	6,60
252 150 016	0,16	3,95	8,70
252 150 018	0,18	4,80	10,60
252 150 020	0,20	5,75	12,70
252 150 022	0,22	6,70	14,75
252 150 025	0,25	8,45	18,60

A line with a above-average practical qualities, addressed to the professionals of the Match technique. Low stretch of this line combined with its higher density guarantees that Steelon Match sinks fast and gives you great hook-setting performance from any distance. The fluorocarbon coating lets the line serve you for longer, makes it more abrasion resistant and raises the level of both the UV-protection and the repellence to chemical agents.

Steelon Method Feeder Fluorocarbon Coated

color: green

150 m Art. no.	⌀		
257 150 018	0,18	4,85	10,70
257 150 020	0,20	5,80	12,80
257 150 022	0,22	7,00	15,40
257 150 025	0,25	8,50	18,70
257 150 028	0,28	10,50	23,15
257 150 030	0,30	12,10	26,65

What should be the qualities of a good line for the quiver-tip method? First of all, low stretch that enables exact bait indication. Moreover, it should have high abrasion resistance, excellent knot and linear breaking strength, as well as good camouflage against the bottom. All of these qualities you will find in our Steelon Method Feeder fishing line.

Steelon Carp & Feeder Fluorocarbon Coated

color: black

150 m Art. no.	⌀		
263 150 020	0,20	5,80	12,80
263 150 022	0,22	6,90	15,20
263 150 025	0,25	8,50	18,70
263 150 028	0,28	10,30	22,70
263 150 030	0,30	12,10	26,65
263 150 035	0,35	15,90	35,00
263 150 040	0,40	21,50	47,35

This black line blends perfectly into background of the bottom. Its characteristic feature is the right stretch coefficient which guarantees that the line will securely hold the fish during the reeling in. Excellent shock and chemical resistance as well as it's imperviousness to sudden runs of the fish makes Steelon Carp & Feeder the right choice for any method in which the bait stays on the bottom.

Steelon World Champion Fluorocarbon Coated

This strong, fluorocarbon-coated line of medium stretch can be used in any fishing technique. It makes a good choice for an all-round fisherman who wants to be ready for any situation that he might face while 'gone fishing'. One of the main advantages of the Steelon World Champion line, which directly makes the casting distance longer and the casts more accurate, is the fact that it virtually has no shape memory.

color: transparent

264 150 030	0,30	12,30	27,10

Steelon Spinning Fluorocarbon Coated

Steelon Spinning makes a great choice when it comes to fishing for predators, regardless if its perch, pike, asp or chub. Low stretch ensures good feel of the bait and lets you set the hook in the right moment, while high abrasion resistance guarantees secure landing of your catch. The colour of Steelon Spinning makes it virtually invisible against both the sky and the water alike.

Fluorocarbon Coated fishing line with improved abrasion resistance and more immune to chemical contaminations of water. This line has high knot strength and thanks to its balanced elasticity guarantees instant hook-ups and easy landing of strong fighting fish. Its light blue colour perfectly suits all fishing spots.

Team Carp

A specialist monofilament line designed and made exclusively for modern ground fishing. Through the use of a new raw material composition, we have increased such parameters as strength and abrasion resistance. It can be purchased in colours well blending into the fishery bottom, which does not attract the attention of even the most suspicious fish. Team Carp line series is characterized by high elasticity, which is indispensable while reeling combative carp family specimens. The monofilament line is velvety soft and perfectly winded on the reel spool, which allows making really distant casts. It is dedicated to enthusiasts of catching large fish belonging to the carp family and available on 1000 and 600 m spools.

KONGER®

FISHING EXPERT

KONGER wobblers are the most popular artificial lures chosen by spinning anglers. Their purpose is to imitate the natural prey of predators, triggering their instinct and provoking an attack. Our offer includes floating, neutral buoyancy, and sinking lures in various sizes and weights. The way they are retrieved is limited only by the user's imagination. With KONGER wobblers, you are sure to return from any fishing trip with more than just a story.

KONGER VIBER
55MM SINKING

NEW!

Konger Viber is a technically advanced, lipless vibe-style crankbait designed for rapid tracking and provoking active predators. The specific design with a back attachment and a flattened, high body ensures that the Viber starts working immediately upon touching the water. It generates an incredibly dense, fine vibration transferred directly to the rod blank, giving the angler full control over the lure's action. The acoustic rattle built inside the body additionally provokes fish, attracting them from a long distance with high-frequency sounds. This is an indispensable weapon for perch, pike, zander, and asp.

Sinking | 55 mm | 0,5-3 m | 13g | #10 x2

POWER CRANK
65MM FLOATING

NEW!

Power Crank is a powerful crankbait designed to generate strong hydroacoustic stimuli. Deep-diving, equipped with a built-in rattle, and featuring a wide, aggressive action, it flawlessly triggers the feeding instinct of the largest predators. The line tie eyelet, shifted forward on a large, strong diving lip, allows the lure to dive instantly and effectively bounce off hard, underwater obstacles. This is an extremely effective weapon for pike, as well as large zander and catfish.

DIVING CRANK
75MM FLOATING

NEW!

Diving Crank is the perfect combination of thoughtful design and flawless craftsmanship. Engineered for the selective fishing of pike and perch, it delivers exceptional results. The 70 mm body is a universal size that will tempt a large, striped perch and will be a morsel that any legal-sized pike will attack with real fury. Retrieving this model yields the best results at a moderate winding speed interspersed with 2-3 second pauses – it is during this phase of tempting buoyancy toward the surface that most aggressive strikes occur.

MR. MINNOW
70MM FLOATING

NEW!

Mr. Minnow is an absolute classic and one of the most versatile crankbaits that should be in every spin fisherman's tackle box. It perfectly imitates a small roach, which is the most common prey of aquatic predators. The precisely selected shape and size of the diving lip allow for flexible fishing in spots of varying depths – simply change the retrieve speed or raise the rod tip higher. Regardless of the water you fish or the species you hunt, this crankbait will bring you closer to success and landing your dream catch.

Floating | 70 mm | 1-2 m | 8,8g | #6 x2

MINI VIB

42MM SINKING

Don't let the size fool you – this compact mini vibe is an absolute killer in both stillwaters and flowing rivers. Its tight, streamlined profile combined with an aggressive fluttering action on the fall makes it instantly noticeable to nearby predators. Available in a wide range of eye-catching color patterns, it effectively mimics an injured baitfish or vulnerable fry – a deadly trigger for predatory species. Perfect for light spinning and ultra-light setups, it starts working from the very first contact with water. Despite its lightweight design, it boasts excellent casting performance and range. Fitted with sharp treble hooks, it's ready to go straight out of the box. This is the go-to lure for tough fishing conditions, when fish respond only to subtle, finesse-style presentations. It performs exceptionally well with both a steady retrieve and a more aggressive lift-and-drop technique. If you're targeting perch, trout, or other active predators – this mini vibe is a must-have in your tackle box.

CHUBBY MINNOW

45MM FLOATING

A deceptive predator hunter – this compact wobbler, available in eight color variations, is a true magnet for perch, chub or trout. The ribbed body delivers strong light reflections, while the 3D eye enhances its natural, provoking appearance. It dives quickly to the strike zone and produces an aggressive action even at slow retrieves. Outfitted with sharp, reliable trebles, it ensures solid hook-ups, even on the most tentative bites. Indispensable when targeting river bends, shoreline structures, or lake flats – anywhere predators are hunting baitfish. An ideal choice for anglers looking for a dependable lure on every trip to the water.

ANGRY MINNOW
105MM FLOATING

Angry Minnow is the unassuming trophy hunter! Not every lure has to scream to be effective. This compact wobbler, with its sleek back profile and eye-catching color variants, was built for anglers who know that fish strike on instinct - not out of mercy. Thanks to its precisely shaped diving lip, it quickly drops to predator depth - no fuss, no delay. Perfect for tough conditions and picky predators. Tested in both still waters and flowing currents. Proven by anglers who don't believe in luck only in performance. If your tackle box is missing that final piece of the puzzle, you've just found it.

Blades PERFECT LURES

Intensive design and testing phases are a reliable guarantee of reaching the highest quality lures. After all, they are not toys or decorations of angling boxes, nor are they ordinary shelf fillers designed for anglers. Lures from the Blades series are designed for fishing in the most difficult conditions and under the greatest challenge. Just take a look to see the obvious quality of their details. After a few casts on a slow day, you will see why they are even necessary for every serious angler. Fitted with high quality hooks, the Blade lures are ready for action straight out of the box. We are confident that they will be quickly classified as a key secret weapon in your lure arsenal.

TORNADO

Proven lure in which the rotating blade is the luring element. This model is equipped with an elongated body thanks to which it mimics perfectly the shape of a small fish. The Blades Tornado emits light reflections and hydro-acoustic waves, making it a lure that is particularly useful in murky waters. It is very effective when retrieved by jigging as well as when led steadily. It combines all the advantages of a traditional spinning blade while not twisting the line.

BOOGIE

Boogie is a small, compact lure, equipped with a tail with a rotating leaf. It is extremely versatile and very effective: it can fish both near-surface areas and deeper parts of the fishery. The Boogie is perfect for regular retrieve as well as for classic fall. Thanks to the high quality swivel, the blade rotates at the lowest speed and emits strong visual signals, stimulating the activity of nearby fish. The available range of colours and masses will allow you to choose something to fish in clean or murky waters, at any depth. Using a twin-hook will reduce the number of snags, allowing you to fish closely in the bottom areas of the fishery

JOKER

A real ace in the deck of hard lures. The "Olympic" type blade has been mounted on a smoothly rotating, ball-bearing swivel, giving an even, seductive action. The body of the Joker was designed so that when the lure is retrieved it will vibrate rhythmically, which effectively attracts fish. The combination of a spinning silver leaf with a vibrating body lures fish from a long distance and results in fierce strikes. Due to the aerodynamic profile of the body, it enables long and accurate casts. The Joker can be fished with a steady retrieve or a combination of a slow retrieve and a controlled drop from the pitch - then the lure behaves like an escaping fish, considerably increasing the predator's luring potential.

CICADA VIBER

This lure is simply essential for any serious angler. All species of river and lake predators attack Cicada furiously, although it is particularly effective for perch and zander. It shows its full potential especially when the fishes are indecisive, or the fish hang inactive in the water column. As often as nothing else works, Cicada can turn the tide in our favour. Using a simple technique of pitching and stoping the lure during retrieve, we will trigger the bite of any predator. Three attachment points allow us to adjust the vibration intensity to the fish's taste on any water.

For years, spinners and spoons, which have been popular among anglers, are reliable lures that are regularly enriched with new designs, innovative design solutions and various color variants. Thanks to this, their effectiveness is constantly increasing, gaining popularity among both beginners and experienced anglers. Classic models, known and appreciated for decades, perfectly harmonize with modern proposals, making it possible for every angler to find something for himself. These lures not only catch the eye with their aesthetic performance, but, above all, they guarantee efficiency in the fishery. All types of metal lures are available in the offer of Konger Champion spinners, which can prove indispensable when fishing in our waters, regardless of the conditions and the preferred species of fish.

A small spoon that allows you to target perch, pike, trout, chub or asp. Designed for fishing in rivers and streams, however, it turned out to be effective also on lakes. Led down by the edges of slopes, reeds and banks, it has been effective in provoking various predators to attack. The range of sizes available will allow you to choose the right size lure for virtually any fishery.

FLYING SPOON 3421

342 121 000	2	14,0	54	6
342 131 000	3	17,0	57	4

This spinner is a successful marriage of flyability and fishability. It was created for fishing in the current of rivers and streams for trout, chubs and asps and has amazed with its effectiveness on deeper parts of lakes. We recommend retrieving it alternately, i.e. two or three quick turns and then letting it drop by about a metre. This type of fishing has shown its effectiveness with almost every species of predator. A natural feature of this lure is its high flyability and accuracy, which, after a few test casts, makes it possible to effectively cast it at practically any spot.

KASTMASTER 3801

Art. no.	Weight (g)	Art. no.	Weight (g)
380 100 035	3,5 g	380 150 280	28,0 g

380 140 210	21,0 g	380 190 770	77,0 g

KASTMASTER is a very effective, easy-to-use lure. Its aerodynamic shape allows making distant casts and serving the lure without scaring away careful predators. The lure operation is really aggressive and provocative, thanks to which all species of predatory fish are easily lured. Wear resistance is Kastmaster's great advantage. They are precisely cut from solid brass, thus are almost indestructible and highly resistant to both fresh and salt water. Kastmaster is particularly effective for catching asps.

A chunky body, a large tail and a design made to the smallest detail makes this lure look deceptively like a live fish. Sometimes the appearance and action of the lure alone is not enough, so the additional attracting factor of this lure is a scented attractor. The great care taken in the production translates into a realistic action, which, as you might have guessed, was immediately appreciated by the fish, who reacted with numerous bites during the first days of testing. Venom is available in a wide range of colours and sizes, including the particularly catchy ones you know from other lines of Konger elastics.

Many months of laborious work, trials and tests finally brought the expected result. Power Pike is a lure dedicated mainly to fishing big pikes, but tests showed that not only they liked this lure. The elongated and slender body in combination with the appropriately shaped tail ending in a "hoof" and the structure of the silicone give this lure an extremely attractive action. Even when retrieved slowly, the Power Pike stirs the water with its tail very widely, attracting even the most hesitant predators. As if that wasn't enough, it also works interesting vertically, when left motionless it shimmers deceptively like a live fish penetrating the water. Power Pike are incredibly effective even with minimal weight. We recommend using a jig head or a system with a jig reel. Available in 11 cm, 14.5 cm, 17.5 cm and 22 cm sizes and in twelve carefully selected colours, you can match the lure to any fishery, whether you are spinning by hand or trolling. After a few seasons filled with numerous successes with pike fishing with these lures, we noticed that zander and perch are interested in their smaller sizes. This prompted us to prepare the smallest, eleven-centimetre model of this fishable lure. The lure is recommended by Team Konger.

Large silicon lures have found their way into anglers' tackle boxes for good, so we have prepared a "little" something for big predators. This rocking ripper, available in 6 cm, 9.5 cm, 12.5 cm and 16.5 cm sizes and in a dozen of colours selected by our testers, caused a lot of commotion already in the first phase of testing. Numerous pikes and zanders reported to the landing net dispelling all doubts and answering the question if these lures will work, if they will be better than others. The thin tail ending in a large "hoof" gives the FLAT SHAD a very dynamic action. When the weight is less than 7 g the ripper slowly and widely sways to the sides. Increasing its weight gives a more aggressive action. The FLAT SHAD is also an excellent trolling lure. The two larger models should be additionally rigged, as they are very often attacked even by barely larger pikes. Believe us, there are no clever pikes for our FLAT SHAD. You can also use it to effectively fish for big perch, especially now that we have extended the range of these lures with a 6cm model, which is very popular with striped predators. Among the three new colours you will also find darker lures that complement this series of lures. The lure is recommended by TEAM KONGER.

A lure with a very wide range of possible use. The 5-centimetre version is an effective lure for perch, the 7,5-centimetre model lets you catch zanders, 8,75-centimetre and 12-centimetre Blinky is the right choice for every pike fishing enthusiast. What is even more interesting, the scent used on our baits provoked attacks of decent-sized catfish. That is why we recommend rigging the biggest Blinky Shad with a heavy jig head and to give it a try in the river holes and bends.

The lure size, operation and colours have been tested in numerous fishing grounds. The smallest sizes superbly lures perches, whereas the bigger ones are literally "killers" of pikes and pike perches. The lure works well both on light and heavy jigheads. The Grubber's body is notched for fitting by an offset hook.

Perch above 40 cm is a really good catch. Anybody who can catch those on purpose is some sort of fishing professor. To give an upperhand to anyone trying to reach this level of fishing, we have prepared this lure. Seems familiar, but same time, different... Ribs on the body creates specific water turbulences – believe us, perch love it. Short, curly tail wiggles in most provoking way, irresistible for the fish. Worth to mention, is this lure scent – believe us it's impossible to forget. Add to this list carefully selected color chart, and 2 typical perch sizes. Well, it's the shortest recipe for fishing success.

Four different sizes, a wide spectrum of colours and simply excellent tail action at the slightest lure movement will allow hunting for virtually any predator living in our waters. The 6-centimetre Big Tail has appeared to be the favourite perch dish, whereas the largest 14-centimetre model was viciously attacked by pikes and catfish. Two intermediate sizes are perfect for luring zanders.

What should be a trademark of a perfect softbait? First of all it has to ensure bites. Moreover, it must have a high stretch resistance and a broad spectrum of available colours and sizes. All those features are combined in this new Grubber Shad Skinny. The five-centimetre version is an unbeatable perch lure, that lets you catch even the most cautious specimens. The 7,5-centimetre model effectively lures big perches and zanders in all polish fishing grounds.

Very effective bait made from soft silicone. The characteristic elastic tail makes Vertical Minnow equally powerful in luring predator fish in the classical spinning techniques as well as during the free-fall to the bottom. The bigger size is simply perfect for hunting big zander, pike or a decent sized perch. The bait can be rigged up with a classic jighead, a football jighead or with an offset hook – in any of these combinations Vertical Minnow stays constantly effective.

Art. no 401 028 008

Cod Rig "Octopus" No 12

leader: ⌀ 0,6 mm, snood: ⌀ 0,5 mm,
rig length: 80 cm, snood length: 15 cm,
hook: 6/0,
Color: yellow orange + pearl yellow
Art.no 401 030 012

SEAKON

Cod Rig “Tube” No 14

leader: ⌀ 0,6 mm, snood: ⌀ 0,5 mm,
rig length: 80 cm, snood length: 15 cm,
hook: 6/0, Color: japanese red + black
Art.no 401 030 014

Cod Rig “Tube with hair” No 25

leader: ⌀ 0,6 mm, snood: ⌀ 0,5 mm,
rig length: 80 cm, snood length: 15 cm,
hook: 2/0, Color: tube japanese red
+ japanese red hair
Art. no 401 030 025

Surf hook catch No 1

Method MAN

MethodMan – for anglers who fish with passion! Fishing is more than just a hobby – it's a series of moments filled with excitement, tranquility, and adrenaline that stay in your memory for years to come. MethodMan was created to support you during these extraordinary moments. Our products, designed specifically for feeder and method feeder techniques, combine durability, aesthetics, precision, and ease of use, so you can fully focus on the joy of fishing. Reliable rods and reels, along with well-designed and thoroughly tested accessories, ensure that every trip to the water is a success. With MethodMan, every bite brings a thrill, and every fish caught proves the wisdom of a good choice. We proudly give in your hands a tackle that allows you to fully enjoy this beautiful passion. Trust MethodMan and rediscover the art of fishing!

MethodMan Essential Picker

MethodMan Essential Method Feeder

MethodMan Essential Method Feeder Specimen

MethodMan Essential Picker

Is a new to the market, versatile rod in two lengths of 240 and 270 cm and a casting weight of 10-35 g, consisting of 2 main sections and 3 interchangeable tips. Robust construction and high quality materials ensure durability, while the interchangeable tips allow you to adapt to different conditions of fishing - from light to medium-sized sets. The ergonomic handle guarantees comfort and the lightweight design does not tire the hand. This rod should be the first choice for those who value precision and versatility in feeder fishing. Available in angling shops, it offers good quality at an affordable price.

MethodMan	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transport length (cm)	Number of elements
Essential Picker 240/35	810 001 240	240	10-35	138	125	2+3
Essential Picker 270/35	810 001 270	270	10-35	147	140	2+3

MethodMan Essential Method Feeder

Rod is the specially designed for method feeder enthusiasts. Its length and casting weight allow for efficient fishing at various distances. The rod consists of 2 sections and a set of three interchangeable tips with different casting weights, providing a good balance between strength and sensitivity. Made from high strength carbon mat's, it guarantees great bent, lightness and strength. The Essential Method Feeder is designed for fishing mainly on stillwaters where it is perfect for catching fish such as carp, bream, tench and roach. If you are looking for a versatile rod for precise casting and effective reeling in, this option should interest you.

MethodMan	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transport length (cm)	Number of elements
Essential Method Feeder 300/50	810 003 300	300	15-50	167	154	2+3
Essential Method Feeder 330/50	810 004 330	330	15-50	206	169	2+3

MethodMan Essential Method Feeder Specimen

The rod with a length of 300 and 330 cm and a casting weight of 20-70 g is another option for method feeder enthusiasts. The rod enables comfortable fishing on medium and long distances and its casting weight allows the use of heavier feeders. It's perfect for fishing in still waters where long casts and hauling larger fish such as carp or grass carp are required. The Essential Method Feeder Specimen is a rod that will satisfy both beginners and experienced anglers looking for reliable method feeder tackle.

MethodMan	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transport length (cm)	Number of elements
Essential Method Feeder Specimen 300/70	810 005 300	300	20-70	174	154	2+3
Essential Method Feeder Specimen 330/70	810 006 330	330	20-70	211	169	2+3

MethodMan Essential Classic Feeder

MethodMan Essential Distance Feeder

MethodMan Essential Pellet Waggler

MethodMan Essential Classic Feeder

It's a series of two rods with progressive action for fishing with the classic feeder. Varying lengths and casting weight up to 90 g allow them to match the conditions of most fisheries, such as lakes, canals and slow-flowing rivers. In combination with a well-matched reel, they enable the landing of even very large fish such as carp or bream on relatively light setups. The rods consist of three sections which guarantees convenient transport and storage. An ideal choice for anglers looking for reliable equipment for fishing with the classic feeder method.

MethodMan	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transport length (cm)	Number of elements
Essential Classic Feeder 330/90 g	810 007 330	330	30-90	198	116	3+3
Essential Classic Feeder 360/90 g	810 008 360	360	30-90	215	126	3+3

MethodMan Essential Distance Feeder

Is a high-tech feeder with a maximum casting weight of up to 120 g. It is a key piece of equipment for feeder fishing enthusiasts who require reliable and powerful equipment to catch big specimens. Available in two lengths - 360 cm and 390 cm - it allows you to tailor it to your individual preferences and fishing conditions. The modular design with three sections makes it easy to transport and organise your gear, which is invaluable during fishing expeditions. Combined with well-chosen other elements of the MethodMan Essential Distance Feeder set, it guarantees the control and power needed to successfully haul even the biggest fish, such as carp or grass carp. The robust construction and the precision of the workmanship make it an excellent choice for experienced anglers who expect the highest quality feeder equipment.

MethodMan	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transport length (cm)	Number of elements
Essential Distance Feeder 360/120 g	810 009 360	360	40-120	192	125	3+3
Essential Distance Feeder 390/120 g	810 010 390	390	40-120	216	135	3+3

MethodMan Essential Pellet Waggler

The rod is an excellent choice for anglers who prefer the pellet waggler technique. The rod that consists of two sections, making it easy to transport and store. Thanks to its construction, this rod is lightweight and handy, allowing you to fish for long hours without excessive hand and wrist fatigue. Constructed from carbon fibre, it has the proper bent and strength while remaining lightweight. They are ideal for float fishing, where dynamic flipping and pulling up the bait is key. The 300 and 330 cm length allows the bait to be cast precisely to the desired location, and the casting weight range of 4-16 g allows a variety of baits to be used. If you are looking for a rod that is well-balanced and provides full control of the fish you are hauling, especially when landing, then this model will be the right choice.

MethodMAN Feeder PG 855 FD

NEW!

SERIES 800

FRONT DRAG FD

BALL BEARINGS 7+1

7 ball bearings, 1 roller bearing ■ front multi-disc drag ■ reinforced PG-type gear with a low gear ratio ■ body and rotor made of reinforced graphite ■reinforced stainless steel main shaft ■ aluminum handle screwed into the drive gear ■ precise main drag with micro-adjustment ■ aluminum main spool ■two line clips on the spool ■ slow oscillation system

The new reel from MethodMan is an advanced design created for demanding Feeder and Method Feeder enthusiasts. At the heart of the mechanism is a robust, low-gear transmission which, combined with an 8-bearing system (7+1), guarantees buttery smoothness and immense cranking power under heavy loads. A heavy-duty stainless steel main shaft prevents lateral deformation during intense fights. The key to extremely long casts lies in the shallow, tall spool and flawless line lay. This is delivered by the Worm Shaft oscillation system and slow oscillation, which create a perfectly dense wrap at an optimal 4.7:1 gear ratio. The aluminum spool features two line-friendly clips, allowing you to fish at two different distances. Total control over hard-fighting fish is guaranteed by a precise Quick Drag system - just a short turn of the knob switches to full stopping power. The build is completed by a thickened, tubular bail wire and a screw-in aluminum handle, which completely eliminates any play. Comfortable use in all conditions is ensured by an ergonomic T-shape knob.

WARRANTY 5 YEAR

SERIES 900

FRONT DRAG FD

BALL BEARINGS 8+1

8 ball bearings, 1 anti-reverse bearing ■ multi-disc front drag ■ stainless steel worm shaft ■ computer balanced rotor with Anti-vibro system ■ Quick Drag System ■aluminum main spool ■ two line clips on the spool ■ aluminium CNC handle ■ slow oscillation spool system

The reel is equipped with 8 ball bearings and one roller bearing, ensuring smooth operation and high durability under demanding conditions. It features a quick drag adjustment system, which performs excellently when playing powerful fish. The reel has a stainless steel main gear and a reinforced worm gear responsible for excellent line winding. The aluminum spool is equipped with two clips for securing monofilament or braided line. The body is made of pressed graphite, making this strong reel surprisingly lightweight. The rotor is computerbalanced with an Anti-Vibro system, minimizing vibrations and ensuring smooth and consistent performance even under significant load. The ergonomic handle provides a comfortable grip in all conditions. In summary, this is an ideal feeder reel that, interestingly, is also resistant to saltwater.

LITE FEEDER 830 FD

SERIES 800

FRONT DRAG FD

BALL BEARINGS 7+1

7 ball bearings, 1 anti-reverse bearing ■ carbon body and rotor ■ aluminium main spool ■ multi-disc front drag ■ two line clips ■ carbon double handle

We have equipped this reel with 7 ball bearings and 1 roller bearing, ensuring smooth operation and precise line winding, as well as reliable support for all key mechanisms. It features a carbon body and rotor, providing high durability while maintaining a low weight. The aluminum main spool, with perfectly selected capacity, allows for the use of both braided and monofilament lines. The precise, front multi-disc drag enables quick and accurate adjustment of the braking force. It is equipped with two spool clips and a double handle made of carbon composite, ensuring comfortable use. This reel is an ideal choice for demanding anglers specializing in modern fishing techniques such as picker, light feeder, method feeder on smaller reservoirs, and enthusiasts of pellet waggler fishing.

MethodMan Lite Feeder	Art. no.	Ball Bearings	Gear ratio	Weight (g)	Main spool	Spare spool	Line diameter, main spool capacity (mm/m)	Power drag (kg)

Stealth X9 Feeder Dark Brown

150 m Art. no.	Diameter (mm)	Strength (kg)	PE #
810 150 010	0,10	8,3	0,6
810 150 012	0,12	10,5	0,8
810 150 014	0,14	12,9	1,0

The MethodMan Stealth X9 Feeder Dark Brown Sinking braid was specially designed for the feeder method. Made of nine tightly woven microfibers, it has sinking properties which is essential when fishing with this technique. It is characterised by its exceptional smoothness and round cross-section, which is essential to achieve long and precise casts. In addition, its high knot strength and dark brown colour, which does not scare fish, make it the choice of many anglers who value quality and efficiency. If you are looking for a reliable braided line that will give you an edge in fishing, Stealth X9 Feeder Dark Brown is definitely worth considering.

Stealth X9 Feeder Bright Red

150 m Art. no.	Diameter (mm)	Strength (kg)	PE #
810 151 010	0,10	8,3	0,6
810 151 012	0,12	10,5	0,8
810 151 014	0,14	12,9	1,0

The MethodMan Stealth X9 Feeder Bright Red Sinking is available in the most popular sizes, ranging from 0,10 mm to 0,14 mm, with an optimal length of 150 m. Designed specifically for feeder fishing enthusiasts, this high-quality braided line is crafted from nine precisely woven microfibers, ensuring excellent sinking properties and remarkable strength. In addition to its durability, this line stands out for its exceptional knot strength, smooth texture, and perfectly round profile, making it a pleasure to handle and use. Whether you're targeting smaller fish or tackling more challenging catches, the Stealth X9 Feeder Bright Red Sinking is a reliable choice that combines effectiveness with ease of use, ensuring an enjoyable fishing experience.

Iridium Feeder Green

150 m Art. no.	Diameter (mm)	Strength (kg)
811 151 016	0,165	3,95
811 151 018	0,185	5,00
811 151 020	0,205	5,80
811 151 023	0,230	6,45
811 151 026	0,260	8,25
811 151 028	0,285	9,50
811 151 030	0,305	11,15

MethodMan Iridium Feeder Green Sinking monofilament is the product for anglers who value quality and reliability. This line settles quickly on the bottom, which is crucial when using the method feeder technique. It features abrasion resistance, which is important when dealing with different bottom structures. The lack of shape memory means the line does not twist and retains its characteristics even after repeated use. The green colour blends well with the colour of the vegetation, making it less visible to fish. It is an excellent choice for advanced feeder anglers looking for a reliable and durable product.

Iridium Feeder Brown

150 m Art. no.	Diameter (mm)	Strength (kg)
811 150 016	0,165	3,95
811 150 018	0,185	5,00
811 150 020	0,205	5,80
811 150 023	0,230	6,45
811 150 026	0,260	8,25
811 150 028	0,285	9,50
811 150 030	0,305	11,15

MethodMan Iridium Feeder Brown Sinking line is an offer for anglers looking for a reliable line for feeder method. Offered in diameters from 0.165 mm to 0.305 mm and a length of 150 m, this line should be appreciated primarily for its sinking properties. High knot strength is another key feature for feeder lines, ensuring safety when reeling in a larger fish. Its low stretchability allows for excellent bite detection and precise hook sets. The lack of memory means that the line does not twist and retains its properties even after many trips. This monofilament is an excellent choice for anglers who are looking for a reliable, durable and well camouflaged monofilament for feeder methods.

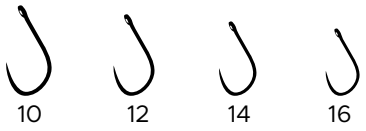

MethodMan Hooks are designed for anglers seeking the optimal balance of strength and subtlety. Made from premium-grade steel, these hooks deliver exceptional durability. The MicroBarb ensures secure fish grip while minimizing damage to the fish's mouth. Their grey finish blends seamlessly with the bottom, reducing the chance of spooking fish. The Barbless version, ideal for catch-and-release enthusiasts, eliminates the barb, making hook removal easier while minimizing stress and potential harm to the fish. All MethodMan hooks are crafted with modern feeder fishing in mind. Their specific features—such as shape, micro barb or barbless options, and discreet color—make them the perfect choice for anglers of all skill levels.

Method Feeder Leaders with X8 braid.

Length 10 cm. 6 pcs

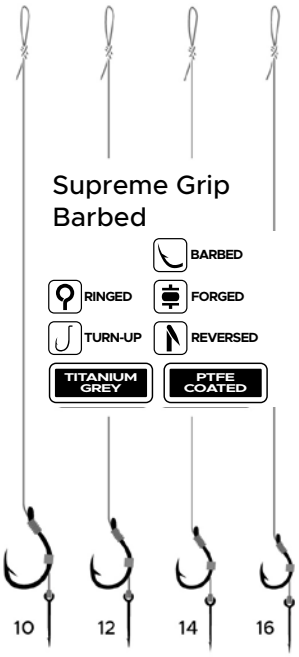

MethodMan Feeder Leaders are rigs designed and created with the aim of presenting the bait naturally during method feeder fishing. They ensure the highest quality craftsmanship thanks to sharp and durable hooks that guarantee secure hooksets, as well as strong lines or braids resistant to tough conditions. Each rig is equipped with a needle for quick bait attachment or a 3-millimeter silicone ring, which significantly simplifies the setup process. These rigs are versatile and suitable for all anglers. For beginners, they provide a simple and reliable solution to create an effective setup, while experienced anglers will appreciate their precision and durability. MethodMan Feeder Leaders enable a natural and attractive bait presentation, which can significantly increase the number of bites. Whether you're fishing for bottom-feeding fish in lakes or rivers, MethodMan Feeder Leaders ensure reliability and performance. The ease of use means you'll spend less time on preparation and more time enjoying your fishing experience.

MethodMan Classic feeders are high-quality accessories designed for fishing with a classic feeder technique. They provide repeatability and precision in delivering the bait to the chosen place of the fishery. Made of durable wire, the feeders are resistant to damage and ensure long-lasting use. Their construction allows rapid spreading of the bait, concentrating the fish at the point of baiting. The Long Cast feeder baskets feature specially shaped weights designed to enable exceptionally long-distance casts. Whether you're fishing in a large lake or a small river, you'll find the right size for yourself. It is a reliable piece of equipment for amateurs and professionals alike.

Method Feeder Interchangeable Zinc Size M

■ 55x32x78 mm, weight 30 g
Art. no 810 201 230 pack. 1 pcs
■ 55x32x78 mm, weight 40 g
Art. no 810 201 240 pack. 1 pcs

A ready-made rig with a zinc method feeder featuring a quick-change system, a hook-length made of strong, soft braid, and a well-matched hook paired with an imitation floating corn grain. Just tie it to the mainline, fill the feeder with pellets or method mix, and you're ready to fish in just a few moments. An excellent choice for beginners and for anyone who doesn't want to waste time by the water assembling a rig from scratch.

The latest baskets designed with 3D technology. Their unique construction ensures bait adheres perfectly to the basket, even during extremely long casts. A flight stabilizing stem with fins keeps the basket steady during flight, thanks to which we can make extremely long casts.

Distance Extreme 140mm Elasticated Fin
Art. no 810 201 101
pack. 2 pcs

The Distance Extreme 140 Elasticated Fin allows you to transform MethodMan Interchangeable Zinc, Flat Feeder, Method Feeder Hypercast feeders, as well as Feeder Bomb QSS weights, into their extreme distance versions, designed for reaching significantly longer ranges. Additional benefits include increased casting accuracy and flight stability, as well as shifting the pickup point of the main line—an advantage when targeting wary, cautiously feeding fish. The built-in strong shock absorber allows the use of delicate hooklengths, further improving efficiency in challenging fishing conditions.

MethodMan distance sticks - an indispensable tool for precise measurement of the distance at which we will be fishing. Made of durable materials, they are convenient and easy to use. These distance sticks provide the repeatability and precision you need to improve your fishing performance.

MethodMan Feeder Master D25 Chair
Art. no 810 210 037

The MethodMan Feeder Master D25 is a solid and precisely engineered chair designed for demanding feeder anglers. Its steel frame ensures maximum rigidity and stability, while the adjustable rear and extendable front legs made of 25 mm aluminum tubes allow perfect leveling on any terrain. Oversized plastic feet mounted on ball joints prevent sinking into soft ground, guaranteeing comfort and security during long sessions. The seat, made of waterproof 210D fabric with soft foam padding, provides excellent comfort even during extended time by the water, while the adjustable backrest allows you to tailor your sitting position to personal preference. Fully compatible with all common feeder arms, rests, and side trays on the market, it serves as a universal base for any setup. For easy transport, the chair comes equipped with a sturdy shoulder strap — the perfect companion for every fishing trip.

MethodMan Super Square 250 cm
Umbrella
Art. no 810 210 050

The MethodMan Super Square 250 cm umbrella offers reliable protection and comfort in all weather conditions. Built on a strong fiberglass frame with 8 mm ribs, it combines impressive wind resistance with lightness and ease of handling. The black steel main frame and pole ensure strength and durability, while the long-handle tilt mechanism allows adjustment of the canopy angle to 45° or 90°. A special triangular canopy cut improves stability and coverage, and two rear D-rings enable secure anchoring in strong wind. The Velcro closure system makes opening and packing quick and easy, while the included heavy-duty carry bag ensures safe storage and convenient transport.

Ribs	Fabric	Tilting the canopy
8mm fiberglass	210D with PU coated seams	45° 90°

Rectangular fishing net Tournament
400 cm length x 50cm width x 40 cm height
Art. no 810 210 028

Rectanguar tournament fishing net with pole attachment. Ideal for fish storage. The length of 4 meters provides enough space and ensures easy access to the water, making it an excellent choice for professional anglers. Solid construction and durability of materials guarantee long and safe use.

Fast Fold basket 55 cm length x 45 cm width
depth 35cm, eye 8mm, rubberized
Art. no 810 210 038

An exceptionally lightweight landing net head, equipped with a rubber-coated, soft mesh and a mechanism that allows for quick folding. Simply press the button located on top of the head to fold it in half with one motion. The standard thread makes it compatible both with the MethodMAN handle and with most other handles available on the market.

Landing Net Basket Maniak 60 cm length x 50 cm width
depth 40 cm, mesh 6 mm, rubber net
Art. no 810 210 027

An excellent landing net basket with a thread compatible with MethodMan landing net handle as well as other models available on the market. The optimal dimensions of 60x50 cm and a depth of 40 cm ensure ease of use and allow you to safely land even the largest specimens. The safety of your trophy is guaranteed by a rubber coated mesh with a 6 mm mesh size.

Put-Over Landing Net
Handle
4 m/4 sections
Art. no 810 210 026

A top-quality carbon fishing Put Over Landing Net Handle, exceptionally lightweight and durable, designed with the most demanding anglers in mind. The handle measures only 115 cm when folded, making it extremely convenient to transport. When fully extended, it reaches an impressive length 400cm, allowing for easy fish landing even from a greater distance. The handle is designed for maximum user comfort, featuring a non-slip surface that ensures a secure grip even in harsh weather conditions, allowing precise and confident fish landing.

Adjustable Case X2 120-175 cm
MethodMan
Art. no 810 210 054

NEW!

The innovative, rigid METHODMAN X2 case is an excellent solution designed for maximum equipment protection and full comfort by the water. Its well-thought-out telescopic construction with a clear centimeter scale allows smooth and precise length adjustment from 120 cm to 175 cm, perfectly matching the transport dimensions of your rods. A unique feature of this model is the built-in, foldable tripod stand, which completely solves the problem of finding something to lean your gear against — thanks to its stable legs, the case can be conveniently stood on any surface, protecting it from mud and damage. The armored, rigid construction, made from a waterproof, easy-to-clean carbon-textured material, effectively protects blanks and guides from impact during transport. The case is also fitted with a spacious external pocket with a sturdy zip closure, ideal for storing essential accessories. High carrying ergonomics — thanks to a strong hand grip and adjustable shoulder strap — complete the package, making the METHODMAN X2 an indispensable piece of equipment for every demanding angler.

Rod cover Rod Hold
165 cm, 2 pockets
Art. no 810 210 024

The MethodMan rod cover is perfect for transporting and storing fishing gear! With two spacious compartments, a reinforced bottom, and a comfortable transport strap with soft padding, it ensures ease and comfort during transport while keeping your rods safe. The cover is finished in distinctive black and orange colors that highlight the MethodMan brand.

Reel cover Rigireel
18x16x8 cm
Art. no 810 210 013

Reel case Reelrig M
25x16x12 cm
Art. no 810 210 011

The MethodMan covers will protect your reels from scratches, dirt, water, and any other elements that could damage them during transport. With strong, reliable zippers and durable material, these covers are built to last through many fishing trips. Two different sizes allow for safe storage of all reels in the MethodMan family, as well as other valuable fishing reels.

Carryall Medium bag 25 L 42x28x22 cm
Art. no 810 210 014

The MethodMan multifunctional transport bag is perfect for storing all kinds of fishing accessories. Made from durable, thick, and waterproof material, it is easy to clean and practical to use. A large front pocket for various accessories makes it an excellent choice for both fishing competitions and private fishing sesions. The bag features a comfortable shoulder strap for easy transport. It features a durable double-sided zipper for easy access to the contents. Practical, sturdy, and stylish – a must-have for every angler!

Cool Bag 12 L
28x21x21cm
Art. no 810 210 003

The MethodMan thermal bag with a 12-liter capacity is perfect for grocery shopping, travel, or picnics. Practical and handy, it's designed for transporting and storing equipment, bait, and perishable food. Made from durable, water-resistant, and wear-resistant material, its interior is lined with a special heat-reflective layer, making it an excellent thermal insulation bag. To keep a low temperature inside the bag, it's recommended to use ice packs.

EVA net cover
55x17x50 cm
Art. no 810 210 030

Durable and waterproof fishing net case made of high quality EVA material, provides protection for your equipment and makes it easy to transport wet nets after fishing. Its dimensions of 55x17x 50 cm, provide plenty of space for nets as well as other accessories. It easily fits to work with 4m nets. The smooth surface of the EVA material makes it easy to clean. It is lightweight, making it easy to carry and transport. An ideal product for anglers who value order and neatness in their fishing gear.

EVA bait set with sieves
2 mm and 3 mm
Art. no 810 210 031
height 14cm x ⌀ 30cm

Introducing the MethodMan EVA bait set - a complete kit for any angler who wants to successfully bait his fishery. Made of durable EVA material, the MethodMan set is handy and easy to clean. The set includes two sieves, with eye size 2 and 3 mm for convenient prepairing of the groundbait, and soaking the pellet.

Bait bag with 4
containers Bait Combo
21x21x16 cm, jars 1L
Art. no 810 210 023

Bag perfect for storing bait such as pellets or method mix! The set includes four 1-liter plastic containers that ensure convenient and safe storage. The bag is made from easy-to-clean, waterproof material, and the transparent lid allows for quick viewing of the contents. Ideal for any angler who values organization and functionality!

Baitbag 10 L
25,5x21 cm
Art. no 810 210 015

MethodMan Bait Bag – an essential companion for every fishing trip! With a 10-liter capacity and compact dimensions this bag is perfect for wetting, mixing, or transporting ground bait directly to your fishing spot. The waterproof material protects the contents from moisture and weather conditions, while the sturdy, double-sided zipper and comfortable handles ensure easy transport. Durable, practical, and stylish – the perfect choice for every angler!

EVA bucket with line and mesh 7 L
20x20x18 cm
Art. no 810 210 010

It is the perfect solution for anglers who value convenience and functionality. Made from durable EVA material, the bucket is lightweight, flexible, and easy to carry. Thanks to its design, it takes up minimal space, making it the perfect companion for any angling expedition. The set also includes a practical line for easy lowering and lifting of the bucket from the water, as well as a sieve which prevents leafs or weeds from being poured in.

EVA bait box with strainer
16x16x10 cm
Art. no 810 210 029

Spike pack. 10 pcs
- 7 mm x ⌀ 0,6 mm Art. no 810 300 000
- 5,5 mm x ⌀ 0,6 mm Art. no 810 300 002
- 10 mm x ⌀ 0,6 mm Art. no 810 300 001

A special spike that is an essential accessory when fishing with a method feeder. Definitely makes it easier to mount the bait. Simply insert the bayonet into the wafter or pellet, lock the barb and you are ready to cast your rig. The Methodman method feeder bait bayonet with connector are offered in three lengths 5,5 mm, 7 mm and 10 mm.

Feeder Link Mono pack. 2 pcs
- 4 cm Art. no 810 302 000
- 8 cm Art. no 810 302 001

The MethodMan Feeder Link Mono is a set of two feeder links for attaching the feeder in a running rig setup. Made from rigid polymer material, it reduces the risk of the rig tangling. Another advantage of this solution is the increased sensitivity of the setup – during a bite, the fish does not feel the weight of the feeder, allowing it to take the bait confidently.

Semi Running Feeder Rig

Art. no 810 210 005

A two-piece box. Designed to make the preparation of pellets easier, it allows for proper moistening. Made of durable materials, provide enough space to soak even larger quantities of pellets. Ergonomic design and leak-proof lid guarantee convenient use. Ideal for any angler who wants to prepare pellets quickly and efficiently on the water.

Hand Towel 30x40 cm
Art. no 810 210 008

Clean and dry hands are the basis, knows this everyone who has at least once put bait on a hook or prepared groundbait. We give you a specially prepared quickdrying towel for this purpose. It will certainly come in handy on the fishery.

Unhooking Combi Mat
90x45 cm
Art. no 810 210 009

Designed specifically for quick fishing trips, not just for carp fishing, for anglers who enjoy traveling light while caring for the welfare of the specimens they catch. The Combi Mat MethodMan unhooking mat makes no compromises when it comes to fish protection. Equipped with soft, comfortable padding, it allows excess water to drain away and provides a safe place to hold the fish during measurements. It's the perfect resting spot for the fish before its return to the water

Carp accessories Starter 3

bag: each size 5 pcs

Tulip Bead
bag 10 pcs
Art. no 960 000 103

■ A special bead for pass-through kits assembly. It may also serve as a knot cover

Rubber Tube
ø6,0 mm, length 25 mm
bag 10 pcs
Art. no 960 000 148

■ A spare element for the back lead system.

Safety Sleeve Bead
length 24 mm.
bag 5 pcs
Art. no 960 000 147

■ Intended for run rig and self-hooking kits and easy release of a weight in case of the weight's hooking.

Buffer bead
length 15 mm
bag 10 szt
Art. no 960 000 136

■ It protects a crucial point connecting the swivel with the leader, used also for helicopter rig construction.

Silicone Soft Bead
■ ø1,2x8 mm
Art. no 960 000 152
bag 10 pcs

■ Protects the knot against damages. Made of a soft material.

Bullet Bead
■ ø 6,0 mm, length 12 mm.
Art. no 960 000 144
■ ø 6,0 mm, length 17 mm.
Art. no 960 000 145
bag each size 10 pcs

■ A strong element properly protecting the knot during dynamic casts.

Back Lead Clip
length 40 mm.
bag 3 pcs
Art. no 960 000 143

■ Allows for very fast conversion of any weight with a swivel into a back lead.

Rubber Cover
Color green
■ ø 2,0x6 mm, length 21 mm.
Art. no 960 000 134
■ ø 2,5x6 mm, length 25 mm.
Art. no 960 000 135
bag each size 10 pcs

■ An element allowing for proper closing of a weight clip.

Long body rolling swivel
Color BLN
■ size 4.
Art. no 960 000 157
bag 10 pcs

■ A strong rolling swivel with a lengthened body

Long Body Rolling Swivel with Solid Ring
Color BLN
■ size 4.
Art. no 960 000 149
■ size 7.
Art. no 960 000 150
bag 5 pcs

■ Dedicated to the construction of stiff rigs.

Pass-through Ring
length 14 mm
bag 10 pcs
Art. no 960 000 146

■ An element cooperating with a half-through bullet bead, intended for construction of run rig and self-hooking kits.

PVA Swivel Color BLN
Art. no 960 000 243
bag 5 pcs

■ An element that allows the PVA bag to be easily applied.

Q-snap
Color BLN
■ size S
Art. no 960 000 242
bag 7 pcs

Bent head oval ring
Color SS
■ length 16 mm.
Art. no 960 000 159
■ length 21 mm.

CARPLABS

Carplabs Black Sun

Carplabs Accelerate

Carplabs Black Sun

Black Sun rods are designed for anglers who value reliability and performance. The blanks are made from durable yet responsive 24T carbon fiber, providing an excellent balance between power and sensitivity—ideal for carp fishing in a variety of conditions. Oversized guides with hardened, stainless steel rings ensure smooth casting and high wear resistance. The three- piece construction allows for convenient transport while maintaining top performance standards. Whether you choose the classic 360 cm / 3 lbs version, the more powerful 390 cm / 3.75 lbs model – Black Sun is always ready for action. The non-slip handle made of heat-shrink neoprene offers a secure grip, even during long sessions in the rain. These rods can handle even the most hard-fighting carp, giving you full control during every stage of the fight. And best of all, all of this comes at a remarkably attractive price – Black Sun is simply unbeatable in its class.

Carplabs Black Sun	Art. no.	Length (cm)	Test curve (Lbs)	Weight (g)	Transport length (cm)	Number of elements
Black Sun 360	765 010 360	360	3	312	125,5	3
Black Sun 390	765 010 390	390	3,75	340	135,5	3

Carplabs Accelerate

Rods with test curve from 1.5 Lbs up to 2,0 Lbs well suited as Avon rods, or as heavy float rods (i.e. to use with surface controller). Excellent casting performance allow you to locate your rig exactly in the spot you want. Light rigs will achieve impressing distances without any problem, without putting any bigger effort. Progressive action of the rods allows to catch any fish calm and effective. Blank is reinforced with woven carbon wrap, significantly increasing resilience to dynamic strikes during the fight. Another feature of X-wrap is increased resilience to random mechanical damage. Guides spacing is optimized for achieving very best operational parameters. Fuji DPS reel seat is an excellent finishing touch of those rods.

Carplabs Accelerate	Art. no.	Length (cm)	Casting weight (Lbs)	Weight (g)	Transport length (cm)	Number of elements
Accelerate 312 1,5 Lbs	765 003 360	360	1,5	247	125	3

CarpLabs Gravity X-WIND 950 QD

WARRANTY 5 YEAR

SERIES 900

FRONT DRAG FD

BALL BEARINGS 8+1

8 ball bearings, 1 anti-reverse bearing ■ multi-disc front drag ■ slow oscillation spool system ■ staniless steel worm shaft ■ aluminium CNC handle ■ aluminium main spool ■ Quick Drag System.

A new reel dedicated to catching the largest cyprinids. It is equipped with eight ball bearings and one roller bearing. The precise, front multi-disc drag allows for control over the runs of even the biggest fish. The reel features a super slow oscillation system, which directly results in a perfect, tight line lay, facilitating even the longest casts. The aluminum long-cast spool perfectly complements the entire setup. The stainless steel worm gear ensures reliability and durability, even with intensive use. The CNC aluminum handle guarantees lightness and strength, which is crucial during long carp fishing sessions. These features make the Carplabs Gravity X-Wind reel an ideal tool for anglers seeking solid, reliable, and visually appealing equipment

Gravity X-Wind	Art. no.	Ball bearings	Gear ratio	Weight (g)	Main spool	Spare spool	Line diameter, main spool capacity (mm/m)	Power drag (kg)
950 QD	765 070 950	8+1	4,6:1	590	1 aluminium	-	0,35/390 0,40/300 0,45/235	20

Carplabs® Lead Free Core is the modern follow-up to classic leadcore, built for even better rig camouflage. Instead of a stiff lead core, it uses a soft, dense copper braid inside. This makes the material super limp, so it hugs the lakebed perfectly and won't spook the fish. It's an ideal choice for venues with lead bans, giving you a lead-free alternative without sacrificing performance. The copper core gives you plenty of weight to sink fast and keeps your setup looking completely natural. It also offers excellent abrasion resistance, holding up great against gravel, snaggy spots, and sharp debris. Splicing loops with a needle works exactly the same as with traditional leadcore, so you don't need to learn any new tricks. It comes in a stealthy black-and-green camou pattern and three breaking strains: 25 lbs, 35 lbs, and 45 lbs.

Length (m)	Art. no.	Strength (lbs)	pack.
5 m	765 002 025	25	1 spool
5 m	765 002 035	35	1 spool

Art. no 765 000 104

A complete accessory kit for assembling safety bolt rigs, enough to put together five full sets. It includes carefully matched components in perfectly compatible sizes, making assembly quick and hassle-free, with no need to trim or adjust parts on site. A practical choice for beginners and experienced anglers alike who value convenience and want to save time by the water — well worth having with you on every session.

Bullet Beads
■ Ø 6mm, length 12 mm.
bag 10 pcs
Art. no 765 000 037

Bullet bead made of rubber. It protects the knot even from significant stress during casting. Comes in handy for rigging up a heli.

Buffer Beads
length 15 mm.
bag 10 pcs
Art. no 765 000 024

An important element of the helicopter rig. These bead stick tight to the swivel's body and ring.

Semi Fixed Safety Beads
length 24 mm.
bag 5 pcs
Art. no 765 000 023

Perfect for setting up a semi fixed or run rig.

Tapered Cone Beads
length 14 mm.
10 pcs
Art. no 765 000 025

This cone bead is made of rubber and fits over #4 swivel. Overall length - 14 mm.

Tapered Hole Bead
Art. no 765 000 077
bag 24 pcs

Accesories set for D-rig
Art. no 765 000 089

SHORT SHANK

Size 2 – Art. no 765 102 902

pack. 6 pcs

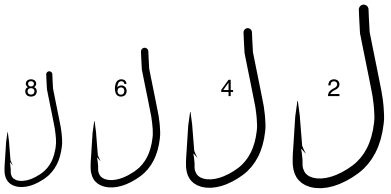

Extremely strong hook for extremely demanding fisheries with huge fish specimens. If we would have to compare Short Shank to something common, it would be a hammer. Utterly indestructible, working always the same, well known way. This hook is not afraid of gravel, neither forceful fight among the snags. If your fishing spot is technically demanding area, this hook will be your best friend.

STIFF RIGGER

Size 2 – Art. no 765 105 902
Size 4 – Art. no 765 105 904
Size 6 – Art. no 765 105 906
Size 8 – Art. no 765 105 908

pack. 6 pcs

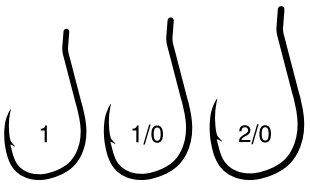

Powerful hook working miracles with stiff rig and chod rig. Extremely sharp and catchy point makes the job done well, while PTFE coating helps to penetrate tissue with an ease. Forged profile of this hook ensures strength needed to fight enormous specimens of carp or grass carp, and micro-barb will hold the fish till successful landing.

SPECIMEN

Size 2/0 – Art. no 765 104 921
Size 1/0 – Art. no 765 104 911
Size 1 – Art. no 765 104 901

pack. 6 pcs

Rediscovered classic. Extremely catchy model ensuring very good number of hooked fishes, forged for uncommon strength. Works well with many different baits, while the size chart allows to choose something from 3 corns on a hair, up to 30mm snowmen.

METHOD FEEDER BARBLESS

Size 16 – Art. no 765 111 916

pack. 6 pcs

Small, yet astonishingly strong hook dedicated to method feeder fishing. Eye bent backwards allows to use fluorocarbon, monofilament and braided line. Shape of the hook is designed to maximize the number of successful hook ups. Characteristic, wide gap firmly holds the catch ensuring bigger number of landed fishes.

Carplabs MOAB bait rocket
■ Size S
Art. no 765 000 062 bag 1 pcs
■ Size L
Art. no 765 000 063 bag 1 pcs

■ The Carplabs MOAB bait rocket is a tool for carp hunters who value precision and effective baiting. With its aerodynamic design and sturdy construction, the MOAB allows for long and accurate casts, while its capacity ensures that a large amount of bait can be delivered to one spot. The fast-opening mechanism guarantees minimal bait loss, and the durable materials ensure long-lasting performance. Carplabs MOAB is your secret weapon for attracting more bites.

A special shape enabling quick and convenient one-handed loading ■ Aerodynamically tuned for optimum casting performance for accurate baiting at extreme long range ■ A spring mechanism enclosed in a plastic casing to prevent contact with the bait ■ A design that allows it to float on the water – in case of breakage, it will drift back to the shore ■ Durable and damage-resistant construction ■ A sturdy, durable swivel facilitating secure attachment.

■ Do you want to precisely deliver a small amount of bait along with your hook bait? Do you want to improve your rig's resistance to tangling? The perfect product to help you achieve this is the Carplabs dissolvable PVA mesh. This material dissolves upon contact with water. You can fill it with groundbait, pellets, crushed boilies, or worms, while your hook bait remains intact. The Carplabs PVA mesh is available in two diameters, 23mm and 37mm, and a length of 5m, supplied with a plunger for easy filling. We also offer mesh refills in corresponding diameters.

Carplabs PVA Clip
Art. no 765 000 064
bag 10 pcs

Carplabs PVA bags are the top choice on the market for demanding anglers! Available in various sizes, they allow for precise bait quantity adjustment for any fishing situation. With their fast and easy water dissolution, they guarantee effective, pinpoint baiting and quick results. You can safely soak them in boosters or dip them, which will provide an additional attractant for the fish. Equipped with a practical filling tool, they make rig preparation quick and convenient. Trust Carplabs quality and boost your chances of catching your dream fish!

DREAD CAT

Dread Cat Titan DC

Dread Cat Ground

Dread Cat Vertical

Dread Cat Titan DC

DreadCat Titan 3.15m 600g - a rod built for the biggest whiskered beasts, a weapon that knows no mercy. Not every rod can withstand a catfish that looks like it's been bench-pressing dumbbells for breakfast. But the DreadCat Titan is no ordinary stick. It's a gladiator in the world of catfish rods - armed with a massive 3.15 m blank rated up to 600 g, boldly declaring: "Bring it on, big boy - I'm ready." Engineered for monsters with their own postal codes, capable of burning drag faster than a courier on an e-bike, this rod handles extreme pressure, oversized rigs, and lures the size of an average pike. When a catfish shifts into second gear and tries to drag you straight into the river - the DreadCat Titan replies: "Not today, buddy." Heavy-duty double-foot guides stand up to thick braided lines, mono - and probably even a jumper cable (though we haven't tested that part). Whether you're fishing from the bank, a boat, or a well-worn pontoon, this rod never loses composure. The EVA-coated handle stays locked in even with palms sweating like an angler who's just hooked the fish of a lifetime. And the military-orange finish with camo accents? Perfect for making that catfish think it's facing a strike rod straight out of a special unit. To top it off - a heavy-duty DPS reel seat with a locking nut that holds your reel tighter than a mother-in-law on holiday cash. No play, no stress - just full control during the craziest runs. The DreadCat Titan is not for relaxation. It's built for hunting mutant catfish from the depths.

Dread Cat Titan	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transport length (cm)	Number of elements
TITAN 315cm/600g	865 203 315	315	600	483	160	2

Dread Cat Ground

Strong and powerful rods made to fight strong and powerful catfish. They are doing good both in running and stagnant water. Well suited for break-line method, as well as classic ground fishing. Blanks have got thick walls, and are connected by a spigot, which prevents unequal bent during stress. Additionally, spots where the blank ends, are reinforced with metal rings for further improve its strength. We have used 2 leg guides with SiC grade centre to prevent line damage, and put them on underwraps for blank protection during huge overloads. We simply couldn't use any weak reel seat, therefore you'll find here type DPS-H suited for reels in above 7000 size. It will firmly hold the reel whatever the size of the catch is going to be. Distance between front and rear grip had been fixed that way, so each angler could feel comfort of use, regardless of his height and arms length.

Dread Cat Ground	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transport length (cm)	Number of elements
Ground 285/500	865 200 285	285	500	442	151	2
Ground 315/500	865 200 315	315	500	499	166	2

Dread Cat Vertical

We are proud to present our new rods for the largest predators in our waters – designed especially for catfish enthusiasts! The Vertical is a robust two-piece rod, 1.90 m in length, available in two casting weight variants: 80-150 g and 150-250 g. Its durable construction and high-quality guides ensure smooth handling of even the largest specimens. The modern design combines aesthetics and functionality, providing comfort and reliability in all conditions. Choose quality and durability that meet the expectations of every angler!

Dread Cat Vertical	Art. no.	Length (cm)	Casting weight (g)	Weight (g)	Transport length (cm)	Number of elements

DreadCat Big Cat PG

NEW!

SERIES 700

FRONT DRAG FD

BALL BEARINGS 6+1

6 stainless steel bearings, 1 roller bearing ■ front multi-disc drag ■ reinforced drive gear ■ reinforced, thickened main shaft ■ composite body and rotor ■ aluminum main spool ■ reinforced drag with Power Drag washers ■ computer-balanced rotor ■ precise line lay system ■strong aluminum handle with an oversized anti-slip knob

The new edition of the iconic Dread Cat series, designed specifically for extreme, active, and stationary catfish angling. The Big Cat model is a powerful machine built with a single purpose: to give the angler complete control when fighting the largest predators in our waters. Equipped with an extra-deep, two-tone aluminum spool, it holds hundreds of meters of thick braided line, making it the perfect choice for long-distance boat deployment. A key advantage of this reel is its reinforced bearing system (6+1BB) mounted on a thickened main shaft, which easily withstands gigantic loads. The reliable, extremely powerful 12 kg drag allows you to stop fish in heavy river currents, while the heavy-duty gearing operates like a dependable winch. The entire mechanism is housed in a durable body, complete with a CNC metal handle and an ergonomic rubber knob that ensures a secure grip in any weather conditions. The Dread Cat Big Cat is the perfect combination of brute force, a powerful drag, and armored mechanics.

Dread Cat Mark I

SERIES 600

FRONT DRAG FD

BALL BEARINGS 5+1

■ 5 stainless steel bearings, 1 anti-reverse bearing ■ multi-disc front drag ■ composite material casing and rotor ■ main aluminium spool ■ spare graphite spool ■ computer-balanced rotor ■ precise monofilament winding system ■ titanium roller covering.

How important part of the setup is the reel, we don't need to convince anybody. Heavy rigs, lures, and catches are common to anyone who calls himself 'catfish hunter'. So, what a real catfish reel must have? Huge spool capacity, strong and resilient gear, and a smooth, powerful drag. All features mentioned above are present in our Dread Cat Mark I. Regardless of where and how you will be fishing, Mark I will follow your expectations. Gear is built for ultimate power, while rubber knob could be operated even with wet hands. Titanium oxide anodized roller, supported by high quality stainless steel ball bearing runs smoothly even with huge fish hooked on the other end of the line. Long story short, if you are all about catfish fishing, this reel will be definitely one of your favorites.

865 000 090	0,50	59,60
865 000 091	0,60	72,20

Braided line specially designed for catfish fishing with artificial lures as well as with modern ground methods. Thanks to the use of super strong, 8-strand polyethylene this line is characterized by high abrasion resistance and low water absorption. The Dread Cat X8 has been engineered for colourfastness and surface smoothness for long casting distances. The use of Dread Cat X8 allows you to equip any rig with a braided line of the highest parameters necessary for any rig subjected to the extreme conditions often encountered in catfish fishing.

Dread Cat Cat Nip Clonk
Art. no 865 000 053

Dread Cat Rumbler Clonk
Art. no 865 000 054

One of the older, yet incredibly effective tools for attracting catfish. The five different Dread Cat clonks are sure to meet the needs of catfish anglers. Striking the water's surface mimics the sound of feeding catfish. The sound produced varies depending on the clonk used, so it's best to take your chosen model to the water and test it yourself.

Dread Cat Teaser

Your Secret Weapon for the Biggest Catfish! The DreadCat Teaser is an absolute must-have lure for any angler specializing in catfish fishing. Available in three weights: 150 g, 200 g, and 250 g, and offered in three highly effective color versions, it guarantees not only perfect action but also reliable effectiveness.This lure was designed and tested by Polish and Italian anglers who kept it secret for years, handcrafting it for a select group of enthusiasts. Now it's available to anyone looking to improve their catfish fishing results. The key feature of our DreadCat Teaser is its silicone tassels, which offer perfect resilience and flexibility. Unlike other teasers on the market, they are significantly stiffer, creating a stronger and more enticing hydroacoustic wave. The beads at the tips of the tassels further generate an irresistible combination of sound, motion, and vibration, attracting even the most cautious predators. Thanks to a special anti-static coating, the teaser's weight does not produce unwanted electric charges, eliminating the risk of scaring off fish.The DreadCat Teaser is equipped with an exceptionally strong and sharp treble hook and a hook tied to a high-strength braid. The use of a small hook below the treble ensures effective hooking, even for the most cautious catfish, which often nibble gently, barely biting at the bait. This setup ensures that even the largest and most wary predators will be securely hooked.The DreadCat Teaser performs excellently both in clonk fishing and vertical techniques without the clonk. It's ready for use straight out of the box—just add natural bait such as worms, nightcrawlers, mussels, squid pieces, or any other catfish favorite. DreadCat Teaser – The irresistible lure for the biggest catfish, now available for everyone!

bag 1 pcs
Art. no 865 000 117

■ The bell allows for a quick response to bites, providing greater comfort and efficiency during fishing. The sturdy mounting clip ensures stable attachment to the rod, eliminating the risk of damage. It is ideal for catching catfish and other large fish, especially during night fishing sessions.

Black Rubber beads stoppers in lines
Art. no 865 000 049

■ Strong rubber beads designed to support solid catfish sets on thick lines. Three different sizes from the set will allow you to choose the right one for your current set.

Silicon Stoppers 3XL
bag 5 pcs
Art. no 865 000 007

■ Robust rubber stoppers with an outer diameter of 5.25 mm will allow you to securely lock any necessary item onto the rig.

Electronic bite alarm set AI Connnect Plus
2 piece kit + receiver

Art. no 940 100 009

■ Tested in a wide range of weather conditions, from freezing temperatures to torrential downpours and scorching sun. Available as 3+1 and 2+1 sets with the receiver unit in a protective case, as well as single units. These single alarms can be added to a set, to create a maximum 6+1 configuration. Ease and intuitiveness of use are combined with durability and high quality materials and electronics to create an extremely successful product.

Features and functions of the buzzer:

■ 8 tone settings ■ 8 volume settings ■ 5 sensitivity settings ■ 20 second LED signalling ■ 8 magnets in roller ■ coloured LED; each colour with 2 brightness options ■ brightness adjustment with LED button ■ black satin smooth finish ■ range up to 200-220 metres ■ light and sound distinction of the bite direction ■ 2.5 mm jack socket ■ 1:1 signal transmission to receiver ■ bite memory function ■ classic on/off switch ■ incorporates a safety 'storm poles' to prevent the rod being pulled off from the alarm ■ automatic low battery warning.

Hanger The Drop 1 pcs

■ A great hanger, refined in every detail, which we recommend as a bite indicator on carp rods. It can be attached to both monofilament and braided line. It is characterised by its cleverly designed clamping element, which guarantees a secure hold on the line regardless of its diameter. This hanger is robust, easy to use and available in 3 bright colours to ensure good visibility.

Thanks to its design, it is convenient to use and safe for caught specimens during measuring, weighing, and photographing. Made of materials that, on the one hand, ensure durability, and on the other, provide comfort of use. It is equipped with a practical pocket for handy accessories. It comes with a sturdy cover for easy transport and storage.

Landing nets are part of the basic equipment of every fisherman. The final fishing result depends on their reliability. Konger experts have prepared a dozen or so models of professional and failure-free landing nets intended for various fishing methods. We offer competitive, carp, fly and universal landing nets. In case of telescopic landing nets, smooth grip length adjustment and foldable triangle basket allow using them in different conditions. The net does not absorb any unpleasant smell and allows easy washing and cleaning, whereas the net's tiny mesh prevents the tangling of fishing kits. The polygonal duralumin grip ensures very high stiffness along with low weight. We recommend our landing nets for all fishermen who wants to be successful.

PowerStrand HD X7

NEW!

A new generation of pro spinning leaders with a 1x7 build, made to protect your gear from predator teeth. It features a super-tight weave of 7 high-grade stainless steel micro-strands, combining a very thin diameter with extreme strength. Thanks to modern heat treatment, these leaders are incredibly flexible and have zero memory. They won't kink or twist after fighting a fish, ensuring your lure moves naturally. It's the perfect choice for modern anglers, guaranteeing a safe landing of trophy pike and zander. Available as ready-made leaders in a handy 2-pack, or a 10m spool with 12 crimps so you can make your own lengths and rigs.

PowerStrand HD X49

NEW!

Soft, slim, and strong pike leaders made of top-quality stainless steel wire braid with 49 precise micro-strands. Built for anglers who want 100% reliability when fighting big predators. The unique 7x7 build makes the material super soft and flexible, just like a regular braid. Because of this, it doesn't ruin the natural action of even the smallest lures, soft plastics, or spoons. These leaders also have zero memory—they won't kink or bend after a hard bite or getting stuck in snags, keeping their straight shape for a long time. The whole rig is finished with reliable parts: heavy-duty Konger snaps and swivels, tightly secured with solid crimps. This gives you total confidence in the toughest conditions on the water.

7×7

783 000 005	30	783 000 007	50
783 000 006	40		

Feeder basket designed for classic feeder fishing over long distances. The classic wire construction allows the use of both fine and coarse groundbait. The matt black paint coating blends in well with the background of the bottom without scaring the fish near the set. The different weights available allow you to properly choose something to fish at any distance.

Feeder River Feeder Master 38x45 mm

pack: each size 1 pcs

Art. no	Load (g)	Art. no	Load (g)
783 000 012	60	783 000 015	120
783 000 013	80	783 000 016	140
783 000 014	100		

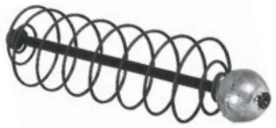

Feeder fishing in rivers is often quite challenging. The current moves typical square baskets with surprising ease. Thanks to the curved tip of our basket, it is possible to use much lower weights than with a standard square profile, which has a positive effect on the sensitivity of the entire set.

Pre baiting Feeder 78x50 mm

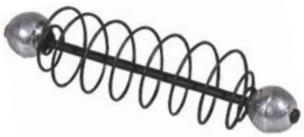

Art. no 783 000 009
pack.1 pcs

A large, sturdy cage feeder designed for initial baiting of a fishery. It allows to precisely deliver a large amount of bait in one cast, which is especially important when fishing for fish that feed intensively.

Lumio glowsticks are available in 4.5 mm, 4 mm and 3 mm diameters. They are an indispensable accessory for any "night hunter." Designed for maximum visibility and convenience, Lumio guarantee that no bite will escape your notice. A special rod attachment allows you to quickly and easy installation the glowstick. Lumio glowsticks provide intense and long-lasting light, which will help even during the longest night fishing sessions. They are perfect for various fishing techniques, including float, bottom, and sea fishing. No matter where you fish, Lumio glowsticks will always perform brilliantly.

Introducing our line of seat box and chair-mounted accessories, which are becoming increasingly common in modern fishing. It is a wide range of products thanks to which we can make our fishing station more functional and allow us to derive even more satisfaction from the fishing itself. The individual accessories are suitable for mounting on round tubes with diameters of 36, 30, 25 mm and have large, comfortable plastic clamping knobs for simple operation. They can be mounted on all popular seats and chairs thanks to the use of a special reducer to match the required tube diameter.

Pro Support Feeder Arm 80-140 cm

Art. no 960 400 063

A long and durable arm with a round profile. It makes a great rod rest and is made of two telescopic elements so it can be freely adjusted in length from 80 to 140 cm. The end of the arm is fitted with a quick-release attachment with metal thread for easy fitting of your favourite rest end.

Adjustable method feeder arm Square 80-120 cm

Art. no 960 400 023

Feeder Power Arm 40+40 Quick Link

Art. no 960 400 064

A strong, extendable arm with adjustable pivot, made from a square profile element. Allows any accessory to be fitted thanks to a quick-release coupling with metal thread, which is located at the end of the arm.

Quick Link Feeder Arm curved 15 cm

Art. no 960 400 066

A curved arm with quick release designed to mount to the seat of a fishing net. It has a length of 15cm and is fitted with a metal thread.

Quick Link Feeder Arm straight 30 cm

Art. no 960 400 065

A straight arm with quick release designed to mount to the seat of a fishing net. It has a length of 30 cm and is fitted with a metal thread.

Quick Link Speed Arm for Butt Grips

Art. no 960 400 062

A 30 cm long arm equipped with two, universal threads for screwing in butt grips. With it, any rod support or landing net rod can be attached to the seat.

Quick Link foam pipe 30 cm ribbed

Art. no 960 400 069

Thanks to the Quick Link system, you don't have to tighten and loosen the entire holder every time. Once fitted, the bracket allows you to attach or detach this neoprene arm in an instant with the click of a button.

Double foam pipe 35 cm ribbed

Art. no 960 400 068

A 35 cm long curved extension suitable for screwing in two rod rest ends. It is equipped with metal threads and, thanks to its ribbed design, will be ideal as a rod rest even without fitting the ends.

Quick-disconnect coupling Fast Lock

Art. no 700 004 125

Feeder Arm Quick Link Strong Square adjustable 20 cm

Art. no 960 400 067

Support arm with foam end. This part of the accessory is equipped with a clamp that can be moved freely on the square profile of the support arm. This allows us to freely adjust the support point for the rod.

Chair rest arm straight 15 cm
Art. no 700 004 094

Feeder Special rest end ribbed
Art. no 700 004 113

The profiled neoprene sleeve and shape of this rest is a classic form in a modern way. It allows you to position the rod comfortably and quickly after casting the set, without having to move the feeder along the bottom.

Feeder Expert rest end ribbed 30 cm
Art. no 700 004 112

The end piece is finished with soft, ribbed neoprene to effectively protect the rod blank from damage. The extreme safeguards used prevent the rod from being pulled down when a large fish is biting rapidly.

30 cm Bait Bowl with Quick Link

Art. no 850 200 004

An extremely useful piece of kit, allowing you to both mix a small amount of pellets, groundbait or simply keep your hands clean. Thanks to the Quick Link system, you don't have to tighten and unscrew the whole handle every time. The use of added reducers allows it to be mounted to 25 mm, 30 mm and 36 mm legs.

Feeder Ledger Boom Clear 4 cm Anti-tangle Tube

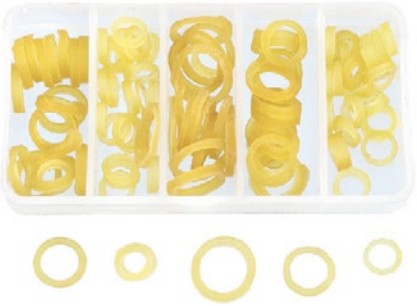

Art. no: 555 010 001
pack. 3 pcs

This anti-tangle tube has been developed for modern feeder fishing, where it is required both to be effective in preventing the feeder from tangling on the line, and to be lightweight to increase the frequency of bites. The use of colourless material allows it to be used even in clear, shallow water when fishing for wary fish.

Twin Konger headlamp

NEW!

Art. no 900 000 041

A functional headlamp with an ultra-lightweight design, created for fishing, trekking, and camping. The device offers two main lighting modes—focused white light and diffused white light—as well as an additional red light. It provides consistent, powerful illumination in a convenient, wearable format.

Light output: 200 lumens ■ Light source: High Power LED ■ Power supply: 3 × AAA batteries ■ Runtime: up to 5 hours ■ Weight: 50 g

Konger Alfa headlamp

NEW!

Art. no 900 000 044

A compact and lightweight headlamp that delivers a powerful beam while maintaining a small size. It is perfect for fishing, camping, hiking, and any tasks that require hands-free operation. It features a strong primary light source, as well as additional LEDs that provide red and green light.

Light output: 200 lumens ■ Light source: 3W LED + R.G SMD ■ Power supply: 3 × AAA batteries ■ Runtime: 4–6 hours ■ Weight: 56 g

Konger Floodlite Headlamp

NEW!

Art. no 900 000 045

An exceptionally lightweight headlamp featuring a wide-angle (COB) beam, providing uniform, bright illumination over a large area. It is perfect for fishing, camping, and hiking. Equipped with a powerful COB panel delivering up to 350 lumens of brightness, as well as additional LEDs that emit red light. Long battery life ensures reliability during nighttime excursions.

Light output: 350 lumens ■ Light source: 3W COB + R SMD ■ Power supply: 3 × AAA battery ■ Runtime: up to 5 hours ■ Weight: 48 g

Bag ESSENCE LURE 15 L

38x14x28 cm
Art. no 973 000 001

A bag characterised by functionality resulting from a large number of side pockets. Deciding on this model, we can choose from 5 pockets of various sizes, closed in different ways. We can choose between those pockets closed with traditional velcro, those closed with zippers and also an elongated pocket with a plastic snap.

Bag ESSENCE LURE 20 L

38x22x24 cm
Art. no 973 000 002

A classic, medium-sized bag with 3 side pockets and 1 main compartment. It can serve as a basic, handy bag for expeditions, during which the angler's mobility is important, not limited by the equipment carried.

Bag ESSENCE BAG 17 L

38x19x24 cm
Art. no 973 000 003

Light and robust bag with 3 side pockets. In the upper part, it is equipped with a practical rope that allows you to fasten the outer clothing during transport. The main compartment is closed by a strong zipper with comfortable handles.

Bag ESSENCE THERMO 17 L

35x20x25 cm
Art. no 973 000 004

A bag useful during long, summer fishing trips. The main, insulated compartment allows you to pack a lot of provisions and drinks, which you want to take with you to the fishing ground during a stationary sit-down or on the boat. The mesh pocket can hold an open drink and the other flat side pockets can be used to pack additional boxes.

Satchel ESSENCE FREE 12 L

30x13x30 cm
Art. no 973 000 005

A small, handy satchel ideal for shorter expeditions when you don't need to carry a lot of equipment. Equipped with solid snap buckles allowing quick access to the contents of the main compartment and side pockets.

Satchel ESSENCE LURE 19 L

40x16x30 cm
Art. no 973 000 006

A practical bag that can accommodate a large number of boxes and fishing accessories. It has 1 main compartment and 4 side pockets closed with reliable zippers. It can be worn on the shoulder thanks to the adjustable and comfortable strap.

Backpack ESSENCE MODERN 20 L

28x18x42 cm
Art. no 973 000 007

This backpack features a modern design with 5 side pockets with zips. Thanks to the profiled, comfortable shoulder straps you can easily carry heavy equipment on the way to the fishery.

Backpack ESSENCE RETRO 20 L

28x18x42 cm
Art. no 973 000 008

A classic backpack equipped with 5 pockets of various sizes, which allows you to pack all the accessories you need on the water. Made of high quality, waterproof and abrasion resistant material.

Rod cover ESSENCE COVER

Tent with overwrap No 1 Art. no: 976 010 001

- Dimensions: length: 250 cm, width: 278 cm, height: 135 cm
- Tent weight: 6.5 kg, overwrap: 1.7 kg.

6,5 kg
1,7 kg
3000 mm

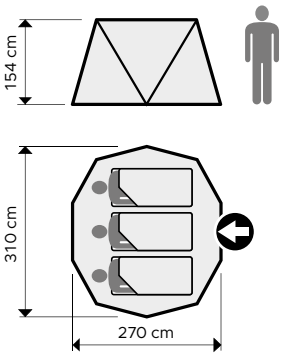

■ Material resistant to 3000 mm water column, sewn mosquito screen, perfect for warm months ■ Load bearing frame: ■ glass fibre bars Ø11 mm ■ Attachable, strong, waterproof floor ■ Durable and strongly sewn peg loops ■ “Second skin” overwrap provided in the kit, water resistance up to 3000 mm water column ■ Eliminated water condensation effect inside the tent ■ Solid, screw pegs provided in the kit.

Tent with overwrap No 2 Art. no: 976 010 002

- Dimensions: length: 270 cm, width: 310 cm, height: 154 cm
- Tent weight: 8.2 kg, overwrap weight: 1.9 kg

8,2 kg
1,9 kg
5000 mm

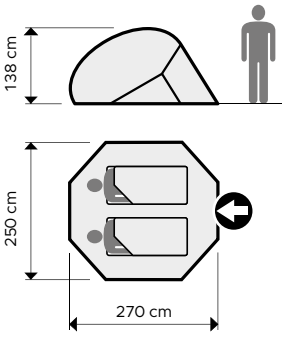

■ Material resistant to 5000 mm water column, can be used for winter fishing ■ Load bearing frame: 2 aluminium bars Ø16 mm ■ Strong, detachable and waterproof floor ■ “Second skin” overwrap provided in the kit, water resistance up to 5000 mm water column ■ Durable and strongly sewn peg loops ■ After use of the "second skin” overwrap, eliminated water condensation effect inside the tent ■ Solid, screw pegs provided in the kit.

Tent No 3 Art. no: 976 010 003

- Dimensions: length: 270 cm, width: 250 cm, height: 138 cm
- Tent weight: 8.2 kg.

8,2 kg
3000 mm

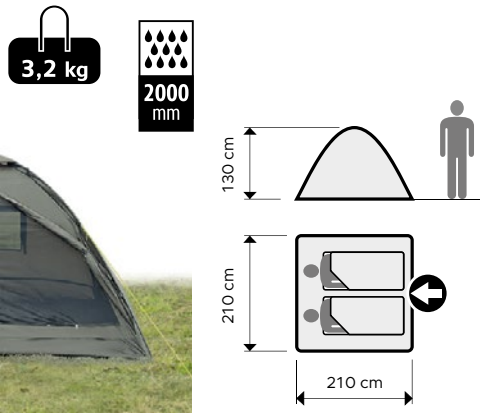

■ Material resistant to 3000 mm water column, can be used for winter fishing ■ Load bearing frame: umbrella, two 120 cm height adjusting arms, glass fibre Ø11 mm entry frame ■ Detachable front with mosquito screen ■ Durable, detachable and waterproof polyethylene floor ■ Durable and strongly sewn peg loops.

Tent No 4

Art. no: 976 010 004

- Dimensions: length: 210 cm, width: 210 cm, height: 130 cm
- Tent weight: 3.2 kg.

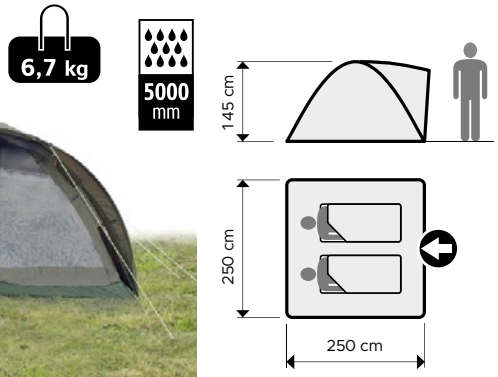

- Tent sheathing resistant to 2000 mm water column, sewn mosquito screen, perfect for warm months
- Load bearing frame: 2 glass fibre bars Ø8.5 mm
- Fixed, strong, waterproof floor
- Durable and strongly sewn peg loops
- Eliminated water condensation effect inside the tent
- Pegs provided in the kit.

Tent No 5

Art. no: 976 010 005

- Dimensions: length: 250 cm, width: 250 cm, height: 145 cm
- Tent weight: 6.7 kg.

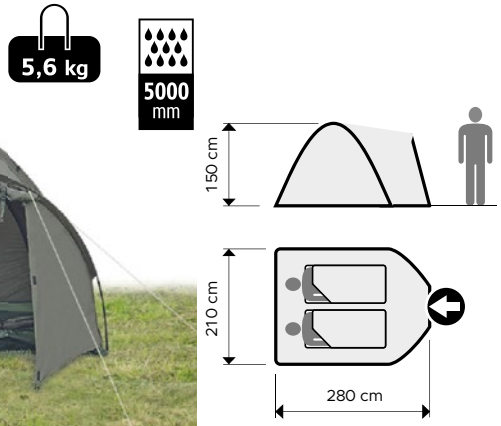

- Tent sheathing resistant to 5000 mm water column
- Load bearing frame:
- glass fibre bars Ø11, 9.5, 8.5 mm
- Fixed, strong, waterproof floor
- Durable, sewn and strong peg loops
- Eliminated water condensation effect inside the tent
- Pegs provided in the kit.

Tent No 6

Art. no: 976 010 006

- Dimensions: length: 280 cm, width: 210 cm, height: 150 cm
- Tent weight: 5.6 kg.

- Tent sheathing resistant to 5000 mm water column
- Load bearing frame: 3 glass fibre bars Ø11 mm
- Comfortable, suspended bedroom
- Strong, waterproof, polyethylene floor
- Durable and strongly sewn peg loops
- Pegs provided in the kit.

Tent No 8

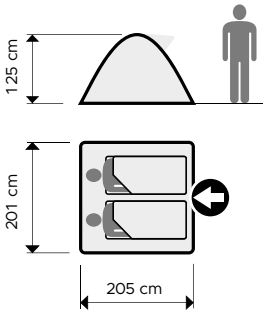

Art. no: 976 010 010

- Dimensions: length: 205 cm, width: 201 cm, height: 125 cm
- Weight: 4,4 kg.

- Waterproof fabric up to 1500 mm of water column
- Frame: 4 strong fiberglass poles
- Durable permanent floor
- Fast erect system
- Strong ground pegs and a carry bag included.

Strong pegs set

Art. no 976 010 008

Fishing is a passion, but unfortunately, the weather can spoil any fishing trip. Our fishing umbrellas ensure that neither rain nor scorching sun will be a problem anymore. You'll be able to enjoy fishing even in unfavorable weather conditions! Umbrellas come with a screw-in pole, optional attachable sidewalls with windows or mosquito nets, and eight ribs in the canopy guarantee proper sturdiness. They are a must-have for anyone who spends a lot of time fishing by the water.

For glasses nos. 1, 2, and 4, a floating strap and a functional case are included.

A full range of 30-85 cm ice fishing rods made of glass fibre (thanks to this material, they are characterized by high resistance to impacts and low temperature), equipped with ultra-light guides and handy foam grip. We assure you that all rods have been designed so that the fish could be hauled with a blank, not with a monofilament using your hands (as an be often seen).

Auxiliary kit with whistle
Art. no 960 000 033

A tool kit for ice fishermen who care about their fate. This auxiliary kit includes a pair of spikes for ice walking and a whistle. More than once, it can be the last resort in case of ice break-up. These are the basic tools that facilitate getting out into the ice sheet and alarming local people about the accident.

Kamatsu®

Our ancestors knew that a properly selected and sharp hook with optimally profiled and curved bend is the basic and most important part of a fishing kit. The use of Kamatsu series hooks gives us the ability to select the perfect hook for the size and type of the fish, the type and size of the lure as well as the type of line. These parameters allow adaptation to the conditions of any fishery. The 21st century technology allows for the computer design and production process, giving the hooks even greater precision, hardness and sharpness. You will find hooks for any fish, single and double hooks, trebles as well as jig and anti-snag hooks in the numerous and constantly growing Kamatsu family. All of this is available in a variety of sizes and colours with different properties. The Kamatsu trademark guarantees each hook passed the quality control test and will not fail at the fishery.

1/0, 2/0, 3/0, 4/0, 5/0 – 5 pcs
1, 2, 4, 6, 8, 10, 12, 14 – 10 pcs

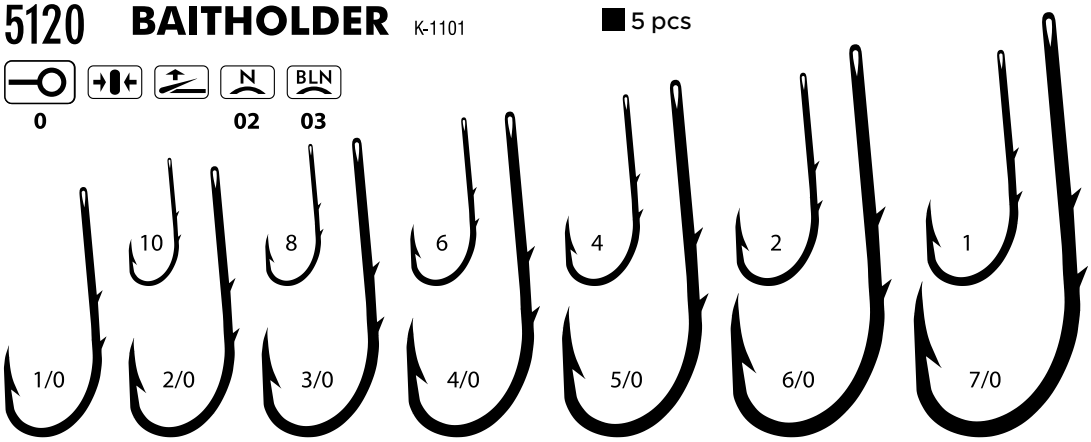

Beak – a series of durable hooks addressed to those fishing for crucian carp, tench and carp on corn, pearl barley, protein balls and worms as well as fishing for pikes, zanders and catfish on dead fish or livebait.

5120 BAITHOLDER K-1101

■ 5 pcs

0 | N 02 | BLN 03

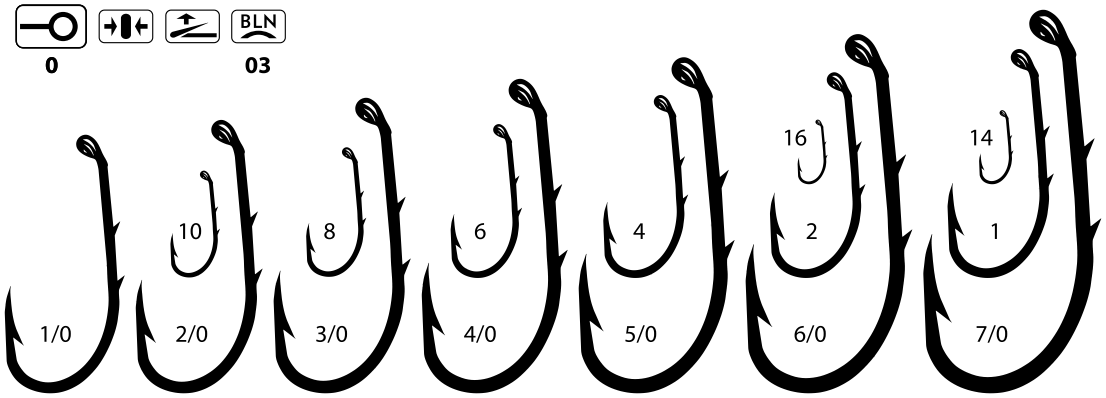

5119 BAITHOLDER K-110

■ 5 pcs

0 | BLN 03

Baitholder – these hooks perfectly hold the lure due to the additional barbs on the shank. Especially recomended for fishing with cluster of earthworms, nightcrawlers and dead fish.

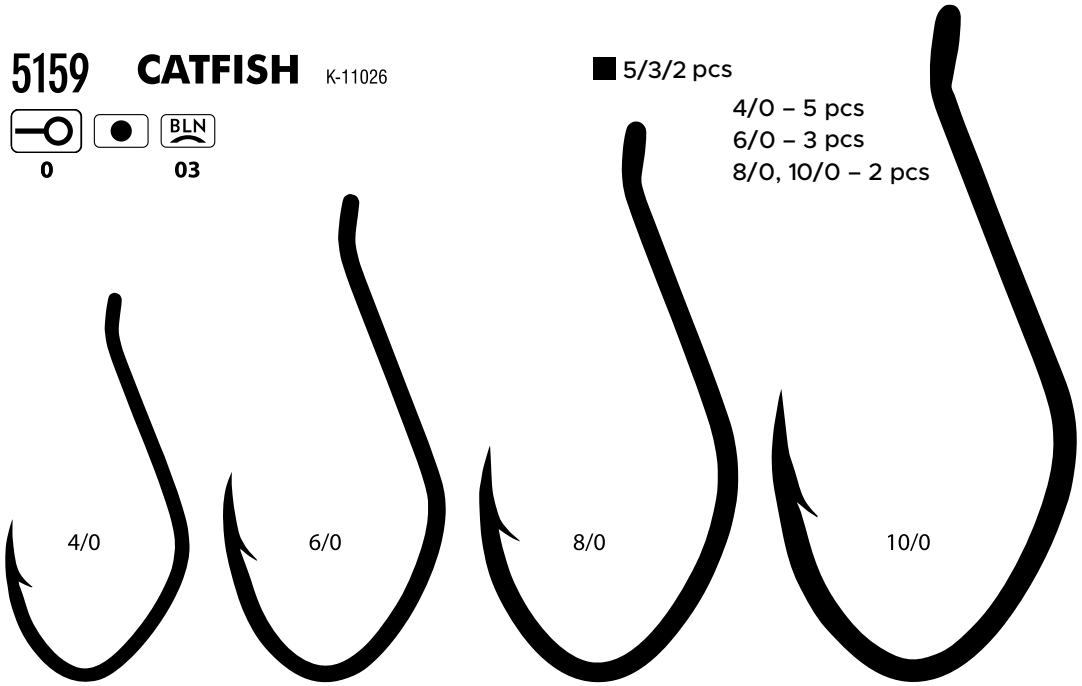

5159 CATFISH K-11026

■ 5/3/2 pcs

4/0 – 5 pcs
6/0 – 3 pcs
8/0, 10/0 – 2 pcs

0 | BLN 03

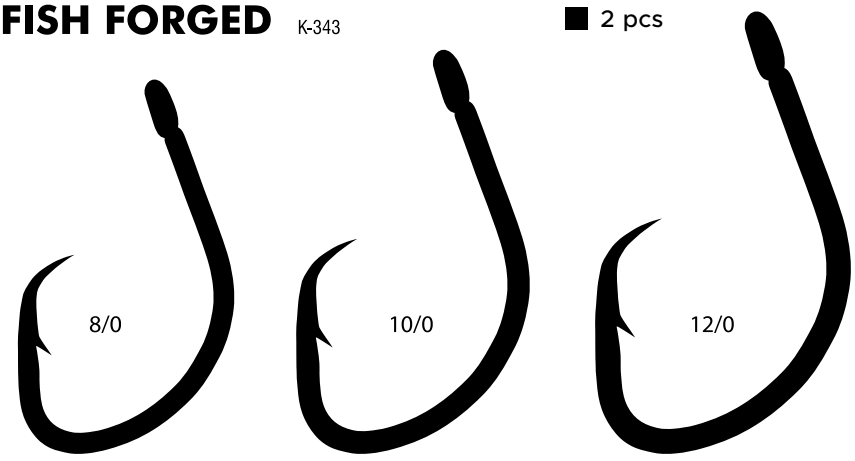

Catfish – hooks made of highly durable steel. The thick wire holds very well in fish mouth and reduces the risk of cutting the fish even during strenuous reeling. Hooks dedicated to fishermen hunting for big game.

5186 BIG FISH FORGED K-343

■ 2 pcs

0 | BLN 03

Big Fish Forged – Type of hook developed to catch big and powerful fish. Shape of the point gives increased hooking efficiency.

5124 HYPER STRONG NAUTILIUS X3 K-41

■ 2 pcs

0 | TG 10

Hyper Strong Nautilius X3 – Two series of forged durable hooks. Ideal for rigging catfish kits, ocean livebait fishing as well as for fishermen who want to deal with halibut and sturgeon.

CARP HOOKS

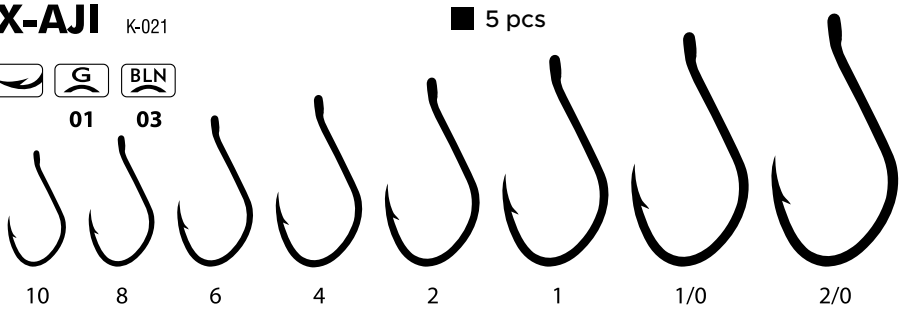

The group of carefully selected carp hooks coming from diligent and long tests in water. They are reliable even in the most difficult fisheries requiring a strenuous reel in. The thick, and thus safe for fish wire, is also a guarantee of our hooks durability. The eyelet diameters are large enough to easily tie knotless knot, d-rig, or stiff rig leaders.

5127 DX-AJI K-021

■ 5 pcs

0 | 01 | 03

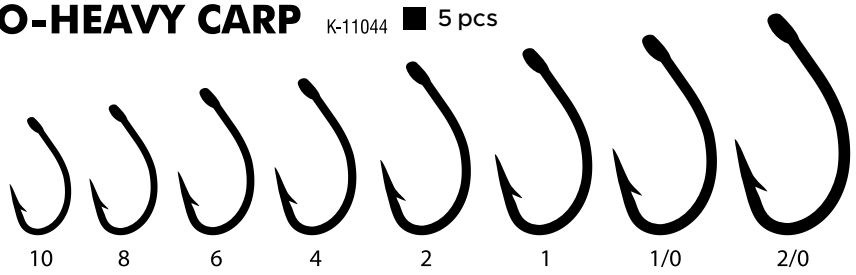

DX Aji – enhanced Aji hooks designed for those fishing for large carps, grass carps and breams. The hooks are made of a thick wire which is resistant to high overload. Moreover, hooks of this type (thick, round wire) do not cut the fish mouth during a strenuous reel in.

5134 KAYO-HEAVY CARP K-11044

■ 5 pcs

0 | 03

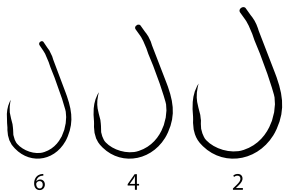

Kayo-Heavy Carp – a series of very durable and forged hooks for fishing big carps and grass carps using the hair rig method. The hooks are highly resistant to high overload occurring during the long reel in of big fish.

5150 SENSEI K-809

■ 10 pcs

0 | 03

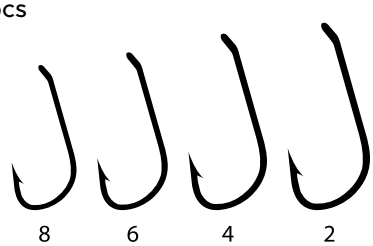

Sensei – barbless hooks dedicated for professional cyprinus hunters. An essential piece of equipment for many special domestic and foreign fisheries.

5140 MEBARU K-810

■ 10 pcs

0 | 03

Mebaru – the long and straight shank will enable easy tying of a leader with a d-rig. Good choice for balanced boilies.

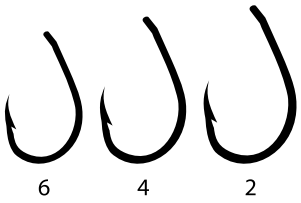

5151 KOI-BARI K-807

■ 10 pcs

0 03

Koi-Bari – forged durable hooks shaped to hold the reeled fish perfectly.

5152 YAMATO K-805

■ 10 pcs

0 03

Yamato – hooks with a straight blade and typical shank length. Appreciated by both begginers and experts of carp fishing.

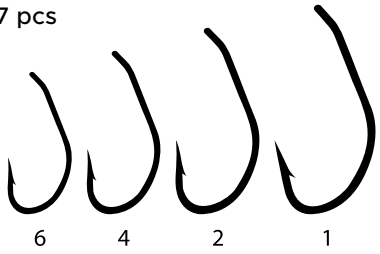

5153 KIJI K-803

■ 10/7 pcs

1 – 7 pcs 2, 4, 6 – 10 pcs

0 03

Kiji – a very successful model. Great for tying d-rig.

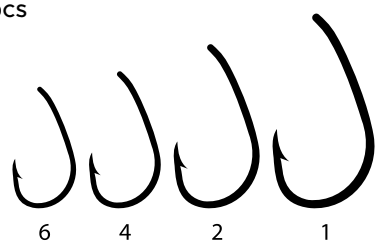

5154 MATSUI K-802

■ 10 pcs

0 03

Matsui – a very wide and curved bend with extremely catchy blade. Recommended for double boilies and pop-ups.

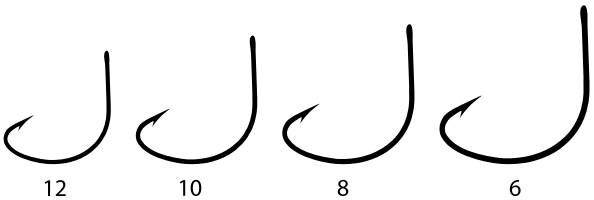

5184 WIDE GAP FORGED K-341

■ 5 pcs

0 03

Wide Gap forged – strong and sharp hook well suited to use with hair rig. Field tested, catchy - good choice both for rookies and pros.

FLY HOOKS

The popularity of fly fishing which increases from year to year prompted us to present a range of hooks for fishing with wet and dry flies, streamers and nymphs. We are convinced that the high quality of these forged and chemically sharpened hooks will be accepted by a large group of enthusiasts among lowland fly fishermen as well.

5147 DRY FLY K-9004

0 | BLN 03 | BR 06

■ 10 pcs

Dry Fly – Hooks perfect for tying both dry and wet flies. Chubs, ides, great trout and graylings - none of these species will win with these extremely durable and sharp hooks.

5146 LIGHT NYMPH K-9003

0 | BLN 03 | BR 06

■ 10 pcs

Light Nymph – Slightly longer than standard hooks for fishing with a dry fly, they are perfect for hooks to tie various types of nymphs and bigger wet flies. We recommend them especially for fishing in so-called difficult fisheries and wherever you can hook a really big fish.

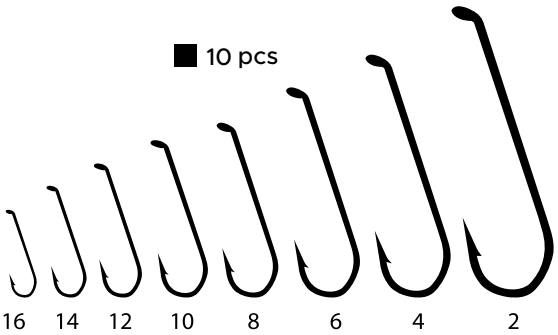

5148 STREAMER K-9007

0 | BLN 03 | BR 06

■ 10 pcs

Streamer – Extended and triple reinforced hooks will prove themselves not only during trout fishing. Due to the low price and unprecedented durability, the largest of hooks may become the bestseller of this season. Trout fishermen will certainly appreciate the penetrating tips and grasping barbs which were carefully crafted by Japanese specialists.

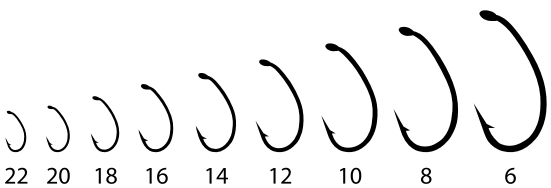

5149 SCUD K-9012

0 | BLN 03 | BR 06

■ 10 pcs

Scud – The imitation of grammarus is one of the most effective artificial flies. Unfortunately, the hook is exposed to frequent contact with the bottom of the river especially during so-called short nymph fishing and as you well know a blunt hook is a bad hook. Why risk the loss of the catch of your life if you have Scud hooks at your disposal - they are highly resistant to abrasion and retain a significant portion of their original sharpness even after several fishing trips.

TREBLES

Series of extremely durable and sharp treble hooks dedicated to uncompromising hunters of predators. The wide range of sizes and shapes will easily allow you to select the model suitable for setting a pike wobbler, a chub floating wobbler, a zander soft lure or hooks for enthusiasts of livebaits. We also added the sea models which are helpful in setting commonly used pilkers to make a complete and accurate offer.

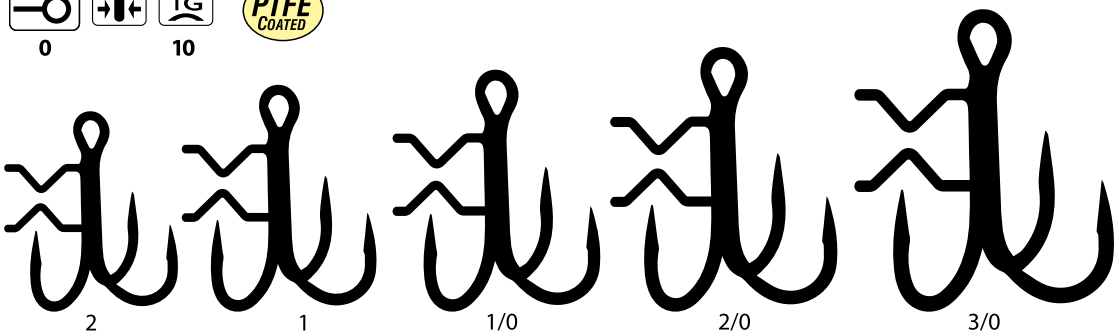

5195 PINHEAD TREBLE PTFE

NEW!

■ 3/0, 2/0, 1/0 - 3 pcs,
1, 2 - 4 pcs

0 TG 10 PTFE COATED

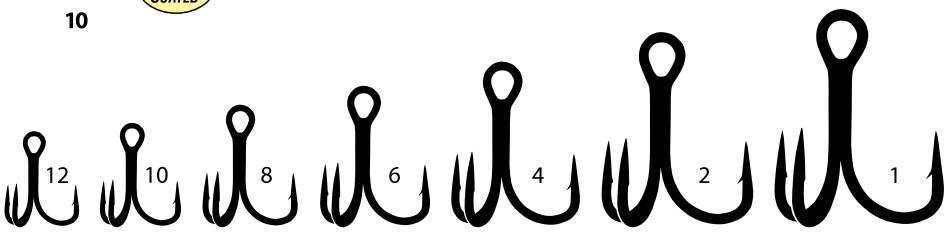

The Kamatsu Pinhead Treble PTFE is a series of specialized treble hooks designed for the precise rigging of large and medium-sized soft plastic lures. A key feature of this design is the integrated "Pinhead" system, which consists of two specially shaped stabilizing pins. This solution allows for quick and secure attachment of the hook directly into the body of the soft lure, eliminating the need for additional external screws or wires. This ensures perfect balance for the entire rig and prevents the lure from tearing during casts. The geometry is engineered so that the mounting pins are positioned at a right angle to the hook points; once the pins are inserted into the belly or back of the lure, all three arms of the treble hook remain fully exposed and ready for an immediate hook-set. The entire structure is coated with an advanced PTFE (Teflon) finish, which drastically reduces resistance and friction, ensuring an exceptionally secure and deep hook-set. Furthermore, the matte finish effectively eliminates light reflections—a crucial factor when targeting wary predators in clear water. Crafted from top-quality forged high-carbon steel, the chemically sharpened points retain their surgical sharpness for an extended period and will not deform, even when battling trophy-sized pike or zander. The Kamatsu Pinhead Treble PTFE is an indispensable component for modern soft-lure rigging systems, combining flawless ergonomics and discretion with maximum effectiveness in any conditions.

5195 GRAND PRIX CARNIVORE TREBLE K-078

■ 6 pcs

0 TG 10 PTFE COATED

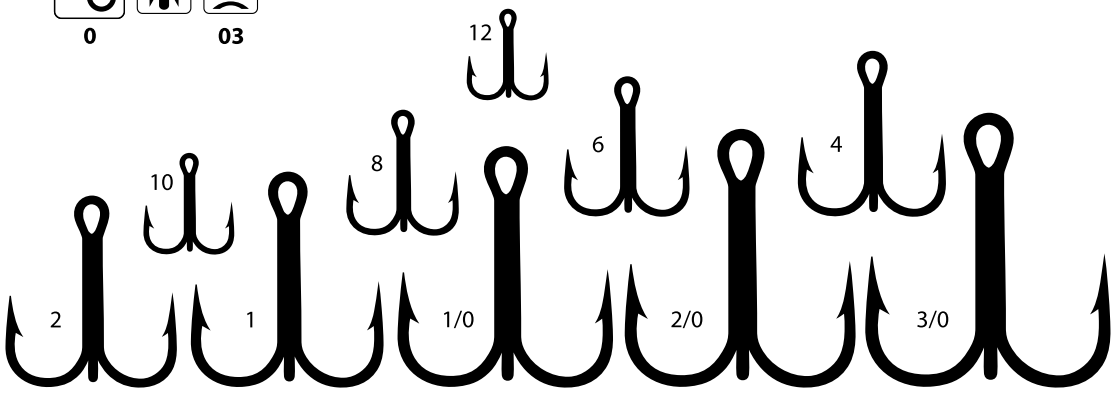

Grand Prix Carnivore Treble – Kamatsu treble hooks have a wide fan base, and this is by no means unfounded. Committed to the highest quality, our new model, the Carnivore, is a true jewel in the crown of uncompromising spinning anglers. Chemical sharpening for outstanding grip, reinforced forged carbon steel wire, and a Teflon coating to ensure rust resistance and a sure hook-up with every bite. The Teflon coating also has the added advantage of being able to suppress light flashes, which is very important in shallow, translucent and clear waters. The wide range of available sizes will allow to arm various lures, from trout wobblers to zander or pike soft baits systems.

5194 STRONG ROUND TREBLE K-076

■ 6 pcs

0 | BLN 03

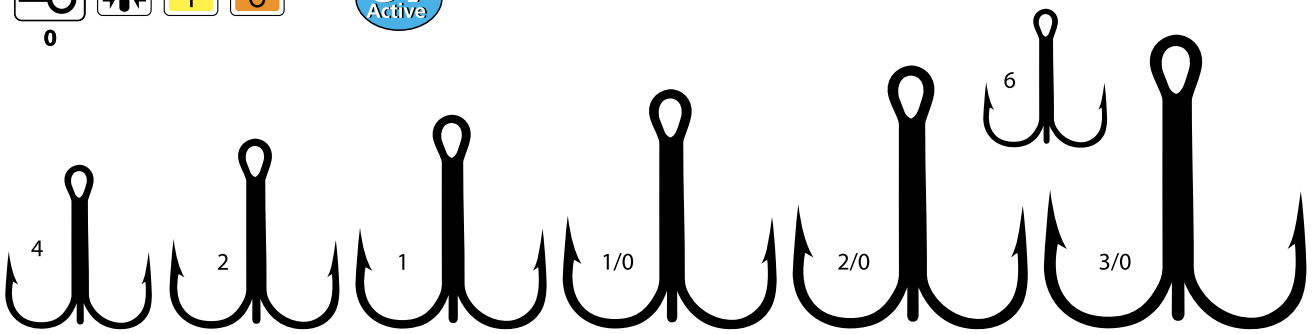

Strong Round Treble – The classic Round hook profile given with reinforced, carbon forged wire is an item on the tackle menu that no demanding predator hunter should pass by indifferently. Other important aspects worth mentioning are forged bends, chemically sharpened, reinforced points and small barbs which securely hold the hooked fish. Depending on the size selected, they are perfect for rigging wobblers, spinners or soft bait rigs.

Strong Round Bent UV Active Kamatsu Trebles. Our trebles meet the strictest demands of modern fishing. They feature a short shank, a rounded bent, and are coated with UV-active orange or yellow paint that glows under ultraviolet light. The incredibly sharp and durable point ensures a reliable hookset. The hook's shape, along with the effective barbs, prevents fish from slipping off during hauling. Available in various sizes, these trebles make it easy to choose the optimal size for almost any lure.

PRO CARP LEADERS

Special leaders designed particularly for carp fishing with the hair rig method. It was tested in many carp fisheries across Europe and performed well in all conditions. Kamatsu Pro Carp leaders are an excellent choice for all fishermen hunting great carps due to the highest quality used components. The leader's line and knot guarantee that the lure looks natural and is not suspicious to the most cautious fish. Only selected Kamatsu hooks and swivels were used for assembly of the leaders in order to avoid unpleasant surprises while fishing. The hooks are tied using the most effective method – the so-called "knotless knot". The swivels are tied with a special knot which distributes the load on the entire knot rather than the point of contact with the swivel. The leaders are built on the sinking lines coloured the way effecting camouflage for the most types of fishery's bottoms is guaranteed. Ideal for prefect fishermen who delight in cultivated hobby.

CARP LEADERS

We present a leader's kit with hooks designed for enthusiasts of the hair rig method. They can be used by both professionals and amateurs with success. The individual elements were composed based on the suggestions of professional carp fishermen. They have determined the standard shape of hooks, the length, strength and colour of the used braids as well as the size and type of swivels. Each package has stoppers attached.

BRAIDED LINE LEADERS

Besides traditional monofilament, braided line is a leader material which has a large group of enthusiasts. Now our series of leaders for Method Feeder has been extended by models made of special braided lines in small sizes. It is worth reaching for this version of leaders because of their softness and high durability characteristic for braided line. These obvious advantages of the line can now be used with our leaders, which, depending on the version, are finished with a ring, fast-stop or a spiked needle made of stainless wire. The leaders are made on the basis of selected Kamatsu hooks, which allows their optimal selection depending on the lure and species of the fish caught

MONOFILAMENT LEADERS

Leaders designed on the basis of experience of our testing team in many European fisheries. The high quality materials used to create these leaders make them top of the range for Method Feeder fishing. The range of types, sizes and strengths available makes it easy to choose the leader best suited to the size and species of fish you are targeting. You will find both leaders with a ring, a fast stop or a stainless steel wire spike. These variants will allow quick and easy application of baits, no matter what you are fishing for. Whether it's pellets, wafters, pop-ups or classic earthworm, Kamatsu Method Feeder leaders will handle any of these baits perfectly.

AUTOMATIC QUICK MOULD

The Quick Mould is a very useful gadget for filling L-sized baskets. Its shape and size ensures that it can be used for most of the baskets available on our market. The mould is made of high-quality plastic. The automatic function makes it possible to quickly fill the basket with material and remove it from the mould. All that remains is to cast accurately to the selected spot and wait for the desired bite of specimen. Internal dimensions: length - 5.4 cm, width - 3,3 cm Fits to the Kamatsu Quick Catch, Quick Swap, Eco baskets.

Automatic Quick Mould
Art. no 960 001 018
1 pcs

METHOD FEEDER ECO SET

Eco-friendly, lead-free method feeder basket with silicone mould for easy removal of the filled set. Simply squeeze the bottom of the mould to release the basket.

■ Method Feeder Light ECO SET size L
25 g + 35 g + mould

50 cm LEADERS

Our special offer - hooks with tied leaders is for novice fishermen as well as for those who do not want to waste time on laborious tying of leaders. The line length of the "ready-made" kits is 50 cm. Such tied leaders are suitable for fishing in rivers (long leader) as well as in standing waters (short leader). The second option only requires cutting off the excessive fragment of the line. The leaders are tied from 0.10 to 0.30 mm monofilament line and are wrapped in packages with the images of the fish or baits for which they were intended. There are plenty of choices and the hooks are very affordable.

Construction of 9 digit article number for leaders 50 cm

Fluorocarbon Coated 50 cm LEADERS

We introduce a new series of leaders tied to a fluorocarbon coated monofilament line to complement the offer of the ready-made 50 cm leaders. The line is characterized by increased resistance to abrasion and reduced visibility in the water which enables fishing of cautiously feeding large fish. The careful workmanship and wide range of hooks enables the easy choice of an interesting model tailored to the specific fishing method for particular fish.

The Kamatsu Gyotaku Competition X8 is a premium-class spinning braid designed for the most demanding anglers. Made from nanofibers produced through an advanced polymer electrospinning process, it offers unparalleled quality and reliability. Its exceptionally tight weave provides a perfectly smooth texture and a round profile, enabling seamless and precise lure presentation while minimizing resistance during casting, thereby enhancing fishing efficiency. The Kamatsu Gyotaku Competition X8 also boasts high abrasion resistance, making it an excellent choice for fishing in challenging conditions and diverse waters.

A braided line developed especially for predator fishing with artificial lures. It is characterized by increased line strength, knot strength, and unprecedented smoothness. Extremely long casts are the result of tightly woven, super-thin fibres of Japanese polyethylene. Additional benefits of this technology are increased abrasion resistance and significantly longer casts, compared to other 8 strand braids.

TECHRON MICRO BRAID X4

OLIVE GREEN	LIME GREEN	INVISIBLE

The Techron Micro Braid braided line was developed especially for fishing with SUL/XUL/UL sets, and is perfectly suited for this task. The extremely thin polyethylene fibres have been carefully braided to give a smooth surface that glides easily over the guides, resulting in significantly longer casts. Despite the impression of finesse, it is a surprisingly strong line, allowing for an effective and fast reeling in of the fish. An additional, important feature of this line is the extraordinary precision of lure control, as its drag to water is minimal.

HARV ESTER MONO

NEW!

color: clear

150 m Art. no.	Diameter (mm)	Strength (kg)	#G
221 000 103	0,103	0,87	0,4
221 000 112	0,112	0,91	0,5
221 000 123	0,123	1,13	0,6

An advanced, professional polyester line designed for Trout Area and Ultra Light fishing enthusiasts. It perfectly bridges the gap between classic monofilament and braid, offering unprecedented sensitivity and control over micro-lures weighing even less than 1 gram. Thanks to its unique polyester structure, it features near-zero stretch, guaranteeing instant registration of the most delicate bites. It is a fast-sinking line that quickly cuts through the water surface and eliminates the wind-induced "belly" in the line, ensuring constant contact with the lure. Its perfectly smooth surface allows for extremely long casts with micro-spoons or crankbaits. Furthermore, the material is completely hydrophobic and UV-resistant, retaining its factory specs for a long time. The product comes on an ergonomic 150-meter spool with a precise marker at exactly 75 meters. This allows you to easily split the line into two equal, fully functional segments - a length perfectly optimized for shallow trout reel spools. Please note that tying an ester line correctly requires special care and thorough lubrication of each knot before tightening, which prevents friction from weakening the material's structure.

TECHRON UNILINE

color: light grey

150 m Art. no.	Diameter (mm)	Strength (kg)

208 151 028	0,281	9,40
208 151 030	0,309	10,90

Kamatsu Techron Uniline is a monofilament line that excels in situations requiring precision, reliability and speed. Its exceptional abrasion resistance and high knot strength make it an ideal choice for any specimen hunter. A wide range of sizes makes it possible to choose the right line both for finesse fishing and for definitely heavier sets. When it comes to effective fishing, Kamatsu Techron Uniline has no equal.

TECHRON PREDATOR SPIN

210 151 028	0,281	9,40
210 151 030	0,309	10,90

Kamatsu Techron Predator Spin is a high-quality spinning line designed for predator fishing. Available in diameters from 0,14 all the way up to 0,30 mm and a length of 150 meters, it provides excellent casting characteristics and control over lures that vary in weight, which is crucial when hunting aggressive fish species. Its abrasion resistance and high knot strength make it a reliable choice for any angler looking for a line that will stand up to the demands of even the most demanding conditions. Ideal for both finesse and more dynamic fishing methods.

TECHRON FEEDER

color: dark green

211 151 030	0,309	10,90

Kamatsu Techron Feeder is a specialized line created for the feeder method, ideal for precise ground fishing. With a variety of diameters available, this line provides excellent sensitivity and control over sets, which is crucial when fishing with a clasic feeder method. High abrasion resistance and excellent knot strength guarantee reliability even in tough fishing conditions. Kamatsu Techron Feeder fishing line is an ideal choice for anglers who value efficiency and precision in any situation.

TECHRON METHOD FEEDER FAST SINKING

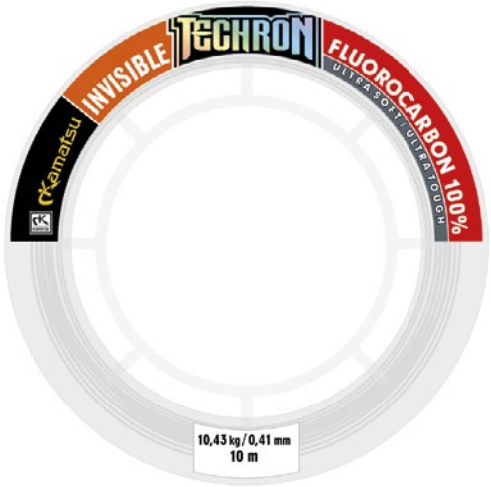

color: bottom brown

300 m Art. no.	150 m Art. no.	Diameter (mm)	Strength (kg)

209 300 030	209 150 030	0,31	10,90

A Kamatsu sinking line that performs superbly where precision, reliability and speed are required. It offers excellent abrasion resistance and high knot strength, making it an excellent choice for safe and effective fishing in difficult spots. Low stretch and lack of memory of shape are other important factors that should definitely appeal to anglers specialising in feeder and method feeder fishing. Perfect for larger carp, in a colour that masks well against the bottom, it is spooled on 150 m and 300 m spools. The available range of sizes makes it possible to find the right line for both finesse, classic feeder fishing and heavy, typical carp fishing with method feeder. When it comes to effective ground fishing, this line is second to none.

Clear - 100% transparent monofilament line with a refractive index nearly identical to the water. Incredibly resistant to abrasion, fully resistant to UV rays and very soft. On the contrary to other monofilament lines, Fluorocarbon 100% does not absorb water which means it does not age and is resistant to salt water. The Fluorocarbon 100% is a luxury fishing line, resistant to chemical agents and applicable for all fishing methods. Carp, fly, spinning, float and ground fishing enthusiast - anyone who at least once spools their reel with Fluorocarbon 100% will certainly appreciate its unique properties. It is especially recommended for fishing in crystal clear waters. Available in diameters from 0,104 to 1,02 mm, packed on 10 and 20 meter spools.

Kamatsu Liquid Wire 7X7 spinning leaders are versatile leaders available in various lengths and strengths, perfect for predator fishing. Made from 7X7 wire, they offer excellent flexibility and durability. The set includes two pieces of ready rigs or 5 m for self-made traces, making it a practical solution for longer fishing trips. An ideal choice for any angler who values reliability and effectiveness.

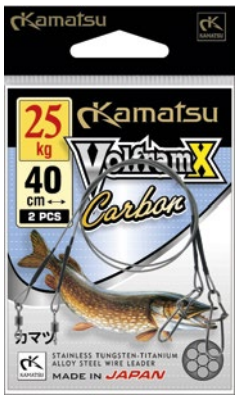

LEADERS VOLFRAM X CARBON

The Leaders are made of steel fibres coated with graphite and equipped with excellent quality swivels and snaps. Full resistance to cutting and twisting due to overload caused by reeling the fish or releasing a snagged bait. Extremely meticulous strand and 100% water resistance. Available in 20 cm, 30 cm and 5 m long sections of guaranteed load of 5, 10, 15, 20 and 25 kg will make pike fishing enthusiast very happy. Needless to say – test it and you will surely appreciate its quality.

LEADERS VOLFRAM X

Complete leaders made of chromium-tungsten steel with perfectly matched dark brown colour will resist the teeth of even the largest pikes. Packed in packages most frequently purchased by fishermen in lengths of 20 and 30 cm with 5 and 10 kg of breaking strength. They are the only leaders available on the market which can resist the hardest battles with the fish due to the unique production technology. The use of Volfram X will let you forget about jagged leaders curling into a spiral.

Responding to the problems of environmental pollution, we decided to introduce lead-free jig heads. Made from an alloy with a similar density to the lead, cast on super sharp Kamatsu X-Press hooks, they will allow you to rig a wide range of soft baits. They are available in a large weight range and two colour options, matt silver and matt black. By using our innovative jig heads we can now have a real influence on the degree of environmental pollution in our hobby. It is worth getting them because it is in our common interest to provide favourable conditions for fish and other aquatic organisms.

Double Arrow heads were designed for rigging the largest soft lures available on the market. Super sharp, forged and hardened hooks were used for production of those professional jigs. They underwent a multi-stage quality control which is necessary to detect the tiniest imperfections during the production of a hook and to reduce the probability of losing a medal-winning fish to near zero. The optimal weight deployment guarantees firm hooking at any distance and proper action of the soft lures. All Double Arrow heads have metal spikes which prevent the lure from slipping off during strong casts and struggle with the fish.

Light game fishing enthusiasts will appreciate the recently introduced innovation: heads in 4 small sizes with micro barbs firmly holding the soft bait. Some bait has a body so soft that it is impossible to properly set the lure on the jighead with the traditional collar. Our micro barbs help to overcome this problem and allow for excellent presentation of the lure without any risk of damaging during the setting of the lure. Perfect Kamatsu hooks used in the production allow for firm hooking and effective reeling together with the satisfaction of your good choice.

While preparing the line of Spinning System accessories we were guided by the demand for specialist elements of spinning sets, which often decide about the final success during fishing. In this group of articles you can find high-quality elements made of tungsten, such as bullet weights, weights for Texas and Carolina Rig sets, as well as various accessories for soft baits. A separate group is made up of heads on two types of hooks, which deserve special attention because of the precision of workmanship, exceptional sharpness of the hooks and the use of tungsten. They are the perfect choice for finesse and soft lures made of soft plastics and fly materials.

Cheburashka Tungsten weight

A classic construction made from super heavy tungsten. They are distinguished by their ideal ball shape and the meticulous shape of the wire, which makes them easy to use in combination with hooks ending with an eye.

SWIVELS, SLEEVES, RINGS AND SNAPS

Wide variety of choice of popular barrel swivels, rolling swivels and the strongest ball-bearing swivels. All of them are suitable for delicate float fishing, medium spinning, heavy spinning and ground fishing methods depending on the size (22 - 4/0). We also prepared a wide offer of Kamatsu snaps. Starting from the interlock snaps for light and medium spinning, all float based and light ground methods to extremely strong snaps made from a single piece of wire. Crosslock and Fastlock snaps even when heavily overweighted during the reeling of a large fish may bend and twist but will not open. There are also various sets of swivels, snaps and swivels with snaps avilable as well as brass sleeves used as clamps terminals for finishing metal leaders.

STOPPERS

Small items useful in any fishing method. The variety of shapes and colours (black, coloured and colourless) should meet the needs of every fisherman. Perfect as limiters for wagglers, “bumpers” protecting the knots or drop shaped lead with swivel, as stoppers protecting the tip of a pole rod from taking water when the tip gets submerged.

PELAGIC PULSE

A lure designed for the most demanding anglers, tested in 2024 during several hundred hours of intensive trials in Polish and foreign fisheries. Its slim, tapering, and flexible body ends with a delicate tail that provides subtle and natural movements in the water. Realistic side fins and a full, sensitive "mermaid" tail create an incredibly lifelike presentation, effectively attracting predators. Additionally, there is an option to cut out the tail's filling, creating a classic V-shaped tail. In this case, the Pelagic Pulse tail moves more delicately, which in some situations can significantly increase its effectiveness. It's a versatile lure, perfect for pelagic fishing with a live sonar system, as well as for traditional spinning. It can be rigged in many ways, offering a wide range of options for various fishing techniques. We particularly recommend pairing the Pelagic Pulse with original Kamatsu screw-in jig heads, available in weights of 30, 40, 50 grams, which perfectly complement this lure.

SHADOW HUNTER

The Kamatsu Shadow Hunter is a modern soft bait designed in Poland by Kamatsu engineers with the goal of targeting large pike and zander. During testing, it also performed exceptionally well with catfish, making it a versatile and universal lure for various predators. The Shadow Hunter is distinguished by its innovative design, including a hollow chamber located in the center of the lure, which folds perfectly into the fish's mouth when it strikes, increasing the effectiveness of the strike. A scent attractor, rattle or small glow stick can be inserted into the chamber, increasing the lure's effectiveness both at night and in murky water. Its cylindrical shape, combined with four side fins, gives the lure a realistic appearance and natural action, making the Shadow Hunter particularly effective on high-pressure fisheries. The lure is equipped with a "mobile tail," which produces subtle vibrations in the water, transitioning into stronger pulses with more dynamic rod tip movements, effectively enticing predators to strike. The density and flexibility of the material ensure excellent action and high durability, making the Shadow Hunter a highly resilient lure, even after catching multiple fish. This is a real deadly weapon for pelagic fishing for the largest predators. For optimum effectiveness, we recommend rigging the lure with dedicated Kamatsu heads, which work perfectly with the Shadow Hunter. In case of delicate strikes, we recommend rigging the lures with a second treble.

KAMATSU WOBBLERS

Wobblers article number structure

32 XXXX XXX

Wobbler type | Color

Kamatsu wobblers are of the highest workmanship quality with parameters perfectly fitted to the conditions of all fisheries and tastes of all predators. Enthusiasts of light and heavy spinning for catfish and sea trout will find something for themselves. These wobblers should take an important place in the boxes of danube salmon hunters and enthusiasts of more popular trolling. All wobblers are very carefully made of very hard and damage resistant materials. A wide range of colours will satisfy the most demanding fishermen as well as the well-chosen treble hook. The rattle is another reason why our wobblers should be attacked by predators with even more zeal. In addition to the interesting acoustic effects it moves toward a wobbler's tail at casting to stabilize it, resulting in longer cast. Note: All wobblers have a split ring mounted in the front eye which can be removed when using a snap.

DRIFT GLIDE

NEW!

Kamatsu Drift Glide is a modern, lipless jerkbait with a high profile, created to target the most finicky predators. The lure's design has been optimized to achieve the widest possible darting action. With every twitch of the rod, the bait performs long, incredibly regular lateral glides. On the pause, it temptingly shimmies on the drop, provoking pikes and zanders into explosive strikes. This jerkbait redefines effectiveness, and its operation is astonishingly simple. Even beginners to jerkbait fishing will handle it with ease – a light twitch of the rod tip or an accelerated turn of the reel handle is all it takes to trigger it flawlessly. Its deadly efficiency has been proven on lakes, rivers, and Baltic skerries.

DIVING SHAD

NEW!

The Kamatsu DIVING SHAD 55mm F is a floating crankbait with an aggressive action, designed to quickly and precisely target predators in deeper water layers. Thanks to its elongated, sturdy diving lip, the lure dives rapidly to its optimal working depth and stays in the strike zone all the way back to the bank. The crankbait is equipped with large 3D eyes that act like a red rag to a bull, giving predators a clear target to aim for when they strike. Inside the body is an integrated long-cast system that stabilizes the lure in flight, allowing for accurate, long-distance casts. The lure also features an acoustic rattle that effectively attracts predators with its sound.

DIVING MINNOW

NEW!

Kamatsu DIVING MINNOW 70mm F is a floating model featuring a slender, elongated profile of a classic minnow, combined with an extended lip. This design allows the crankbait to dive rapidly near the bottom while maintaining a characteristic, tight tail action with a strong flashing effect. With every twitch, it darts violently off its retrieval axis, showing its sides and triggering predators to strike. During pauses, the lure rises slowly, allowing it to safely bypass underwater snags, rocks, or sunken trees. Inside the body, an integrated long-cast system is hidden to facilitate precise casting, along with a subtle rattle that effectively attracts predators even in murky waters.

VIKING VIB

NEW!

Kamatsu Viking Vib 70 S is a lipless vibrating crankbait designed for special tasks across various water layers. Instead of a classic lip, the line tie is located on the back of the lure. This design allows the crankbait to start working instantly at the slightest turn of the reel handle, generating an extremely strong vibration that propagates perfectly through the water and triggers predators from great distances. The laterally flattened, 70 mm long body perfectly mimics the natural shape of a roach or bleak, which are the primary prey for river and lake predators.

MAJESTIC MINNOW

The Kamatsu Majestic Minnow is a precisely engineered lure designed for anglers seeking maximum efficiency in predator fishing. Its slim, classic minnow shape perfectly imitates a small baitfish, while the holographic finish reflects light intensely, attracting the attention of pike, zander, and perch – even in low-light conditions. At 115mm in length and 13g in weight, this floating lure offers versatile presentation – from sharp twitches in a twitching technique to steady retrieves. Its subtle, narrow action gives it an exceptionally lifelike character, making it ideal for use in both still waters and rivers with moderate current. Fitted with three sharp treble hooks, strong split rings, and a reinforced lip, it ensures secure hook-ups and reliable control during the fight with even the largest fish.

BABY CRANK

The world's smallest crankbait with a magnetic weight transfer system, the Kamatsu Baby Crank, is a true breakthrough in the world of micro crankbaits. This compact lure, measuring 35 mm in length and weighing 4 g, is equipped with a patented magnetic weight transfer system, which delivers impressive initial speed and exceptional stability during casting. This allows anglers to achieve longer casting distances, regardless of wind strength or direction. The precisely balanced body and innovative magnetic system allow the Baby Crank to move through the water with exceptional naturalness, faithfully imitating the behavior of small fish. Its aggressive, shimmering action and realistic details effectively provoke predators to attack – even the most cautious ones. Equipped with sharp, reliable treble hooks, it guarantees a sure hookset, and its versatile action allows for effective fishing in both rivers and lakes. An ideal choice for perch, chub, ide, and trout. Kamatsu Baby Crank – a perfect combination of technology, precision and effectiveness, created for demanding anglers who value maximum efficiency and quality of workmanship.

LUCKY MINNOW

Its name says it all – a true lucky charm. Lucky Minnow is a lure that faithfully imitates the look and movement of a small fish, effectively attracting predators. With a carefully designed body, Lucky Minnow features a shimmering action in the water, performing excellently both during a drop and fast retrieval. The lure is equipped with strong, sharp treble hooks and a long-cast system for maximum casting distance. An ideal choice for anglers seeking a reliable lure for challenging waters!

RIVER SCOUT

This neutrally balanced minnow-type lure is designed for versatile fishing in both still and fast-flowing waters. It is ideal for catching pike, zander, catfish, and asp. The 60 mm model is effective for perch, chub, and trout. The River Scout excels in targeting large salmonids like sea trout, brown trout, and salmon in rivers with a dynamic current. Equipped with an integrated casting system, it allows for longer, more accurate casts, enhancing fishing efficiency. Its precise construction ensures proper balance, resulting in natural movements that attract predators. A versatile choice for anglers seeking reliable, all-around lures to increase their chances of a successful catch.

JUMPING MINNOW

The elongated body of this lure, closely resembles a large bleak, and tells us at first glance what it has been designed for. The ultimate goal of this project was to achieve a realistic action, and to increase the casting range to the max. This little minnow with its Magnetic Running Shaft system allows you to send it over striking distances, and cover a large area of water. When guided with jerks and pauses, the Jumping Minnow will unleash its true potential.

SECRET SHAD

Despite its mysterious name, certain aspects of this lure can be seen at first glance. Secret Shad is made with the utmost attention to detail. Only when you cast it into the water does it show us what kind of secret it hides. Extraordinary performance! Tempting, flickering and mirroring action, flawlessly tempts pike, perch, trout and zander. Retrieve it at a steady pace, jerk the rod tip, stop, and let it slowly float... These simple tricks will have a great effect on the number of bites, as we have found during many of its tests.

ROCKY RIVER

Less than four centimetre long, floating wobbler that can make a big fuss in the fishery. At steady medium speed it moves aggressively to the sides, arousing interest in everything in the vicinity. Perches, grown chubs and even lazy pikes feeding on small fish will not resist it. After all, actions speak louder that words, and action of this one screams

MICRO SNACK

The unique shape of this wobbler immediately attracts attention. We assure you that not only yours! Micro Snack is eagerly eaten by perch, trout or chub. Narrow, flashing action combined with flickering perfectly fits the tastes of a wide range of river and lake predators. Just retrieve it with short twitches, with two-three-second pauses, so that even those fish that are only following would strike the lure with great ferocity. Micro Snack is one of these lures, which will have a fixed place in the compartment of your favourite tackle box.

CRUISER MINNOW

This lure allows you to effectively fish the upper parts of the water. Cruiser Minnow is a real treat for pike from underwater grass bed and zanders lurking among rocks. The built-in long cast system allows you to reach much further than you might think. The moving load during casting moves to the back of the lure for maximum distance, and during retrieve it goes back to the front, stabilising the action.

FLASH MINNOW

An interesting internal construction of this wobbler lures predators, sensitive to visual stimuli, with exceptional effectiveness. While retrieving the wobbler, the holographic strip placed inside the dry chamber falls into tight vibrations, temptingly reflecting the light. Flash Minnow is definitely worth recommending for pike, zander and perch. It works very well both during steady retrieving as well as during twitching

TWITCHING MINNOW SP

Twitching Minnow is an extremely catchy wobbler designed to catch fish that like bigger lures. This lure catches really stunning fish, all you have to do is twitch it. Dynamic twitches of the tip will release its full potential, tempting both inactive and feeding predators. The key aspect is a moment of pause, literally 2 seconds, during which the most frequent bites occur. Built-in long cast sliding balance system ensures long and accurate casts, as well as an attractive, slow emergence of the lure with a slightly raised head.

PIKE SNACK

Characteristic shape of the body and attractive action even with regular retrieve, make Pike Snack a real treat for every aquatic predator. It is an excellent model designed for twitching, able to impress on almost every water. Jerking the tip of the rod while retrieving the line awakens in the predators a sincere desire to taste this delicacy. After a few jerks, stop the retrieve and keep in contact with the lure. This is the moment when the fish often decides to strike. So, just give them what they want, and for yourself, a real pike killer.

DRIFTIN’ SHAD

This wobbler is designed for trout fishing in running waters. However, tests have shown that apart from its planned role, it is excellent at provoking all kinds of other predators. Zanders, asps, or pikes without the slightest hesitation strike this lure, attacking it fiercely. We do not know where the secret of its effectiveness lies. However, we do know for sure, that it is one of the lures, which are worth having with us on every single fishing trip.

RATTLING MINNOW

Wobbler designed for fishing from the hand as well as for trolling. It attracts pikes and zanders perfectly. It is a floating model, which during spinning we will bring to the depth of about 2.5 m and trolling even deeper. The lure is equipped with a rattle, additionally attracting courious predators

Model	Art. no.	Length (mm)	Weight (g)	Cast range (m)	Depth (m)	Line strength (Lbs)	Type

PHANTOM BLEAK

If you think that this wobbler looks like a bleak, you are absolutely right. If you think it is an asp wobbler, you are also right. It is very effective in catching these fish in any river, right from the mountains, down to the sea. The colour versions of Phantom Bleak fit asp tastes perfectly, allowing you to choose something for basically any conditions. Just quickly move it in the upper parts of the water near the places where bleak gathers, and you won't have to wait long for a strike.

PHB 70 S	324 082 xxx	70	13	35	0,2-0,8	10-20	sinking

SUPER CRANK

The barrel-shaped profile of this wobbler will allow to send it very far, and the long lip will allow to move it to the depth of up to 2 m. Each 2-3 second pause in retrieve of this lure causes its slow ascent, which additionally stimulates predators to attack. During the tests, Super Crank lured perches, barbel and pike perfectly. The solid Kamatsu trebles complete the rest. It is definitely worth to have it in your arsenal.

SCR 40 F	324 069 xxx	40	4,5	20	1,5-2,0	6-8	floating

CRAZY CRANK

A small crankbait, which is an irreplaceable lure for virtually any fresh water. It can effectively provoke even an inactive predator to strike. Even during the most ordinary retrieve, as befits a good crankbait, it can surprise you with its exceptional effectiveness. We probably don't know how it can be wrongly run. A low submersion predisposes it to fishing in shallower waters, where it is fiercely attacked by pike and perch

LUCKY BUG

About the fact that imitations of insects are very effective, especially when fishing for "white" predators, all spinning anglers know. Therefore, the offer of Kamatsu wobblers has been extended by this "bug" which should be placed in the box of every chub and ide hunter. It is a floating version of 3.5 cm length with a lip. It can be led on a shallow depth or released with the current. The wobbler is available in 10 colours imitating beetles, bugs and crickets. Chubs and ides will certainly not resist.

LBU 35 F	324 073 xxx	35	3,1	15	0,4-0,8	4-6	floating

REAPER

Dedicated to fishing in deep lakes and rivers, this lure shows its outstanding performance in both spinning and trolling techniques alike. Its homogeneous and strong shaft runs through the whole length of the body, which makes forced reeling in of even the biggest predator fish easy. The built-in rattle makes the Reaper more attractive, provoking even the laziest fish to attack.

SLOW GLIDER

A big pike often stays in shallow spots, for example, amid flooded reed beds or in the weeds where the depth from the water surface to the weed-line makes less than one meter. In such places the fast-sinking model was hard to animate. That is why we have decided to introduce Slow Glider – the perfect lure for slow retrieve, stable and with repeatable action. Thanks to its minimal sink rate Slow Glider allows you to use different animation techniques and to effectively provoke the fish to strike.

HOLLOW FROG

Brownie 339 000 002 **Spotted Tiger** 339 000 001

A special task lure. It is perfect for those places where it is impossible to fish even with an snag-free or offset lure. Submerged, underwater grass beds or reeds are virtually always a place of residence for predators. Hollow Frog retrieved with a small, "froggy" movements on the water surface, can effectively provoke pike, perch, or river trout and chub to strike. However, if the frog is to be used in open, clean water, we have provided it with a fixed eye to add the stinger to increase its hook up ratio.

WATER SCOUT

Long Cast

Like not so many times before, this time, we were simply astounded. This stickbait many times saved our self-esteem, where other lures failed. For our pro staff, it's one of the most often used lures for their recreational fishing. It flashes its belly during free drop, turns side-to-side when twitched, and basically, makes the fishing whole lot of easier! Water Scout should be placed on a pedestal among other lures as an example of pure perfection - simply, it can't be surpassed. Additionally, shape and weight of this stickbait grants you with extremely long casts.

QUICK HUNTER

Long Cast

Small wobbler with great casting potential. Its lip is not particularly large, but actually, that's his advantage. Action that you can give it, makes the fish going into murderous mood - they are going to attack it with great ferocity, often, when the fish won't hook at first time, it will continue attacking this small lure. Quick Hunter was developed for ocean fishing (bluefin tuna), yet it works excellent in fresh water for large trouts, salmons and asps. Color chart is chosen to work efficiently in any conditions.

WICKED POP

A highly effective popper which took its toll on many great fish. 14 cm in size it will perfectly provoke both freshwater and marine predators feeding near the surface. The specific splash due to pulling of the tip can lure the fish even if it stays a few meters below the water surface.

ROOSTER POP

Popper lure, recommended for fishing big predators in the sea. An outstanding feature of this model is its monolithic body. Lasercut from acid-resistant steel guarantees outstanding durability of the lure. This popper can easily handle GT, tuna or rooster fish and, thanks to the perfect placement of the lead weight inside the body, can perform incredibly long casts. Long-distance casting is crucial during fishing for cautious predators.

GT POP

Big fish like big baits. This is an indisputable fact. If you are making plans to catch a bigeye jack or large tuna then GT Pop is a musthave lure in your tackle box. During testing sessions these poppers showed outstanding performance, constantly showing far better results than similar lures of this kind.

REEF POP

The vicinities of coral reefs is one of the places where schools of oceanic pray fish gather. Consequently it is also the natural habitat of all predators. Reef Pop lets you effectively explore all those spots, as it is a perfect imitation of prey escaping close to the surface of the water. With its strong wave produced by the lure's head Reef Pop provokes immediate attacks of swimming-by predators.

HYBRID HYDRA NEW!

Discover the new definition of hydroacoustic provocation. The Hybrid Hydra is a modern, two-section pike streamer that combines traditional craftsmanship with dynamic underwater action. The body is crafted from premium, select natural fox hair, allowing it to maintain incredible volume and "breathe" even during a complete standstill. It is enhanced with synthetic Flash fibers that generate enticing reflections to trigger predators. The lure is crowned with an ultra-soft, split polymer tail that generates a powerful hydroacoustic wave, detectable by a pike's lateral line from a great distance. Thanks to its jointed construction, the streamer moves with exceptional smoothness and fluidity, responding instantly to every twitch of the rod tip. Designed primarily for spin fishing, when rigged with a cheburashka or a sinker (such as a Fastach sinker), it gains excellent casting properties and allows for precise depth control – from running just below the surface to an aggressive jigging action in deeper waters. A fantastic alternative is rigging it with a floating or slow-sinking sbirolino, enabling extra-long casts and a highly attractive presentation in shallow water. Crucially, due to its lightweight and supple design, this model can also be successfully used in fly fishing.

Kamatsu Trout Area Marksman Spin

Kamatsu Trout Area Finesse Spin

Trout Area Marksman Spin

The Marksman Spin is designed for anglers who demand ultimate precision and lightning-fast lure feedback. Its 180cm length combined with a deep, progressive action gives unmatched control in tight or technical trout ponds. It excels with lightweight spoons and micro crankbaits, delivering crisp sensitivity and immediate response. The Marksman lives up to its name – a rod built for pinpoint accuracy and flawless blank performance.

Action	**Line (Lbs)**	**Weight (g)**	**Transp. length (cm)**	**Number of elements**
Moderate	3-6	72	93	2

Trout Area Finesse Spin

The Finesse Spin is made for anglers who value finesse and versatility above all. Its slightly longer blank with a progressive action enables longer, smoother casts while maintaining superb sensitivity. It handles light lures across a broad weight range – from micro jigs to small crankbaits – with total control. A perfect choice for both competitive and recreational anglers seeking the ideal balance of power and delicacy. Finesse combines technique, elegance, and performance in one refined rod.

TROUT AREA ANIMA CRANKY

The Anima Cranky wobbler was designed specifically for trout area fishing, where precision and delicate presentation are key. Its compact size and sinking design allow for effective penetration of both the bottom and mid-water zones. This model is equipped with a thin, exceptionally sharp barbless hook, compliant with trout area competition regulations, ensuring a secure hookset while ensuring safe and quick release. It performs best with a slow, steady retrieve, but is equally effective with light twitching, offering versatility in all conditions.

TROUT AREA ANIMA WIGGLE WORM

The Kamatsu TROUT AREA ANIMA WIGGLE WORM is an innovative wobbler designed for trout area fishing. Its design combines the features of a long crank with a unique lip shape. In this model, the lip doesn't control depth, but stabilizes the retrieve and gives the lure a wide action. The ANIMA WIGGLE WORM works most effectively with a slow retrieve, generating smooth, undulating movements and a subtle hydroacoustic wave that doesn't spook fish. This makes it perfect for high-pressure waters and for targeting wary trout.

221 000 123	0,123	1,13	0,6

An advanced polyester line designed for Trout Area and Ultra-Light fishing techniques. It bridges the gap between monofilament and braided line, offering exceptional sensitivity and control over lures weighing less than 1 gram. With near-zero stretch, it provides instant feedback on even the subtlest bites. As a sinking line, it cuts through the water rapidly and prevents the formation of a "bow" (slack loop) in the wind, ensuring constant contact with the lure. Its smooth surface facilitates long-distance casting with micro-spoons and small crankbaits. The material is completely hydrophobic and UV-resistant, allowing it to retain its original properties for a long time. The 150-meter spool features a marker at the 75-meter mark, making it easy to divide the line into two equal lengths—perfect for the shallow spools typically found on trout-fishing reels. Please note that tying knots with polyester line requires care; always moisten the knot thoroughly before tightening to prevent friction-induced weakening of the material.

TROUT SPOON PRISM

The Kamatsu Spoon Trout Prism is a compact spoon designed specifically for trout fishing in the Trout Area. Its trapezoidal shape and slightly curved body deliver an attractive, shimmering action even with a slow retrieve. Precise balance, despite its light weight, enables long and accurate casts, even into the wind. The spoon is available in two versions – 24 mm weighing 1.5g and 30 mm weighing 2.2g – and is offered in a wide range of eight double-sided painted colors, some of which are UV-active. Equipped with thin, sharp, barbless hooks that comply with Trout Area competition regulations, it is a reliable option for any spin angler seeking effectiveness and finesse in trout fishing.

The Shard is a specialized spoon designed for trout fishing. Its unique restraint guarantees stable and intense action regardless of the retrieve speed. The double-sided paint scheme further stimulates fish to strike, and the carefully selected weight allows for long, precise casts even in strong winds. The Shard remains firmly in the bite zone, and changes in retrieve speed create an erratic, provocative action that effectively attracts predators. The lure is rigged with a thin, extremely sharp barbless hook – compliant with trout area competition regulations. Available in eight carefully selected colors, some of which are UV-active, significantly increasing the lure's appeal in various lighting conditions.

The Trout Spoon Keiko is a new generation of trout spoons from Kamatsu. They are available in 10 colors selected by our top testers. These versatile lures have proven themselves in all conditions, both for very active fish and, more importantly, for slow feeders. The action of the Keiko depends primarily on the angler's creativity. It works brilliantly with a fast, steady retrieve, a slow retrieve, or on the drop. The spoons are equipped with a sharp, profiled, barbless Kamatsu hook, ensuring quick hooking and confident landing of fighting fish, straight into your landing net.

Spoons have become one of the basic artificial lures for rainbow trout fishing. The appropriate shape, weight, and size of the lure, selected based on the experience of top spin anglers, have allowed us to create a highly effective weapon not only for trout... Our Trout Spoons also perform well for perch and chub, and we've often found pike snags. Top-quality split rings and a very sharp Kamatsu hook, as well as eight colors selected by our testers, complete the package, ensuring our spoons are suitable for all conditions.

New to the KAMATSU family, the exceptionally attractive and highly effective PIKE FLASH spoons are sure to please even the most demanding anglers. Available in three sizes and four color variations, these lures are designed for versatility and effectiveness in any fishery. Thanks to carefully selected colors and realistic patterns, the PIKE FLASH perfectly mimics the natural movement of fish, provoking predators to strike. The lures are equipped with top-quality treble hooks, ensuring a secure hookset and effective haul of the fish, even with the most ferocious specimens. The specially designed shape of the spoon ensures long casts, and it's action in the water is highly enticing to both pike and other predators. The PIKE FLASH is not only effective but also durable—its solid construction allows for repeated use in tough conditions without the risk of damage. If you're looking for a spoon that will help you catch realy big fish, the PIKE FLASH is the perfect choice.

They say: leave well alone. People, basicaly, love to say such claptrap. Times are changing, nobody now is using monochromatic TVs, steam powered trains aren't running along the rails. Old and rusted schemes are being replaced by fresh, new ideas. This affects fishing too, of course. Everybody want to catch bigger fish, and catch them more often. We take a closer look to a classic, inline spinner. Twist Tail is a natural step of spinner blade evolution. We have solved few problems which are common among spinners, and add a few improvements much wanted by modern anglers. Twist Tail doesn't twist line, casts further, and works simply amazing when it's falling free. Those features make it catchy as hell!

■ The perfect tool for filleting fish and meat. The thin and resilient stainless steel blade allows for easy and precise handling of the knife. During filleting, the blade precisely separates the meat eliminating any loss. The set includes a sharpener and a practical case. The knife is available in two blade lengths: 15 cm and 22 cm ■ "comfort grip" handle ■ diamond sharpener for hooks and trebles ■ corrugated handle for better grip ■ clip that prevents the knife from accidentally slipping out of the sheath ■ comfortable handle ■ additional protection against slipping of the finger on the blade ■ stainless steel blade with high elasticity ■ knife sharpener ■ double cone blade profile for easy and precise filleting ■ reinforced ,sharp and springy knife end.

Kamatsu Lure Backpack

Art. no 974 000 002

The Kamatsu Lure is an exceptionally durable, ergonomic, and stylish backpack in shades of gray and blue, designed specifically as a mobile base for spin-fishing anglers. It is crafted from an attractive, hard-wearing material that is resistant to splashes and abrasion; reinforced seams and zippers with oversized pulls—easy to operate even while wearing gloves—ensure long-lasting, multi-season performance. Its well-thought-out design features a spacious main compartment for lure boxes, a front pocket for essential accessories, a bungee cord system for a rain jacket or sweatshirt, and a side pocket with a drawstring, perfect for carrying drinks. Comfort during long hours on the move is guaranteed by an adjustable harness system and a ventilated "Mesh Air System" back panel, which effectively dissipates heat and reduces pressure on the back and shoulders, even

Dimensions: 45x32x17 cm

NEW!

Kamatsu Lure 2-in-1 Backpack/Bag

Art. no 974 000 001

The Kamatsu Lure Backpack-Sling is an innovative 2-in-1 solution designed for spin anglers who value mobility and practical gear. Thanks to a unique system of zippers, repositionable carabiners, and D-rings, the traditional backpack can be instantly converted into a dual-sided sling bag, allowing it to be shifted from your back to your chest without needing to take it off. It is crafted from a thick, easy-to-clean material that is resistant to damage and harsh weather conditions. Its multi-compartment design, featuring robust zippers and oversized pulls, easily accommodates lure boxes and various accessories. It is equipped with features such as a MOLLE attachment system, a side pocket for a beverage with a drawstring, a dedicated slot for pliers, and a convenient rod holder. User comfort is enhanced by a rubberized, non-slip handle and a contoured back panel lined with breathable Air Mesh, which helps reduce perspiration during hot weather or while walking.

Dimensions: 24x5x13 cm

NEW!

Kamatsu Lure Bag

Art. no 974 000 003

The Kamatsu Lure bag is a handy, lightweight, and compact fishing bag designed for experienced anglers who prefer not to carry tons of gear on their trips. Despite its modest dimensions, its well-thought-out design allows for the easy organization of lure boxes, rig wallets, and essential tools. It is crafted from a durable material that resists abrasion, moisture, and dirt, while the striking blue zippers make the sliders easy to locate quickly. The bag features a surprisingly spacious main compartment, an auxiliary front compartment, and flat, zippered pockets. Its functionality is further enhanced by modular webbing on the front and sides for attaching accessories, a comfortable carry handle, and a detachable, adjustable shoulder strap equipped with swiveling carabiners—which effectively prevent the strap from twisting while you are on the move.

Dimensions: 26x19x10 cm

NEW!

Kamatsu Lure Case

Art. no 974 000 004

The Kamatsu Lure rod case is a professional, contoured cover designed for the safe and convenient transport of a fully rigged spinning setup. Its specially shaped, widened section allows you to carry the rod without having to remove the reel, saving you time once you reach the water.

Crafted from a smooth, waterproof material that is highly resistant to abrasion and dirt, it effectively protects your gear from moisture, dust, and mechanical damage. It also features a rigid plastic base, allowing you to set the case down on wet or rocky ground without the risk of water seeping in or the rod sustaining damage.

Dimensions: 140x9 cm

FISHING REPRESENTATIVE BRAND
N·S
Black Hole

N•S Black Hole is a South Korean powerhouse in the fishing industry, long recognized across Asia and North America as a benchmark for engineering precision and innovation. The brand has built its global reputation on in-house advanced carbon blank manufacturing paired with an uncompromising selection of components - including Fuji Torzite titanium guides and ergonomic reel seats. N.S rods stand out for their extraordinary sensitivity, ultra-lightweight design, and massive power reserves. They seamlessly blend the subtlety required for finesse techniques with the backbone needed for muscle-heavy fights with perch, zander, and pike. This is premium-grade tackle built for anglers who demand maximum sensitivity and absolute reliability on the water.

Bermuda SB

Bermuda, the pinnacle of saltwater lure brands, has begun its massive, unstoppable surge. The birth of an unprecedented, seemingly impossible blank marks the dawn of a new era in minnow casting games. With a casting distance improved by more than 20% compared to conventional models, it allows for a silent, precise, and deep search right behind the seabass schools. Engineered with premium, ultra-high modulus (low-resin) carbon, the rod action provides absolute control, effortlessly suppressing the violent headshakes and jumps of monster-grade seabass. Premium Metal Components: Built with high-strength, ultra-lightweight aluminum to reduce overall rod weight. Fatigue Reduction: Significantly minimizes angler fatigue during repetitive casting and prolonged fights. "Forget stiff and rigid rods. Bermuda is both powerful and smooth." Experience the casting distance delivered by its mysterious elasticity and astonishingly perfect balance.

Windshear Inshore

Born from relentless effort and rigorous testing, this rod features the advanced CTX (Carbon Tape X-Warping) construction. This cutting-edge design delivers an ultra-lightweight, high-strength, and high-sensitivity blank with exceptional handling, while minimizing blank twist during casting. With a versatile lineup of specifications, it seamlessly targets both bottom-dwelling and migratory species. When squaring off against monster-grade fish, the rod's sheer, formidable power truly shines. Equipped with Fuji SiC-S guides, it offers outstanding durability and further weight reduction. Additionally, the integration of the NS-02S-PG reel seat combined with a double lock nut system ensures a rock-solid connection to the reel, effectively minimizing angler fatigue during repetitive, high-frequency casting.

Silk Rod II Edition

Specifically built for shore-based anglers navigating Korean waters, the legacy continues with the birth of the Silk Rod 2. By incorporating Nano Carbon technology, the blank achieves an ultra-lightweight and highly elastic structure. The integration of Fuji guides, renowned for their superior durability and weight reduction, further elevates user convenience. Featuring the Smart Seat—an exclusive reel seat proprietary to N•S—this rod provides a rock-solid, seamless fit with any reel, significantly reducing fatigue even during prolonged fishing sessions. Furthermore, the blank utilizes the advanced WXW (Wide X-Wrapping) construction method to maximize structural strength, dramatically boosting the instantaneous impact resistance which stands as the core advantage of its high-elasticity design.

Darkhorse II Ssogari

Kalamus Return

Approach

NEW!

Darkhorse II Ssogari

A Korean-style mandarin fish rod, this entry-level model is highly adaptable to any stream, river, or dam nationwide. Designed with the CTX construction wrapping up to the backbone, it minimizes blank twist during casting, while its fast blank recovery aids in a swift and seamless landing.Equipped with Fuji guides, it ensures exceptionally smooth line release during casting, and the integration of an 8-axis CARBON HOOD NUT REEL SEAT enhances both durability and convenience. Delivering high sensitivity, this rod perfectly satisfies the demands of anglers pursuing delicate, finesse fishing tactics.

Kalamus Return

Inheriting its classic legacy, the rod features a premium wood reel seat and has been reinvented with an even more luxurious design. While the original CaLamus utilized woven taper technology, the KALAMUS RETURN incorporates N•S's latest AXIS 8 (8-axis carbon) construction, delivering significantly enhanced handling and torque. The lineup features an all-weather Light (L) specification, a dedicated Sso-minnowing specification optimized for minnowing tactics, and a specialized line built exclusively for Korean rock perch! It is the ultimate product engineered to deliver both the thrill and professional performance of mandarin fish and Korean rock perch fishing.

JIG MINNOW 100SS

NEW!

A versatile lipless sinking pencil lure engineered for year-round fishing, no matter the season or location. Rear-weighted for optimal balance in flight, it delivers exceptional casting distance - even in heavy wind and choppy conditions. On the retrieve, it produces a distinct, balanced resistance, making it remarkably easy and intuitive to fish for anglers of any skill level. Highly effective day and night, it excels at working shallow waters.

UMBRAGO ZIGZAG 160F

NEW!

f you're looking for a specialized lure to target fish around submerged vegetation and heavy cover, this crankbait will trigger strikes from even the most cautious predators. Its realistic profile perfectly mimics natural prey, while optimal weight distribution delivers a stable action and intense vibrations. The lure's standout feature is its pronounced rolling action with a high-flash side-to-side flicker, effectively drawing fish from various water depths. It also boasts a unique capability: when paused sharply near structure, it can perform an almost 360-degree turn on its axis. This sudden turn and flash trigger immediate, aggressive reaction strikes. Another uncompromising, finely crafted lure from N.S BLACK HOLE, engineered specifically for targeting trophy fish.

UMBRAGO JERK BAIT 110SP

NEW!

An extremely effective 110 mm lure with a bulky body engineered for maximum casting distance. Its advanced weight-transfer system - using a front tungsten ball and a rear steel weight - shifts the center of gravity to the tail during the cast, guaranteeing long, precise casts even in heavy winds. Upon hitting the water, the central weight instantly shifts back to restore perfect balance. When jerked, the dynamic movement of the tungsten ball creates aggressive, wide darts and intense side-flashing, triggering reaction strikes from nearby predators.

BALL BEARINGS
8+1

8 ball bearings, 1 roller bearing ■ Sealed, multi-disc front drag with 10kg max power ■ Aluminum body ■ Titanium-carbon composite rotor (C.T.A.) ■ Aluminum main spool ■ 4.4:1 gear ratio ■ Heavy-duty bronze gear ■ Worm Shaft oscillation system ■ Anti-twist line roller coated with titanium nitride ■ Screw-in CNC aluminum handle

The Ryobi Zauber PG is the toughest model in the legendary Zauber reel family, built for anglers who demand brute strength, reliability, and total lure control. Equipped with a heavy-duty Power Gear with a low 4.4:1 gear ratio, it is perfect for casting heavy lures and handling hardcore fishing situations. The core features an ultra-durable mechanism with a bronze main gear and a steel main shaft, ensuring smooth and reliable performance even under heavy loads. A precise worm-shaft oscillation system delivers perfect line lay, a feature highly valued by demanding anglers. One of the biggest upgrades is the modern rotor made with C.T.A. (Carbon Titanium Alloy) technology. This advanced composite significantly cuts weight while keeping the rotor stiff and warp-resistant. Less inertia means an easier start, smoother rotation, and a much better feel of the lure during retrieval. A rigid, full-aluminum body keeps all gears in perfect alignment during tough fights with strong fish. The screw-in handle goes directly into the gear to eliminate play and maximize power transfer. Supported by 8 ball bearings and 1 roller bearing, it delivers the famous Zauber smoothness. The setup is topped off with a lightweight aluminum spool with a metal line clip and a powerful, high-precision drag.

8 ball bearings, 1 anti-reverse ■ multi disc front drag ■ aluminium housing ■ S-oscilation line winding system ■ balanced rotor ■ rubber spool washer ■ tubular bail ■ titanium nitride coated anti-twist roller ■ strong CNC folding handle

The latest Zauber model from Ryobi stands out with its modern design and high performance qualities. Compared to previous models, this reel is lighter and stronger thanks to the new composite material NCRT used in the rotor. Furthermore, it has an improved, screw-in, foldable handle made in CNC technology. These features clearly indicate that this will be a reliable tackle for all anglers who opts for high quality at a reasonable price.

7 ball bearings, 1 roller bearing ■ 5.2:1 gear ratio ■ Max drag power: 5kg ■ Lightweight NCRT composite body and rotor ■ Ryobi RFO (Flat Oscillation) line-lay system ■ Screw-in aluminum handle ■ Fully sealed, waterproof drag ■ Saltwater-ready design

The Ryobi Ecusima CB is the latest edition of the cult reel series, taking the Ryobi brand to a whole new level by redefining strength and lightweight performance. This design uses the latest developments in materials science. The body and rotor are made from a specialized NCRT (New Composite Resin Technology) composite, which is 100% corrosion-resistant, about 20% lighter, and up to 40% stronger than standard plastics. This ensures exceptional rigidity under heavy loads while drastically cutting down overall weight. Flawless performance and excellent casting distance are guaranteed by the innovative RFO (Ryobi Flat Oscillation) line-lay system, which delivers extremely tight, precise, and even line spooling. What's more, this technology—combined with stainless steel components and a tightly sealed drag—allows the reel to be used in saltwater environments. The engineering quality is highlighted by a precise drive system where the aluminum handle screws directly into the main gear, completely eliminating play and improving control during a fight. The entire build runs on a perfectly placed system of 7 ball bearings and 1 roller bearing, delivering velvety smooth and silent operation while fishing.

BALL BEARINGS
7+1

7 ball bearings, 1 anti-reverse bearing ■ multi-disc front drag ■ aluminium body ■ main aluminium spool ■ computer-balanced rotor ■ solid, ergonomic handle with comfortable holder ■ one-piece rotary handle ■ bail roller covered with titanium nitride

Ryobi Arctica CF model has a solid and durable aluminium body, and a light and composite rotor. Such combination provides it with power and lightness, features desired by spin fishermen. The implemented carbon rotary handles are approximately half as heavy, but 3 times stronger than the aluminium ones! Significant weight reduction has been obtained by spool milling. The reel drag allows for very accurate adjustment and is well protected against water and dust.

6 ball bearings, 1 anti-reverse bearings ■ multi-disc front brake ■ aluminium CNC handle ■ graphite rotor ■ aluminium body ■ handle screwed in the main gear ■ aluminium main spool ■ balanced rotor ■ anti-twisting enhanced bail roller

It is a development of the Safari series of reels - some of the most powerful reels on the market. Multi-disc front drag allows fast and precise adjustment which is extremely useful when fighting the big fish. The CNC aluminium handle, screwed in the main gear, ensures precise operation of the reel, while the carbon rotor guarantees the lightness and durability. The aluminium body and main spool provide durability and corrosion resistance, making the reel suitable for sea fishing. This is a reel that will meet the expectations of even the most demanding anglers, providing not only reliability but also high performance on any fishing adventure.

7+1

7 ball bearings, 1 roller bearing ■ multi disc front drag ■ free running spool system ■ composite body and rotor ■ aluminium main spool ■ computer balanced rotor ■ strong, ergonomic handle with a comfortable knob ■ aluminium foldable handle ■ roller coated with titanium nitride.

Something that Ryobi enthusiasts have been waiting for for a long time. A free-running reel, perfectly adapted to modern fishing standards. It will be perfect for classic carp anglers, method feeder rods, or even zander sets with fillet or dead fish. Smooth and evenly working free running brake will not arouse suspicion of cautious fish, and the reinforced gear will also show high operating culture. Friction discs of the brake are relatively large as for a reel of this size, which translates into the high quality of line release during rapid runs of the fish toward the snags. The ergonomic free spool braking force knob is easy to adjust even with a wet or slippery hand, which will be particularly appreciated by anglers using all kinds of bait feeders

RYOBI Marfix Laytrack BJ500L

NEW!

9 sealed ball bearings, 2 roller bearings ■ 5.3:1 gear ratio ■ Powerful 30kg lever-drag system ■ Heavy-duty round-profile design ■ Monocoque CNC machined duraluminum frame ■ Adjustable-length handle (more cranking power / faster retrieval speed) ■ Oversized aluminum power knob ■ Line retrieve: 97 cm per crank turn ■ 100% saltwater-resistant

The Ryobi Marfix Laytrack BJ500L is a hardcore round-profile baitcasting reel built for extreme sea fishing, vertical jigging, and heavy-duty boat fishing. This model combines Japanese engineering precision with legendary reliability, offering the massive power needed to fight the largest ocean predators. The core of the machine is a powerful lever-drag system with a massive 30kg of max power, built to prevent line slack during sudden runs of a fighting fish. Silky smooth operation under load is guaranteed by 9 sealed ball bearings and 2 roller bearings, all made of top-quality stainless steel that resists harsh saltwater. With an optimal 5.3:1 gear ratio, it offers the perfect balance between retrieval speed and raw cranking power, essential for working heavy jigs at great depths. This is a reliable tool built for pros who want maximum power when fighting the toughest saltwater monsters.

NEW!

8 sealed ball bearings + 1 anti-reverse bearing ■ 5.1:1 gear ratio ■ Precise 15 kg drag system ■ Round profile design ■ CNC-machined duralumin monocoque frame ■ Adjustable handle length ■ Comfortable EVA foam handle knob ■ Built-in drag clicker ■ 100% saltwater resistant

The Ryobi Mugenkai GM500L is an advanced marine baitcasting reel designed for precision fishing, especially saltwater slow jigging and bottom fishing. It features a lightweight and rigid CNC-machined duralumin monocoque frame that keeps the internal gears perfectly aligned and handles heavy loads. At its core is a sealed carbon drag system with 15 kg of stopping power, delivering smooth performance without jerking during tough fights. The reel runs smoothly thanks to 8 sealed stainless steel ball bearings and 1 anti-reverse bearing, all fully resistant to saltwater. The extended handle with an ergonomic Power Knob provides better leverage, greatly reducing hand fatigue when working heavy lures. It also includes a free-spool system and a drag clicker, making it a reliable tool for professional anglers fishing worldwide.
